## FEDERAL COMMUNICATIONS COMMISSION RELEASES *STATISTICS OF COMMUNICATIONS COMMON CARRIERS*

Washington, D.C. – Each year since 1939, the FCC has published the *Statistics of Communications Common Carriers*, a reference work widely used by academics, consultants, and other researchers in the field of telecommunications. This report includes a wealth of data on telecommunications costs, revenues, prices, and usage. The edition being released today includes detailed information on Qwest Corporation, data that were not available when the preliminary compilation was released in November 2003.

In order to expedite release of the information, the FCC is making all of the data available electronically at this time. Another notice will be issued when printed versions can be purchased from the U.S. Government Printing Office.

The electronic version of the publication is available to the public free of charge. The 217-page volume is divided into the following five sections:

- Part 1 contains general information on industry structure.
- Part 2 contains financial and operating data relating to telephone carriers.
- Part 3 contains data on international communications.
- Part 4 contains historical financial and operating statistics.
- Part 5 contains data on industry trends.

The full report is available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street SW, Room CY-A257, Washington, DC 20554. This report may be purchased from the Commission's duplicating contractor, Qualex International, Portals II, 445 12th Street SW, Room CY-B402, Washington, DC 20554, telephone 202-863-2893, facsimile 202-863-2898, or via e-mail [qualexint@aol.com](mailto:qualexint@aol.com). The publication also may be downloaded from the **FCC-State Link** Internet site at [www.fcc.gov/wcb/stats](http://www.fcc.gov/wcb/stats).

**2002/2003 Edition**

**Federal Communications Commission  
Washington, DC 20554**

---

## Statistics of Communications Common Carriers

### Introduction and Overview

The *Statistics of Communications Common Carriers* (SOCC), which has been published annually since 1939, is one of the most widely used reference works in the field of telecommunications. It is the only permanent record of common carrier activity published by the Government Printing Office and sent to repository libraries. The most recent edition may be purchased by mail from the Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or by calling GPO's Order and Inquiry Desk at (866) 512-1800.

### Sources of Information

Much of the material contained in this volume is available well before the SOCC is published by the Government Printing Office.

#### Internet

The Wireline Competition Bureau (formerly the Common Carrier Bureau) has a home page on the World Wide Web. This home page can be accessed directly at [www.fcc.gov/wcb](http://www.fcc.gov/wcb) or through a link from the main FCC home page at [www.fcc.gov](http://www.fcc.gov). The materials available include orders, notices of proposed rulemaking, statistical reports, public notices, news releases, fact sheets, and answers to frequently asked questions (FAQs). Prior to the development of the Internet, an electronic bulletin board called **FCC-State Link** had been established to share data electronically with state agencies, and a portion of the FCC's Internet site still bears that original name. The **FCC-State Link** includes all of the files contained in the SOCC and a variety of other reports that are used in the preparation of the SOCC; it can be reached directly at [www.fcc.gov/wcb/stats](http://www.fcc.gov/wcb/stats). The annual carrier submissions that are used in developing many of the tables in this publication can also be found at [www.fcc.gov/wcb/armis/db](http://www.fcc.gov/wcb/armis/db).

#### Duplicating Contractors and Reference Information Center

Several private firms specialize in locating, duplicating, and distributing FCC documents. The Commission's current duplicating contractor is Qualex International. Documents may be purchased by calling Qualex at (202) 863-2893, or via e-mail at [qualexint@aol.com](mailto:qualexint@aol.com). Reports and the summaries used in the preparation of the SOCC are also available in the FCC's Reference Information Center, located on the Courtyard Level, 445 12<sup>th</sup> Street S.W., Washington, D.C. The center contains card- or coin-operated copying machines for use by the general public.

### Coverage

#### Local Telephone Companies

There are approximately 1,300 companies that have historically provided local telephone service in the United States. These companies, often referred to as incumbent local exchange carriers (ILECs), range in size from rural cooperatives serving fewer than 100 customers to large holding companies serving millions of telephone lines. In most cases, only larger companies (those with more than \$121 million in annual revenues in 2002) are required to file information with the FCC, and only telephone companies affiliated with the four largest holding companies are required to file the most extensive information. New telephone service providers, referred to as competitive local exchange carriers (CLECs), and providers of wireless telephone service are not required to file detailed statistical data with the Commission.

## **Statistics of Communications Common Carriers**

In 2002, as shown in the detailed statistics in Table 2.8, there were 29 reporting large ILECs required to file the ARMIS USOA Report 43-02. In addition to these large carriers, 24 mid-sized ILECs report less detailed data in the ARMIS Annual Summary Report 43-01, and statistical tabulations based on this report are shown in Tables 2.9 through 2.17. While these 53 companies account for more than 90% of the local telephone lines served by ILECs, they do not reflect a complete census of the industry.

### **Long Distance Companies**

More than 1,000 firms buy access from local telephone companies in order to provide long distance service, and a limited amount of information on the larger long distance companies is contained in various tables throughout the SOCC. Among long distance carriers, only AT&T and Alascom, which once were regarded as dominant carriers possessing market power, were ever required to file detailed reports. These data are contained in earlier editions of this publication. The reporting requirements, however, were eliminated when the FCC determined that AT&T was no longer a dominant carrier.

### **Accounting Standards**

A new Uniform System of Accounts (USOA) for the telephone industry became effective at the beginning of 1988. The detailed tables in this report are based on that system. Full Class A reporting requirements are imposed only where the aggregate revenues of an ILEC and its affiliates exceed \$7 billion. In 2002, only BellSouth, Qwest, SBC, and Verizon remained subject to full Class A reporting requirements. The results for the 29 carriers affiliated with these firms appear in Table 2.8. The amount of state-by-state information varies from company to company. Ameritech, now a subsidiary of SBC, has historically maintained a separate operating company in each state served and consequently files information for each one. In contrast, Qwest, formerly U S WEST, has consolidated its operations into a single company servicing 14 states, and it files aggregated information.

Where the revenues of all affiliated ILECs total less than \$7 billion, each of the affiliated ILECs earning revenues over the reporting threshold is eligible for Class B (streamlined) reporting treatment. Summary tabulations for the mid-sized companies are included in Tables 2.9 through 2.17.

The USOA applies to telephone operating companies. It is not designed to capture the activities of parent holding companies or subsidiaries. Where activities have been transferred from telephone companies to holding companies or subsidiaries, the revenues from those activities cease to be reported by the operating companies. For this reason, along with several other differences between financial and regulatory accounting systems, the results contained in reports to the FCC may differ markedly from reports to the Securities and Exchange Commission (SEC).

### **Timing of the SOCC**

Most companies report information for the prior calendar year to stockholders and to the SEC by April 1. At the same time, they provide annual reports on their domestic operations to the FCC. The basic raw data are made available to the public as soon as received. This statistical summary is produced after the data have been checked, inquiries on suspect items sent to the carriers, corrected submissions received, and the industry tables compiled. Unlike data for domestic operations, corrected data for international services are typically not received until at least ten months after the end of the year being reported. Summaries of the international data are usually prepared and released by the end of the year.

## Statistics of Communications Common Carriers

This year's publication has been delayed because Qwest Corporation's financial reports for 2002 were not available at the usual time because of an ongoing investigation by the Securities and Exchange Commission into the company's accounting practices. We have, nevertheless, shortened the production cycle in order to reduce the delay in publication. This has been done by lagging the publication of international data by one year. Thus, this edition of the SOCC contains the international statistics *only through 2001*. International data for 2002 will be available via the Internet, from duplicating contractors, and in the FCC's public reference center, but it will not be published in the SOCC until next year.

### Other Information Sources

The United States Telecom Association represents most local telephone companies. Like many trade associations, it collects information from each of its members. Annually, it prepares, publishes and sells statistical publications such as *Phone Facts* and *Statistics of the Local Exchange Carriers*.

The Cellular Telecommunications & Internet Association (CTIA) represents the wireless industry. Since January 1985, it has conducted a semi-annual wireless survey, which consists of data on the wireless industry including the number of subscribers, revenues, employees, and average local monthly bill.

The Telecommunications Industry Association's (TIA) members consist of manufacturers and suppliers of the products and services used in telecommunications. TIA publishes annually the *Multimedia Telecommunications Market Review and Forecast*, which provides an overview of the telecommunications industry.

\* \* \* \* \*

The 2002/2003 volume of the *Statistics of Communications Common Carriers*, was prepared by John Adesalu, Linda Blake, Mike Lehner, and Katie Rangos. Many of the tables appearing in Part 5 are based on the statistical work of other members of the staff of the Industry Analysis and Technology Division, especially Alex Belinfante and Jim Lande. All have worked long and hard to expand and improve the publication.

We invite comments and suggestions for further improvements. For your convenience, the survey form on the following page may be used for your response.

n.m. - not meaningful.

1/ On Nov. 18, 2002, AT&T Corp. executed the spin-off of AT&T Broadband Services. As a result, its net income reflects a net loss of \$14.5 billion from the discontinued operations and a net noncash gain of \$1.3 billion from the disposition of said operations. On the same date, the company effected a 1-for-5 reverse split of its common stock.

2/ Includes extraordinary items and cumulative net effect of changes in accounting principles.

3/ Identified as network (switched) access lines.

4/ The per-share and average shares data are for Sprint's FON Group, based on net income of \$1.208 billion. The PCS Group suffered a loss of \$0.58 per share, based on a net loss of \$578 million.

113	WorldCom, Inc.	Holding	-
114	WorldCom, Inc. - Long Distance Operations	Interexchange Carrier	17,659,124 <i>p</i>

*p* - preliminary.

Note: Carriers controlled by other companies are indicated by indentations from the margin. In some cases, an intermediate level of control has been omitted. The information shown is primarily from annual reports filed with the Commission.

- 1/ Teleport is basically a competitive local exchange carrier, but it reports to the FCC because of its long distance operations. The company's total operating revenues for 2002 amounted to \$1.444 billion.
- 2/ The division consists principally of Sprint Communications Company L.P.
- 3/ Incorporated in Canada and governed by the Canada Business Corporations Act.
- 4/ WilTel Communications has been engaged primarily in non-common carrier activities, but it is required to report to the FCC because of its long distance operations.

## Statistics of Communications Common Carriers

**Table 1.3 - Changes Affecting Coverage of Table 1.2**

No.	Name of Company	Type of Company	Remarks
<b>Additions:</b>			
1	CenturyTel, Inc.	Holding	Parent company of CenturyTel of Washington, Inc.
2	CenturyTel of Washington, Inc.	Telephone	Company classified as a carrier subject to the Communications Act of 1934, as amended.
3	Cox California Telcom, LLC d/b/a Cox Communications	Interexchange	Carrier became subject to the Commission's reporting requirements at 47 CFR 43.21(c).
4	Level 3 Communications, Inc.	Holding	Parent company of Level 3 Communications, LLC, a reporting interexchange carrier.
5	Roseville Telephone Company	Telephone	Company classified as a carrier subject to the Communications Act of 1934, as amended.
6	SureWest Communications	Holding	Parent of Roseville Telephone Company.
7	Touch America Holdings, Inc.	"	Parent company of Touch America, Inc., a reporting interexchange carrier.
<b>Deletions:</b>			
1	BCE Inc. (Bell Canada Enterprises)	Holding	Company ended its 96% economic and voting interests in Teleglobe Inc., a reporting carrier, on Apr. 24, 2002.
2	Concert Global Networks USA LLC	Interexchange	Concert, a joint venture of AT&T Corp. and British Telecom, was legally dissolved on Apr. 1, 2002.
3	GTE Midwest Inc. d/b/a Verizon Midwest Inc.	Telephone	Company discontinued operations after selling all of its study-area properties to CenturyTel on Aug. 31, 2002.
4	LCI Int'l Telecom Corp. d/b/a Qwest Comm. Svcs.	Interexchange	See merger remarks for LCI, below.
5	Lightyear Communications, Inc.	"	Carrier's revenues fell below the indexed threshold established for reporting purposes.
6	Network Plus, Inc.	"	Network Plus Corp., along with its operating subsidiary, filed for Chapter 11 bankruptcy protection on Feb. 5, 2002.
7	Primus Telecommunications Inc.	Interexchange	>
8	PT-1 Long Distance, Inc.	"	>
9	Verizon Select Services, Inc.	"	> Revenues of each of these four carriers fell below the indexed threshold established for reporting purposes.
10	Working Assets Funding Service, Inc.	"	>
<b>Mergers and Other Changes:</b>			
1	Excel Telecommunications, Inc.	Interexchange	Company was acquired by VarTec Telecom, Inc., a reporting interexchange carrier, on Apr. 8, 2002.
2	LCI Int'l Telecom Corp. d/b/a Qwest Comm. Svcs.	"	LCI International, which filed separately in 2002, was merged into Qwest Communications Corp. on Dec. 31, 2001.
3	Verizon Select Services, Inc.	"	Carrier transferred its consumer and small business customer base to an affiliate, Bell Atlantic Communications, Inc. d/b/a Verizon Long Distance, effective June 1, 2001.
4	WilTel Communications Group, Inc.	"	Williams Communications Group, Inc., upon completion of its financial restructuring, emerged from Chapter 11 bankruptcy proceedings as Wiltel Communications Group, Inc., effective Oct. 15, 2002.

n.a. - not applicable

\* Includes incumbent local exchange carriers and competitive local exchange carriers.

1/ Figures reported by RBOC long distance affiliates, which may include both in-region and out-of-region long distance service, and local exchange operating companies for the years 2000 and 2001. Some of the RBOC long distance affiliates' revenues fall below the reporting threshold and are therefore included in the all other long distance carriers' market share.

2/ Includes wireless toll service revenues reported by wireless carriers and toll service revenues reported by competitive local exchange carriers. Excludes toll revenues reported by incumbent local exchange carriers.

## Statistics of Communications Common Carriers

### Notes for Table 1.4 - 1.6.

NA - Not Available.

\* Regional Bell operating company long distance affiliates.

- 1/ ACC Long Distance Corp. and Teleport Communications Group merged in April of 1998, and the combined company, Teleport Communications Group, merged with AT&T Communications, Inc., in July of that year. AT&T Communications acquired Alascom, Inc., August 7, 1995 and began filing a consolidated revenue statement in 1996.
- 2/ On July 21, 2002, WorldCom, Inc., and certain of its direct and indirect U.S. subsidiaries filed voluntary petitions for relief under Chapter 11 of Title 11 of the United States Code in the United States Bankruptcy Code in the United States Bankruptcy Court for the Southern District of New York and continued in the possession of their assets and the management of their business. Their Plan of Reorganization was confirmed by the Bankruptcy Court on October 31, 2003.
- 3/ MCI WorldCom's revenues were revised for 1998 to exclude enhanced services and to be consistent with revenues reported for 1999. WorldCom, Inc., completed a merger with MCI Communications Corp. in September of 1998 and filed 1998 revenue figures for the combined company, MCI WorldCom, Inc. LDDS Communications, Inc., and Advanced Telecommunications Corp. merged in 1992. In 1993, LDDS merged with Metromedia Comm Corp. and Comsystems Network Services. For 1993, only the revenues that were received after the merger are included in LDDS's revenues; those preceding the merger are listed individually. LDDS and Wiltel merged January 5, 1995. In May 1995, LDDS changed its name to WorldCom, Inc. WorldCom acquired MFS Intelnet December 31, 1996. On July 1, 2001, WorldCom acquired Intermedia Communications, Inc.
- 4/ Sprint's revenues were revised for 1998 to exclude enhanced services and to be consistent with revenues reported for 1999.
- 5/ In July 1986, GTE Sprint and US Telecom merged into US Sprint. United Telecommunications, Inc., then majority owner of US Sprint, purchased the remaining interest from GTE in July of 1992. Effective February 16, 1992, the company's name became Sprint Communications Co.
- 6/ LCI International Telecom Corp. and USLD Communications, Inc., merged in December of 1997 and filed separate statements for the year. Qwest Communications Corp. merged with LCI and USLD Communications in June of 1998, and each of the three affiliated companies filed a separate revenue statement for 1998.
- 7/ On January 28, 2002, Global Crossing Holdings, Ltd. and certain subsidiaries and affiliates filed a voluntary petition in the United States Bankruptcy Court for the Southern District of New York and continued in the possession of assets and the management of their business. Global Crossing's Plan of Reorganization was confirmed by the Bankruptcy Court on December 26, 2002.
- 8/ VarTec acquired Excel Telecommunications on April 8, 2002.
- 9/ On April 22, 2002, Williams Communications Group, Inc., the parent company of Williams Communications LLC, filed a voluntary petition for reorganization under Chapter 11 of the U.S. Bankruptcy Code in the U.S. Bankruptcy Court for the Southern District of New York. Effective October 15, 2002 upon completion of its financial restructuring, Williams Communications Group, Inc. emerged from Chapter 11 bankruptcy proceedings as Wiltel Communications Group, Inc.
- 10/ Cincinnati Bell Inc., merged with IXC Communications, Inc., on November 9, 1999 and soon began doing business as Broadwing, Inc. The corporate name was changed from Broadwing back to Cincinnati Bell, Inc. on May 27, 2003.
- 11/ As part of its process of exiting the U.S. retail voice business, Cable and Wireless plc entered into a definitive agreement on September 16, 2002 to transfer its U.S. retail customer base to a wholly-owned subsidiary of Primus Telecomm pending regulatory approval.
- 12/ On January 31, 2002, McLeodUSA Incorporated, the parent company, filed voluntary petitions for relief under Chapter 11 of the United States Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware. On April 16, 2002, McLeodUSA Incorporated emerged from the Bankruptcy court proceeding pursuant to the terms of its amended plan of reorganization.
- 13/ On June 25, 2002, ITC^DeltaCom, Inc. filed a voluntary petition for relief under Chapter 11 of the U.S. Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware. On October 29, 2002, the company consummated a plan of reorganization.
- 14/ On June 19, 2003, Touch America Holdings, Inc., the parent company, and all of its subsidiaries filed a voluntary petition for relief under Chapter 11 of the United States Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware.
- 15/ Data for 1996 taken from the Annual Report to the Colorado Public Utilities Commission from telecommunications carriers regulated pursuant to §40-15-301 C.R.S.
- 16/ Includes wireless toll service revenues reported by wireless carriers and toll service revenues reported by CLECs.
- 17/ Estimated by FCC staff.

Source: The revenue information for the larger long distance telephone companies, shown in Table 1.4, is reported annually to the FCC in response to 47 C.F.R. § 43.21(c). The revenue information for large local exchange telephone companies is based on annual ARMIS (Automated Reporting Management Information System) USOA reports (FCC Reports 43-02). The Commission also collects revenue information on FCC Form 499-A, Telecommunications Reporting Worksheet, and, in previous years, on FCC Form 431, Telecommunications Relay Service Worksheet, and FCC Form 457, Universal Service Worksheet. Revenues for carriers not subject to section 43.21 or ARMIS reports are estimated by FCC staff based on carriers' filings of FCC Forms 431, 457, and 499-A.

## Part 2

# Telephone Carriers

## Statistics of Communications Common Carriers

**Table 2.1 - List of Telephone Carriers Reporting to the Commission for the Year Ended December 31, 2002,  
Whose Reports Were Used in the Statistical Tabulations in Parts 1 and 2**

(Dollar Amounts Shown in Thousands)

Incumbent Local Exchange Carriers				
Name of Company	Headquarters*	Total Operating Revenues	Total Access Lines #	State/Area of Carrier's Operation

Cox California Telcom, LLC d/b/a Cox Communications 2/	Atlanta, Ga.	129,957	0

*p* - preliminary.

NA - Not available.

\* In some cases, the headquarters listed is for the parent company. See Table 1.2 for the intercorporate relations of communications carriers and controlling companies.

# Includes plant under construction. Figures may also include plant used by some carriers (e.g., Teleport Communications Group, WilTel Communications, and Level 3 Communications) to provide communications services other than long distance toll. See also footnotes to Table 1.2.

1/ Data reported by WorldCom, which filed for Chapter 11 bankruptcy protection on July 22, 2002, are preliminary.

2/ Company is basically a reseller; therefore, it reported little or no communications plant.

3/ Global Crossing's plant data are not available due to financial restructuring.

4/ Company is a subsidiary of VarTec Telecom, Inc. (see Table 1.3).

5/ Teleglobe USA and a number of its affiliates filed for Chapter 11 bankruptcy protection on May 28, 2002; at about the same time, Teleglobe Inc., the corporate parent, and its non-U.S. affiliates made a similar filing in Canada. Consequently, the Teleglobe group of companies began a process of reorganization that, among other steps, involves the transfer and sale of Teleglobe's telecommunications assets and businesses in the United States.

6/ Total plant figure is for parent company, Touch America Holdings, Inc. The parent and its subsidiaries filed for Chapter 11 bankruptcy protection on June 19, 2002.

7/ Revenues exclude \$25.6 million from non-communications operations; plant excludes \$36.1 million.

## Statistics of Communications Common Carriers

### Notes for Tables 2.2 through 2.5

Data for Tables 2.2 through 2.5 were obtained from annual ARMIS (Automated Reporting Management Information System) operating data reports (FCC Report 43-08) of reporting incumbent local exchange carriers.

These tables (2.2 to 2.5) reflect streamlining of ARMIS Report 43-08 required by "Phase 2 Report and Order," 16 FCC Rcd at 19977-78, paras. 179-83, in removing a total of fourteen columns, replacing three columns with new ones, combining columns and revising headings.

See Table 2.6 for data of individual carriers.

Totals by state may be understated because of the incomplete data.

Detail may not match totals because of necessary rounding.

### Changes to Companies during Year 2002

On August 31, 2002, Verizon Communications sold GTE Midwest Inc. d/b/a Verizon Midwest Inc., in Missouri to CenturyTel of Washington, Inc.

Verizon South Inc. sold all of its Alabama operations to CenturyTel of Washington, Inc. on June 30, 2002, and all of its Kentucky operations to ALLTEL on July 31, 2002.

### Outside Plant Statistics

Unless otherwise stated, data include local loop and interoffice facilities. A cable containing only copper, coaxial or other metallic conductors is classified as metallic, but a cable containing both fiber and copper, coaxial or metallic conductors is classified as fiber.

Kilometers equals total miles multiplied by 1.6093 and then rounded to the nearest whole number. Non-zero entries in the ARMIS reports of less than 1 kilometer are reported as 1 kilometer.

Equivalent number of poles is the number of solely owned poles plus the sum of the products of the numbers of those jointly owned times their ownership percentages.

## Statistics of Communications Common Carriers

### Notes for Tables 2.2 through 2.5 -- Continued

#### Access Lines

Access lines include WATS and WATS-like access lines, 800 and 800-like access lines, and employee concession lines, but not official/company circuits. Analog access lines are shown in 4Khz equivalents and include access lines from digital switches if the lines themselves are not terminated at the customer's premises as digital lines.

Digital access lines are shown in 64 Kbps equivalents. To be classified as digital, the access lines must be terminated at the customer end as digital lines or be available for use by the customer as digital lines.

Other switched access lines exclude digital centrex extensions, which were included prior to 1991. Switched access lines exclude ISDN control channels, which were included as 64 Kbps equivalents prior to 1991. Switched access lines also exclude WATS and WATS-like access lines, which were included as switched access lines prior to 1997. WATS and WATS-like access lines are classified as special access lines.

Figures for switched access lines reported in the ARMIS 43-08 Report for some companies are slightly different from figures for billable access lines reported in the ARMIS annual summary report (FCC Report 43-01) for a variety of reasons, including different reporting requirements, the interpretation of those requirements by the various companies, and the methods different companies use to calculate the number of lines. The majority of the differences come from the fact that derived ISDN channels are included in the count of switched access lines in the ARMIS 43-08, but are not treated as billable access lines in the ARMIS 43-01. Some companies may have included official/company circuits with ARMIS 43-08 access lines.

BellSouth Telecommunications, Inc. excluded feature Group A, out-WATS, 800 service, and two-way WATS from access lines. The company reported only CPE and semi-public access lines as public access lines. For more details see ARMIS general instructions webpage at [www.fcc.gov/wcb/armis/descriptions.html](http://www.fcc.gov/wcb/armis/descriptions.html).

#### Telephone Calls and Minutes

The number of toll calls is based on originating message volumes and includes outward calls, 800 and 800-like service, directory service dial-it services (e.g., 900 and 936 services), and optional calling plans. IntraLATA toll calls are carried by the reporting local operating company within a given Local Access and Transport Area (LATA). InterLATA toll calls are directed to and carried by interexchange carriers. Billed access minutes are based on bills sent to interexchange carriers and include total originating and terminating access minutes-of-use, including call set-up time, holding time, and conversation time.

## Statistics of Communications Common Carriers

### Notes for Table 2.6.

Name of Company	Code
BellSouth Corporation	BS
Qwest Corporation	Q
SBC Communications Inc.	SBC
Verizon Communications Inc.	VZ
ALLTEL Corporation	AL
Citizens Communications Company	C
Sprint Corporation	S
All others that are part of a holding company group	O

Source: Annual ARMIS (Automated Reporting Management Information System) operating data reports (FCC Report 43-08) of reporting incumbent local exchange carriers. See Notes for Tables 2.2 through 2.5 for more information on streamlining of ARMIS Report 43-08, pursuant to "Phase 2 Report and Order," 16 FCC Rcd at 19977-78, paras. 179-83.

Note -- Detail may not match totals because of necessary roundings.

- Unless otherwise stated, outside plant statistics include local loop and interoffice facilities. A cable containing only copper, coaxial or other metallic conductors is classified as metallic, but a cable containing both fiber and copper, coaxial or other metallic conductors is classified as fiber.
- Kilometers equals total miles multiplied by 1.6093 and then rounded to the nearest whole number. Non-zero entries in the ARMIS reports of less than 1 kilometer are reported as 1 kilometer.
- Equivalent number of poles is the number of solely owned poles plus the sum of the products of the numbers of jointly owned times their ownership percentages.
- Access lines include WATS and WATS-like access lines, and 800 and 800-like access lines, and employee concession lines, but not official/company circuits. Analog access lines are shown in 4Khz equivalents and include access lines from digital switches if the lines themselves are not terminated at the customer's premises as digital lines. Digital access lines are shown in 64 kbps equivalents. To be classified as digital, the access lines must be terminated at the customer end as digital lines or be available for use by the customer as digital lines.
- Other switched access lines exclude digital Centrex extensions, which were included prior to 1991. Switched access lines exclude ISDN control channels, which were included as 64 Kbps equivalents prior to 1991. Switched access lines also exclude WATS and WATS-like access lines, which were included as switched access lines prior to 1997. WATS and WATS-like access lines are classified as special access lines.
- Figures for switched access lines reported in the ARMIS 43-08 Report for some companies are slightly different from figures for billable access lines reported in the ARMIS annual summary report (FCC Report ARMIS 43-01) for a variety of reasons, including different reporting requirements, the interpretation of those requirements by the various companies, and the methods different companies use to calculate the lines. The majority of the differences come from the fact that derived ISDN channels are included in the count of switched access lines in the ARMIS 43-08, but are not treated as billable access lines in the ARMIS 43-01. Some companies may have included official/company circuits with the ARMIS 43-08 access lines.
- The number of toll calls is based on originating message volumes and includes outward calls, 800 and 800-like service, directory service, dial-it services (e.g., 900 and 936 services), and optional calling plans. IntraLATA toll calls are carried by the reporting local operating company within a given Local Access and Transport Area (LATA). InterLATA toll calls are directed to and carried by interexchange carriers. Billed access minutes are based on bills sent to interexchange carriers and include total originating and terminating access minutes of use, including call set-up time, holding time, and conversation time.

### Footnotes Pertaining to Data on Individual Carriers

- 1/ BellSouth Telecommunications, Inc. excluded feature Group A, out-WATS, 800 service, and two-way WATS from access lines. The company reported only CPE and semi-public access lines as public access lines.
- 2/ The difference in the numbers for Total Switched Access Lines in sections on "Switched Access Lines in Service" and "Access Lines in Service by Customer" may be due to both rounding and different data sources used by Verizon North Inc. to derive these numbers.
- 3/ Verizon South Inc. sold all of its Alabama operations to CenturyTel of Washington, Inc. on June 30, 2002, and all of its Kentucky operations to ALLTEL on July 31, 2002.
- 4/ On August 31, 2002, Verizon Communications sold GTE Midwest d/b/a Verizon Midwest Inc., in Missouri to CenturyTel of Washington, Inc.
- 5/ SureWest Communications is the holding-company of Roseville Telephone Company.

1/ Beginning April 1, 2002, following the 2001 ARMIS Order (released December 10, 2001) and the Phase 2 Order on Reconsideration (released March 8, 2002), only large incumbent local exchange carriers (ILECs) are required to file the ARMIS Report 43-02. Mid-sized ILECs are not required to file this report, among other things. See 2000 Biennial Regulatory Review - Comprehensive Review of the Accounting Requirements and ARMIS Reporting Requirements for Incumbent Local Exchange Carriers: Phase 2, CC Docket Nos. 00-199, 97-212, 80-286, 99-301, Report and Order in CC Docket Nos. 00-199, 97-212, and 80-286, Further Notice of Proposed Rulemaking in CC Docket Nos. 00-199, 99-301, and 80-286, 16 FCC Rcd 199911 (2001) (Phase 2 Report and Order), recon. granted, 17 FCC Rcd 4766 (2002). A mid-sized ILEC is a carrier whose annual operating revenues, either individually or when aggregated with those of any ILEC that it controls, is controlled by, or with which it is under common control, are less than \$7 billion.

2/ Discrepancies between last year's ending and this year's beginning balances are due to additions, deletions, and mergers of reporting carriers.

## Statistics of Communications Common Carriers

## Statistics of Communications Common Carriers

### Notes for Table 2.8

Source: Annual ARMIS (Automated Reporting Management Information System) USOA Reports (FCC Report 43-02) of reporting local exchange carriers.

**Note: Detail may not match totals because of necessary roundings.**

-- In the account number column, four-digit numbers are used when there is a corresponding account number in the Uniform System of Accounts (USOA). Three-digit numbers correspond to items defined in the ARMIS USOA report (FCC Report 43-02).

Code letters are shown above the name of each company owned or controlled by a holding company as of December 31, 2002.

Name of Company	Code
BellSouth Corporation	BS
Qwest Communications International, Inc.	Q
SBC Communications Inc.	SBC
Verizon Communications Inc.	VZ

NA - Not applicable.

Starting with the year 2001, mid-sized ILECs, as defined by section 32.9000, were relieved from filing the ARMIS USOA Report 43.02. See 2000 Biennial Regulatory Review - Comprehensive Review of the Accounting Requirements and ARMIS Reporting Requirements for Incumbent Local Exchange Carriers: Phase 2, CC Docket No. 00-199, 97-212, 80-286, 99-301, Report and Order in CC Docket Nos. 00-199, 97-212, and 80-286, Further Notice of Proposed Rulemaking in CC Docket Nos. 00-199, 99-301, and 80-286, 16 FCC Rcd 19911 (2001) (Phase 2 Report and Order), *recon. granted*, 17 FCC Rcd 4766 (2002). A mid-sized ILEC is a carrier whose annual operating revenues, either individually or when aggregated with those of any ILEC that it controls, is controlled by, or with which it is under common control, are less than \$7 billion.

- 1/ Temporary cash reserves consist of funds placed in trust for future associate health and welfare payments.
- 2/ Total compensation includes both expenses and capitalized salaries and benefits.
- 3/ All Alabama operations were sold to CenturyTel on June 30, 2002. Their data are not included.
- 4/ All Alabama operations were sold to CenturyTel on June 30, 2002. All Kentucky operations were sold to ALLTEL on July 31, 2002. Data for both Alabama and Kentucky are not included.
- 5/ As of May 1, 2002, the company completed a merger of Verizon Wireless Puerto Rico, (a former non-regulated affiliate) into Puerto Rico Telephone Company.

See notes following this table.

## Statistics of Communications Common Carriers

### Notes for Tables 2.9 through 2.17

Data for these tables were obtained from the ARMIS (Automated Reporting Management Information System) reports (FCC Report 43-01) filed by incumbent local exchange companies with operating revenues for the year 2001 equal to or in excess of \$119 million. The FCC's Phase 1 Accounting Review Order, 14 Rcd 11396 (1999), established streamlined reporting requirements for mid-sized incumbent local exchange carriers (ILECs) beginning in the 1999 reporting year. A mid-sized carrier is a carrier whose annual operating revenues either individually or when aggregated with those of any ILEC it controls, is controlled by, or with which it is under common control, are less than \$7 billion.

The reports are filed on a study-area basis and include financial and operational data on revenues, expenses, investment, access lines and minutes of use.

Information presented in these tables was received from 11 companies for 115 study areas representing all states except Alaska and representing the District of Columbia and the Commonwealth of Puerto Rico. Data for all tables are derived from the 2002 calendar-year submissions from the companies.

Detail may not match totals because of necessary rounding.

Detail and totals shown may not match detail or totals shown elsewhere in this publication or from sources which have similar data element names. Some of the reasons are:

1. The Commission's instructions to the companies as to which data sub-elements should be included when reporting a particular data element may vary among the different ARMIS reports.
2. Some companies may interpret the Commission's instructions differently.
3. Some companies may use different internal data bases to compile data for different ARMIS reports; e.g., Qwest includes data for Malheur Telephone Company in its 43-01 data submission for the company's Oregon study area; however, the company does not include data from Malheur in its 43-02 (ARMIS USOA report) data submission, which is aggregated at the total company level.
4. Some companies discover discrepancies and refile data for one ARMIS report but not another.

Both Commission and company personnel are working to detect and correct discrepancies in the data and to clarify the reporting requirements.

The eleven companies or groups of companies that filed ARMIS 43-01 data from which these tables were derived are:

#### Regional Bell Operating Companies

1. BellSouth Corporation
2. Qwest Corporation
3. SBC Communications Inc.
4. Verizon Communications Inc.

#### Mid-Sized Incumbent LECs

5. ALLTEL Subsidiaries
6. CenturyTel of Washington, Inc.
7. Cincinnati Bell Telephone Co.
8. Citizens Communications Company
9. Commonwealth Telephone Company
10. Roseville Telephone Company
11. Sprint Subsidiaries

## Statistics of Communications Common Carriers

### Notes for Tables 2.10 through 2.16

The total column reflects the operating results for each of the rows itemized in these tables, and it includes all regulated and nonregulated company operations for each row. These amounts are presented prior to separation between state and interstate jurisdictions.

Subtracting all non-regulated and adjustments from the total column gives the subject-to-separations column, which reflects that portion of each row that must be allocated between state and interstate jurisdictions pursuant to part 36 of the Commission's rules.

The state and interstate columns reflect the allocation of the amount in the subject-to-separations column into its state and interstate components pursuant to those rules. In some instances, the interstate column also reflects Commission-prescribed adjustments made after the separations process. These adjustments are made only at the interstate level; consequently, the state and interstate columns may not necessarily add up to the subject-to-separations column.

All the remaining columns concern the further sub-division of the interstate column amount into various elements pursuant to part 69 of the Commission's rules.

The common line access element columns reflect costs that are recovered through subscriber line charges and a carrier common line charge assessed upon all interexchange carriers that use local exchange common line facilities for the provision of interstate or foreign telecommunications services.

The traffic-sensitive access element columns reflect costs associated with traffic-sensitive plant engineered to handle the anticipated volume of calls. The switching column reflects that portion of each row associated with the connection of toll lines, or toll lines to local central offices, exclusive of equal access costs if the exchange carrier has a separate equal access element. The transport column reflects that portion of each line item applicable to charges assessed upon all interexchange carriers who use switching or transport facilities that are apportioned to the transport element or elements for purposes of apportioning net investment. The total traffic sensitive column includes information charges that are assessed upon all interexchange carriers that are connected to assistance boards through interexchange directory assistance trunks.

The special access column reflects that portion of each row applicable to the total of all sub-elements that have been established for the use of equipment or facilities assigned to the special access element for purposes of apportioning net investment.

The total access column reflects the sum of the common line total column, the traffic-sensitive total column, and the special access column.

The billing and collection column reflects that portion of each row applicable to billing and collection services.

The interexchange column reflects that portion of each row applicable to interexchange services.

The mid-sized LECs do not file rows 1340, 1350, and 1360 in Tables 2.9 and 2.10.

The mid-sized LECs do not file rows 1410, 1420, 1490, and 1590 for taxes, but file row 1595, federal, state, and other. This is reflected in Tables 2.9, 2.10, and 2.13.

## Statistics of Communications Common Carriers

### Notes for Table 2.17

#### **Billable Access Lines**

Figures for billable access lines reported in the ARMIS 43-01 report for some companies are slightly different from figures for switched access lines reported in the ARMIS 43-08 report for a variety of reasons, including different reporting requirements, the interpretation of those requirements by the various companies, and the methods different companies use to calculate the number of lines. The majority of the differences come from the fact that WATS, WATS-like, and derived ISDN channels are not treated as billable access lines in the ARMIS 43-01, but are included in the count of access lines in the ARMIS 43-08. Some companies may have included company official lines in their ARMIS 43-08 report.

Definitions of the billable access columns in the table follow:

1. Residence lifeline - customer premises terminations (CPTs) for which the residence interstate subscriber line charge is reduced or waived. A CPT is a line termination at the customer premise, rather than at the central office. CPTs are commonly referred to as billable units.
2. Residence non-lifeline - CPTs subject to the residence interstate subscriber line charge excluding lifeline CPTs.
3. Business single line - CPTs subject to the single-line business interstate subscriber line charge, excluding company official, mobile radiotelephone and public telephones.
4. Business multiline - CPTs subject to the multiline business interstate subscriber line charge, including multiline semi-public lines, PBX trunks, Centrex CU trunks, hotel/motel LD trunks and Centrex CO lines.
5. Special access - lines subject to a \$25 surcharge. The surcharge applies to lines connecting two customer premise locations, one of which is a PBX that may connect to the public switched network.
6. Total billable access lines - the sum of the aforementioned five columns of data.

#### **Traffic-Sensitive Minutes of Use**

Total premium traffic-sensitive MOU are calculated by dividing adjusted premium line termination revenues by the line termination rate, calculated pursuant to section 69.205 of the FCC rules.

Total non-premium traffic-sensitive MOU are calculated by dividing the adjusted non-premium traffic-sensitive line termination revenues by the product of the line termination rate and 0.45, calculated pursuant to section 69.113 of the FCC rules.

Notes for Tables 3.1 through 3.3.

Data shown were combined from reports submitted to the FCC by international carriers pursuant to section 43.61(a) of the Commission's rules and regulations. Detail may not add to totals due to rounding.

The data are for all U.S. points. The total for U.S. points shown in the tables represents not only the total traffic between the domestic United States (the conterminous U.S., Alaska, Hawaii and Puerto Rico) and other U.S. points (American Samoa, Guam, the Northern Mariana Islands, Wake Island, and the U.S. Virgin Islands), but also, the total traffic between other U.S. points.

In Table 3.1, figures between -500 and 0 are denoted (\*). Figures between 0 and 500 are denoted \*.

Data for individual United States points (including small points such as American Samoa, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands), and data for individual carriers, are included in the *Section 43.61 International Telecommunications Data* report, published annually by the Industry Analysis and Technology Division of the FCC's Wireline Competition Bureau.

Carriers have requested confidential treatment for transiting minutes by country.

Carriers report the number of leased circuits as of year end and the number of 64 kilobits per second (64 Kbps) equivalent bearer circuits.

## Statistics of Communications Common Carriers

### Notes for Table 3.4

**The following carriers submitted reports with no international messages, minutes or billed revenues for calendar year 2001:**

Arizona Dialtone, Inc.	Leaco Cellular d/b/a Leaco
Arrival Communications, Inc.	Long Distance Wholesale Club
B&B TransAtlantic Ocean Cable, Inc.	Louisa Communications LC
BAK Communications, LLC	Madison County Telephone, Inc.
BBH Corp.	Max-Tel Communications, Inc.
BellSouth BSE, Inc.	MetroPCS, Inc.
CenturyTel Telecommunications, Inc.	MidlandsNet LLC d/b/a WesTel Systems
Communications Buying Group, Inc.	North by NortheastCom, LLC
Communications Design, Inc.	Ntera, Inc.
Cypress Communications Operating Co., Inc.	NTWS Digital Broadband Inc.
Direct One, Inc.	Pembroke Advanced Communications, Inc.
Doylestown Communications, Inc.	PT-1 Communications, Inc.
DSLnet Communications, LLC	Resort Network Services, LLC
EagleCom, Inc. d/b/a PTSI Long Distance	RRV Enterprises, Inc.
Eight 9 Line, LLC	Satellink Paging, LLC
Ernest Communications, Inc.	SNET Diversified Group, Inc.
Farmers Mutual Telephone Company	Telmatch Telecommunications
Globalcom, Inc.	TELMEX USA, LLC
GTC, Inc.	The Ultimate Connection, L.C. d/b/a DayStar Comm.
Hargray of Georgia, Inc.	TREX Communications, Inc.
ITXC Data Transport Services, LLC	Universal Access, Inc.
International Exchange Communications, Inc.	Universal Telecom
	Webshoppe Communications, Inc.

**Traffic Arrangements: U.S. carriers use the following types of arrangements to govern the exchange of traffic between themselves and foreign carriers.**

- 1/ Traditional - Traffic settled according to the Commission's International Settlements Policy (ISP). The ISP requires that the U.S. carrier and its foreign correspondent share the accounting rate on a 50/50 basis. An accounting rate is part of a compensation agreement negotiated between a U.S. carrier and its foreign correspondent on a particular international route.
- 2/ ISR/Hubbed - International Simple Resale (ISR) refers to the provision of switched services over private lines, interconnected to the public switched network, between the United States and Commission-approved countries. Switched hubbing refers to the provision of switched services over interconnected private lines between the U.S. and an ISR-approved country in order to originate or terminate U.S. traffic in a third country. See 47 C.F.R. section 63.17.

**The following companies' section 43.61(a) international telecommunications traffic reports were combined because of mergers, acquisitions, and changes in corporate structure:**

- 3/ Adelphia Business Solutions of Illinois, New Hampshire, New Jersey, and Ohio merged into Adelphia Business Solutions Operations, Inc. Adelphia Business Solutions of New York, Inc. merged into ACC Telecommunications, Inc.
- 4/ ALLTEL Communications, Inc.'s calendar year 2001 section 43.61(a) includes information for 360 Long Distance, Inc.
- 5/ AT&T Wireless (AWS) and its subsidiaries' section 43.61(a) information is included in the information submitted by AT&T Corp. for calendar year January 1, 2001 thru July 8, 2001. On July 9, 2001, AWS became a publicly-held corporation.
- 6/ Baca Valley Telephone Company, Inc. submitted its calendar year 2000 section 43.61(a) as Sierra Communications, Inc.
- 7/ On June 5, 2001, I-Link purchased the assets of WorldxChange out of bankruptcy and started a new company by the name of WorldxChange Corp. World Access is no longer affiliated with WorldxChange. When the new company was formed, it discontinued its international facilities-based/facilities-resale services. The company currently provides pure resale international services.
- 8/ Cass Long Distance, Inc. filed its calendar year 2001 section 43.61(a) as Cass Long Distance Service, Inc.
- 9/ Cellco Partnership d/b/a Verizon Wireless' calendar year 2001 section 43.61(a) submission includes GTE Railfone Inc. GTE Railfone Inc. is a joint venture between Verizon Wireless and Amtrak.
- 10/ Coin Telecom Inc. submitted its calendar year 2001 section 43.61(a) as St. John Telephone Company.
- 11/ Communications Design, Inc. sold its toll service to Communications Design Acquisition Corporation in October, 2001.
- 12/ Council Grove Telephone Company, Inc. was unable to retrieve section 43.61(a) billing information for February, 2001.
- 13/ CruisePhone Inc. filed for Chapter 11 bankruptcy protection in the Eastern District of the New York United States Bankruptcy Court on November 30, 1999. On May 4, 2000, CruisePhone sold its assets and contract to Maritime Telecommunications Network of Mirimar, Florida. As of May 31, 2000, CruisePhone ceased providing telecommunications services to customers.
- 14/ D & E/Omnipoint Wireless Joint Venture, L.P., d/b/a PCS One sold its assets to VoiceStream Wireless Corporation.
- 15/ Daviess-Martin RTC Telecommunications filed its calendar year 2001 section 43.61(a) as RTC Communications.
- 16/ Direct Communications Long Distance submitted its calendar year 2001 section 43.61(a) as Direct Communications Rockland, Inc.
- 17/ Easton Telecom Services' assets were purchased by Weston Telecommunications, L.L.C.

## Statistics of Communications Common Carriers

### Notes for Table 3.4 -- Continued

- 18/ Intetech, L.C. filed section 43.61(a) information for January 01, 2001 thru September 31, 2001. Its assets after October 1, 2001, were sold to Campus Communications Group, Inc. All revenues billed after that date are reported by Campus Communications Group, Inc.
- 19/ FedEx Internet Technologies Corporation's international private line circuits were idle for the entire calendar year 2001.
- 20/ Fiber Four Corporation's long distance service has been moved to Rock Port Long Distance.
- 21/ Global Crossing Telecommunications' calendar year 2001 section 43.61(a) submission includes all the international traffic for the following Global Crossing companies:
  - Global Crossing North American Networks, Inc.
  - Global Crossing Telemanagement, Inc.
  - Global Crossing Bandwidth, Inc.
- 22/ Grand River Communications, Inc. and Grand River Mutual Telephone Corporation merged. A calendar year 2001 section 43.61(a) was submitted for Grand River Mutual Telephone Corporation.
- 23/ GTC Telecom Inc. filed its calendar year 2001 section 43.61(a) as GTC Telecom Corp.
- 24/ Hertz Technologies, Inc. discontinued service in calendar year 2001.
- 25/ HTC Communications Co. - Harrisonville Telephone Co. filed its calendar year 2001 section 43.61(a) as HTC Communications Co.
- 26/ Infonet Broadband Services Corporation has determined that it provided international enhanced services only, did not operate as a common carrier, and therefore, not required to file pursuant to section 43.61(a) of the Commission's rules.
- 27/ Intermedia Communications, Inc. was bought by WorldCom, Inc. July 1, 2001.
- 28/ Interpacket, Inc. d/b/a Verestar Networks, Inc.'s calendar year 2001 section 43.61(a) information is included in Verestar, Inc.
- 29/ Iridium LLC filed for Chapter 11 bankruptcy protection. Iridium North America stopped billing its customers on March 17, 2000 and turned off call processing completely on August 31, 2000.
- 30/ Japan Telecom America, Inc. discontinued providing international message telephone service on June 30, 2000. The company submitted a calendar year 2001 section 43.61(a) for international private line services.
- 31/ KPU Telecommunications' circuits were idle during calendar year 2001.
- 32/ Long Distance Wholesale Club did not provide any international telephone service during calendar year 2001.
- 33/ Martell Telecommunications d/b/a Tri-States Long Distance no longer provides any type of international service.
- 34/ Monroe Telephone Long Distance submitted its calendar year 2001 section 43.61(a) as Monroe Telephone Company.
- 35/ Motient Corporation's and TMI Corporation's Section 214 authorizations were granted to Mobile Satellite Ventures Subsidiary, LLC in November, 2001.
- 36/ Network Plus, Inc. filed for Chapter 11 bankruptcy protection in January, 2002. The company was bought by Broadview Networks, Inc.
- 37/ OmniCall, Inc. was bought by Talk.com, which in turn was bought by Talk America, Inc.
- 38/ Operator Communications Inc. (OCI), starting calendar year 2001, no longer provided international service to customers. Instead, OCI currently acts as an agent for an underlying U.S. carrier.
- 39/ Pacific Wireless Technologies, Inc. discontinued international service during calendar year 2001. Their licenses were transferred to Nextel Communications, Inc.
- 40/ Project Mutual Telephone Cooperative Association, Inc. filed its calendar year 2001 section 43.61(a) as Project Mutual Telephone.
- 41/ PT-1 Long Distance, Inc. filed its calendar year 2001 section 43.61(a) as PT-1 Communications, Inc.
- 42/ RSL COM USA filed for Chapter 11 bankruptcy protection in New York on March 16, 2001. The company sold all of its international facilities-based assets. RSL COM USA submitted only international pure resale services pursuant to section 43.61(a) of the Commission's rules for calendar year 2001.
- 43/ SelecTec, Inc.'s calendar year 2001 section 43.61(a) submission was filed as Citizens Telephone Cooperative.
- 44/ Sprint PCS' calendar year 2001 section 43.61(a) submission includes Sprint's Wireless Division which consists of:
  - PhillieCo, L.P.
  - SprintCom, Inc.
  - Sprint Spectrum Holding Company, L.P.
- 45/ Telecom New Zealand Communications (USA), Ltd. ceased all operations and carried no international traffic after the third quarter of year 2001.
- 46/ Telergy Network Services, Inc. filed for Chapter 11 bankruptcy protection in the northern district of New York on October 26, 2001.
- 47/ Trucom Corporation merged with Bridgecom International Inc. as of March 29, 2001.
- 48/ UniversalCom, Inc. became a wholly owned subsidiary of NewSouth Communications Corporation in July 2000. Universal ceased providing service 12/31/2000.
- 49/ Verizon Communications, Inc. discontinued their international packet switching services after August, 1999.
- 50/ Vonova Corporation (International Talk.com d/b/a Vonova Corporation) went out of business and sold its assets to Encore.
- 51/ Westphalia Communications, Inc. filed its calendar year 2001 section 43.61(a) as Westphalia Telephone Company.
- 52/ Yates City Long Distance, in calendar year 2001, merged with C-R Long Distance.

### The following companies changed names:

- 53/ Andrew Telecom, Inc., in November 2001, changed its name to AnTel Telecom, Inc.
- 54/ ATC Teleports became Verestar, Inc.
- 55/ Brantley Tel Long Distance, Inc. officially changed its name to BTC Long Distance, Inc.
- 56/ Communications 1 Network, Inc. was formerly known as Norway Rural Telephone Company.
- 57/ Covista, Inc. was formerly known as Totaltel, Inc.
- 58/ Deutsche Telekom, Inc., on December 1, 2001, changed its legal name to T-Systems USA, Inc.
- 59/ Dial-Thru, Inc. was formerly known as RDST, Inc.

## Statistics of Communications Common Carriers

### Notes for Table 3.4 -- Continued

- 60/ DirectLink of Oregon d/b/a DirectLink Long Distance changed its name to Canby Telephone Association d/b/a CTA Long Distance.
- 61/ E. Ritter Long Distance changed its name to Ritter Long Distance, Inc.
- 62/ eMeritus Communications, Inc. was formerly known as Teleglobe Business Solutions, Inc.
- 63/ GE American Communications, Inc. (GE Americom) changed its name to SES Americom, Inc. in November, 2001.
- 64/ Genesis Communications International, Inc. recently changed its name to Vicera Communications, Inc.
- 65/ Mail.com Business Messaging Services changed its name to EasyLink Services Corporation.
- 66/ One Call Communications, Inc. changed its name to OCMC, Inc. on January 31, 2001.
- 67/ SRT Communications, Inc. was formerly known as Souris River Telecommunications Co. d/b/a SRT Long Distance.
- 68/ T-Mobile USA, Inc. was formerly known as VoiceStream Wireless Corporation. VoiceStream Wireless Corp. changed its name on August 30, 2002. T-Mobile USA, Inc.'s calendar year 2001 section 43.61(a) submission contains combined information for both VoiceStream Wireless Corporation and PowerTel Inc.
- 69/ Taylor Communications Group, Inc. changed its name to Tex-Link Communications, Inc. in January, 2001.
- 70/ The Ultimate Connection, L.C. d/b/a DayStar Communications was formerly d/b/a TAPCO (The Alternative Phone Company).
- 71/ TXU Communications Telecom Services Company was formerly known as LCT Long Distance.
- 72/ VTel Long Distance, as a result of a corporate reorganization, changed its name to Vermont Telephone Company, Inc.

### The following companies requested confidential treatment pertaining to its calendar year 2001 section 43.61(a) submission:

Allegiance Telecom, Inc.	Equant Operations, Inc.
American Cellular Corporation	Global Naps, Inc.
AT&T Wireless Services, Inc.	Seren Innovations, Inc. d/b/a
BellSouth International Access, Inc.	Astound Broadband
BellSouth Long Distance, Inc.	Swisscom North America
BTNA - Communications Global Network	Tele Danmark USA, Inc.
Services Limited	Telecom New Zealand USA, Ltd.
Cbeyond Communications, LLC	Teleglobe USA Inc.
Codetel International Communications, Inc. (Verizon)	Telia International Carrier, Inc.
Comcast Business Communications d/b/a	TELUS Corporation, Inc. (Verizon)
Comcast Long Distance	United States Advanced Network, Inc.
Dobson Cellular Systems, Inc.	Verizon Select Services, Inc.

Note: Carriers provide pure resale services by switching traffic to (and reselling the switched services of) underlying U.S. carriers. The underlying carriers control the circuit that carries the traffic to the international point, arrange for termination of the traffic, and report the traffic on a country-by-country basis. Reporting underlying U.S. carriers' country-by-country data are available in the Industry Analysis and Technology Division's annual publication, *International Telecommunications Data*. The report can be downloaded from the FCC-State Link Internet site at <http://www.fcc.gov/wcb/iatd/stats.html>.

## Statistics of Communications Common Carriers

### Notes for Tables 3.7 through 3.12

Note: Some previously published data have been revised. "n.a." signifies data not available. "n.o." signifies service not offered. "\*" signifies an amount greater than 0 but less than a half million.

- 1/ Starting in 1991, data have been taken from the latest version of *Section 43.61 International Telecommunications Data* reports and represent traffic between all U.S. points and all international points, and include a small amount of traffic between domestic U.S. points and offshore U.S. points.
- 2/ The Herschfeld-Herfendahl Index (HHI) value for the market is based on the market shares for each entrant. A lower bound estimate is calculated using the share for the largest entrants only. An upper bound is calculated by imputing the shares of all other carriers to three equal-sized firms.
- 3/ End-user revenues are estimated as the total revenues for facilities-based and facilities-resale service plus 10% of pure resale revenues. The amounts for carriers other than the three largest are estimated as half of their total billed revenues. The amounts for the largest carriers are estimated as the balance of the total. For 2001, these assumptions produce data that are roughly consistent with data filed on FCC Form 499-A.
- 4/ Retained revenues shown for service that originates or terminates in the United States. These figures exclude revenues for calls that transit the United States. Retained revenues are calculated as revenues billed by U.S. carriers, less settlement amounts owed to foreign carriers for U.S. billed traffic, plus settlement amounts due to U.S. carriers for foreign-billed traffic.
- 5/ The annual rates of growth were estimated by fitting a log linear regression to data for the years indicated.
- 6/ For 1991, data are for the USSR. The 1992 figure includes traffic for the former Soviet republics.
- 7/ The accounting rates shown are for rates available to all carriers for traffic carried during the peak period. The peak period is defined in the accounting rate agreement, and varies by country. In addition to varying by time of day, some accounting rate agreements vary by volume of traffic. See annual *Section 43.61 International Telecommunications Data* reports for detailed descriptions of different traffic arrangements. Accounting rates typically are denominated in dollars, gold francs (G.F.), or Standard Drawing Rights (S.D.R.).
- 8/ Where more than one PTT connects with U.S. carriers, the table shows rates for the first carrier providing service. These include Korea Telecom in Korea, Kokusai Denshin Denwa in Japan, PLDT in the Philippines, CODETEL in the Dominican Republic, and British Telecom in the United Kingdom.
- 9/ Source: *IMTS Accounting Rates of the United States, 1985-2003*, International Bureau, September 2, 2003, available at <http://www.fcc.gov/ib>. The Commission has approved the provision of switched services over private lines interconnected to the public switched network, also known as International Simple Resale (ISR), between the United States and several countries that are denoted in the table. ISR permits U.S. carriers to conduct settlement transactions on a basis other than the traditional procedure that uses accounting rates.
- 10/ Accounting rates do not exist for service between Mexico and the United States. The average settlement rate per minute (ASPM), which is shown in the table, is an average of all the per-minute settlement rates in effect for service between the United States and Mexico. The settlement rate varies by service classification and the originating or terminating locations.
- 11/ No effective rate for years 2002 and 2003.

\* Beginning in 1984, excludes AT&T Communications and Alascom.

# Beginning in 1999, the figures in italics are for the large local exchange carriers for which detailed individual company data are presented in Table 2.8. The figures in roman type, which include plant data reported by the mid-sized carriers, are from Table 2.9.

See additional notes following this table.

## Statistics of Communications Common Carriers

### Notes to Tables 4.1 through 4.9

The historical data presented in these tables were compiled from previous editions of *Statistics of Communications Common Carriers* (SOCC), formerly known as *Statistics of the Communications Industry in the United States*. For the most part, the original data were gathered from the annual reports of Class A telephone carriers and, beginning in 1957, include the voluntary submissions of selected large telephone companies not subject to the Commission's reporting requirements.

Over the years, the number of carriers reporting to the Commission has varied because of mergers, carrier reclassification, and changes in the reporting criteria. In 1985, the annual operating revenue requirement for telephone carrier reporting was changed from \$1 million to \$100 million. As a result, twenty-one companies that had filed a report for 1984 were relieved of this requirement the following year. These carriers accounted for about \$440 million in total operating revenues in 1984, with two-thirds of them reporting less than \$20 million.

On Jan. 1, 1988, a revised Uniform System of Accounts (USOA) went into effect. As a result of these revisions, data submitted under the new rules may not be comparable on a one-to-one basis with data filed for previous years. In these tables, USOA account numbers are given for each column heading (where applicable). The three-digit numbers refer to Part 31 of the Commission's rules, whereas those with four digits refer to Part 32, the revised USOA that superseded Part 31.

In the 1995/96 edition of this publication, the 1995 data did not include AT&T Communications or Alascom (which had been acquired by AT&T Corp.) because the detailed reporting requirements for these carriers were eliminated after the Commission had decided that AT&T would no longer be considered a dominant carrier. In the 1996/1997 book, these tables were revised to exclude data for the aforementioned carriers for 1984 and subsequent years--the period since AT&T's divestiture of the Bell operating companies. (The double line in the year column of each table marks the time of divestiture, which was effective Jan. 1, 1984.) Therefore, the data for 1984 to the present are not comparable to the data for 1960-83. Historical data that include AT&T Communications and Alascom appear in the 1994/1995 and earlier editions of this publication.

Beginning with the reports filed for 1999, the Commission streamlined the reporting requirements for certain mid-sized incumbent local exchange carriers in Phase 1 of its Accounting Review Report and Order, 14 FCC Rcd 11396 (1999). Further streamlining was implemented by the FCC's Phase 2 Report and Order, 16 FCC Rcd 19911 (2001), which included the elimination of certain reporting requirements for mid-sized carriers. As a result of these changes, only the large carriers included in Table 2.8 of this publication continue to report much of the financial data that are presented in these historical tables. Such items are indicated by the figures in italics. Because of different data sources for 2001-2002 and prior years (1988-2000), the figures for all reporting carriers for these two periods are not strictly comparable; the differences, however, are for the most part relatively minor.

### Revenues

In Table 4.3, the toll private line revenue categories used for the 1960-87 period were introduced in the 1981 annual reports, and are not completely comparable to the categories listed in the reports for 1980 and prior years. The revenue breakdown before 1981 was as follows: telephone, teletypewriter, other telegraph, Telpak (beginning in 1961), program transmission - audio, program transmission - video, and other private line services.

- 1/ Effective Nov. 15, 1999, account 5010, public telephone revenues, was eliminated.
- 2/ In the 1957 through 1973 SOCC books, details of private line revenues were not totaled for carriers that had filed reports on a voluntary basis. In this tabulation, aggregate data for those carriers are included in the other services category of toll private line service revenues.
- 3/ In 1982 through 1987, some of the non-Bell companies did not provide a breakdown of their toll private line revenues. These revenues were reported as either voice-grade service revenues or other private line service revenues.
- 4/ Wide area toll service (WATS) began in 1961. During the 1961-75 period, some of the non-Bell companies included WATS revenues in their message toll service revenues. The WATS figures for 1961-65 include revenues for wide area data service, which was offered on a limited developmental basis during that period.
- 5/ Beginning in 1961, includes earth station revenues.
- 6/ For 2002, includes reserves recorded for MCI WorldCom.
- 7/ Includes revenue settlements (row 1050 of ARMIS 43-01 report).

### Expenses

- 1/ The plant specific operations expense accounts are used to record the expenses associated with particular kinds of telecommunications plant. For details, see expense accounts in Table 2.8.
- 2/ Beginning in 2001, other property, plant and equipment expenses (account 6510) are included with network operations expenses (account 6530).

## Statistics of Communications Common Carriers

### Notes to Tables 4.1 through 4.9 -- Continued

#### **Earnings**

- 1/ Net operating income for 1960-87 is after the addition and subtraction of rents from and for the lease of operating property from net operating revenues. Beginning in 1988, these rents are included in operating revenues and expenses.
- 2/ Beginning in 1970, net income is after extraordinary and delayed items. In earlier years, these items were charged or credited to retained earnings.
- 3/ The significant change in nonoperating income and expense and nonoperating taxes that occurred in 1993 is primarily attributable to business restructuring and the adoption of new accounting standards.

#### **Assets and Liabilities**

- 1/ Includes prepaid accounts.
- 2/ Includes miscellaneous physical property (account 103), which is reported as nonoperating plant (account 2006) under the revised USOA.
- 3/ Includes other jurisdictional assets (account 1500), which were not reported before 1988.
- 4/ In 1983, AT&T changed the par value of its common stock from \$16.67 to \$1 per share.

#### **Plant**

- 1/ During the 1960-84 period, detailed plant account data for those carriers that reported to the Commission on a voluntary basis were not included in the SOCC tabulations. Accordingly, the number of carriers included in this table for that period differs from the number included in Tables 4.1 through 4.8.
- 2/ In 1999, accounts 2114, 2115, and 2116 (special purpose vehicles, garage work equipment, and other work equipment, respectively) were combined into a single new account 2114, tools and other work equipment.
- 3/ Includes operator systems (account 2220).
- 4/ Includes satellite and earth station facilities (account 2231.1).
- 5/ Drop and block wires, formerly included in this column, are included in aerial wire (account 242.1), or buried cable (account 242.3), as appropriate.
- 6/ Prior to 1984, public telephone equipment was included in account 231, station apparatus.
- 7/ Account 262 includes PBX and station equipment installed for official company use. Under the new rules, such plant is included in account 2123, office equipment.
- 8/ Intrabuilding network cable was called "house cable" under the old rules and was included in the aerial cable account (242.1).
- 9/ Includes account 207, right-of-way, which was eliminated as a separate account effective Jan.1, 1960. From 1960 through 1987, right-of-way was included primarily in the appropriate outside plant account.
- 10/ Includes unclassified plant (reported in 1969, 1974, 1975, and 1984).
- 11/ Consists of capital leases (account 2681) and leasehold improvements (account 2682). Beginning in 2001, includes intangibles (account 2690).
- 12/ Beginning in 2001, included with amortizable tangible assets (account 2680).
- 13/ Under the revised USOA, satellite earth stations are included in central office transmission facilities.
- 14/ Beginning in 1995, the distinction between short-term and long-term plant under construction was eliminated. Account 2003 now comprises total plant under construction; account 2004 was deleted.

NA - Not available.

Source: These historical statistics were compiled from previous editions of *Statistics of Communications Common Carriers*. Totals may be understated because certain data pertaining to the carriers included in this table are not available.

Note: Between 1987 and 1988, there were significant changes in the definitions of many of the items in this table. With the implementation of a new Uniform System of Accounts (USOA) in 1988, as indicated in the notes to Tables 4.1 - 4.9, new categories of reporting units of physical plant and network usage were created and defined. In 1992, some of these definitions were further refined when the reporting mechanism of the carriers was changed for the filing of 1991 data. For these reasons, there may be inconsistencies in the data reported for 1984-1987 compared to what was reported for 1988, and also between 1988 and subsequent years, as the carriers were adapting to the new USOA and automated reporting requirements.

1/ For 1988-1990, miles were converted to kilometers by multiplying the number of miles by 1.6093 and rounding to the nearest whole number.

2/ Beginning in 2001, employee and compensation figures (shown in italics) are for the Bell operating companies only.

3/ Before 1997, referred to as sheath kilometers of copper cable.

1/ Includes loops owned by Verizon/GTE and SBC Communications, Inc./Southern New England Telephone Co. Woodbury Telephone Company of Connecticut, a subsidiary of SBC, has 25,634 loops and Verizon of the Northern Mariana Islands has 22,206 loops that are not included in the total. These loops are included in the category "All Other Local Exchange Companies."

Note: USF loops are subscriber or common lines that are jointly used for local exchange service and exchange access for state and interstate interexchange services.

Source: Data filed periodically by the National Exchange Carrier Association pursuant to Part 36.

2001	1.6	1.3	4.5	-2.0	-1.7	2.5	0.2	-9.2
2002	2.4	0.2	5.3	-5.9	-6.1	1.5	0.4	-9.0

Note: The CPI for all items measures the impact of inflation on consumers. The CPI index of all telephone services is based on a "market basket" intended to represent the telephone related expenditures of a typical urban household. It includes both local and long distance services. The CPI index of local telephone charges is based on monthly service charges, message unit charges, leased equipment, installation, enhanced services (such as tone dialing and call waiting), taxes, subscriber line charges, and all other consumer expenditures associated with telephone services except long distance charges. In contrast, the PPI index of local residential services is based only on service charges for residential service, optional touch-tone service, and subscriber line charges. The PPI telephone indexes were revised in July 1995. Index values after July 1995 are not comparable to index values published from 1972 through July 1995.

NA - Not available.

\* The CPI telephone service index was revised in December of 1997.

1/ Due to month-to-month variation in the new PPI index, PPI price levels are determined using a five-month weighted average.

## Statistics of Communications Common Carriers

**Table 5.6 - Average Residential Rates for Local Service in Urban Areas, 1992-2002  
(As of October 15)**

	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001	2002

NA - Not Available.

1/ Rates are based on flat-rate service where available, and measured/message service with 100 hundred five-minute, same-zone, business-day calls elsewhere. As of 2001, all 95 cities surveyed offered flat-rate residential service, which made measuring the cost of such calls unnecessary.

digit codes in the format XXXX, where X is any digit from 0 through 9. Entities connect their facilities to access providers' facilities using several different access arrangements, the common ones being Feature Group B (FGB) and Feature Group D (FGD).

1/ Conversion from 2-digit to 3-digit codes.

2/ Conversion from 3-digit to 4-digit codes.

3/ Includes both 3-digit and 4-digit codes.

NA - Not applicable.

\* Toll-free (800) service was initially offered by AT&T in 1967. On May 3, 1993, procedures for routing toll-free calls were changed and 800 numbers were made "portable" so customers who switched service providers could retain their numbers. Due to the growth in toll-free numbers, a new toll-free calling code, 888, was added in March 1996, which made it possible to assign about 8 million new toll-free numbers. A third toll-free calling code, 877, was added in April 1998; and a fourth toll-free code, 866, was added in July 2000.

1/ Miscellaneous numbers include those in the 800, 888, 877, and 866 service management systems maintained by Database Service Management, Inc., and categorized as reserved, assigned but not yet activated, recently disconnected, or suspended.

## Statistics of Communications Common Carriers

Note: Detail may not add to totals due to rounding

- 1/ TRS filers generally reported pay telephone revenues as local service revenues, access revenues or operator toll revenues. The Universal Service and FCC Form 499-worksheets contain a separate category for payphone coin revenues. Starting in 1997, payphone revenues include payphone compensation received from toll carrier
- 2/ TRS Worksheet filers generally reported special access revenues as access revenues. Reporting changes implemented with the Universal Service Worksheet explain increase in local private line revenues and the fall in access revenues shown for 1997. TRS Worksheet filers included subscriber line charges with other access charge. These have been separated by assuming that the end-user access revenues in Table 4.2 of *Statistics of Communications Common Carriers* represents 93% of industry total subscriber line charge revenues. Universal Service Worksheet filers report subscriber line charges in a separate category. The increase from 1997 to 1998 represents PIC charges levied by ILECs as well as \$1.2 billion of PICC pass-through charges levied by toll carrier
- 3/ Significant amounts of enhanced services, billing and collection, CPE and other non-telecommunications revenues were reported in the TRS mobile and other local service categories through 1996. Universal Service Worksheet filers report these revenues in the non-telecommunications category. For prior years, the amounts of non-telecommunications revenues reported as mobile and other local revenues were estimated as 70% of the amounts that Tier 1 ILECs reported in ARMIS as miscellaneous and nonregulated revenues (currently account 5200 + account 5280) and 10% of amounts reported as mobile service revenue
- 4/ Charges on end-user bills identified as recovering state or federal universal service contributions are reported separately from local, wireless and toll revenues. Report amounts are apportioned between local, wireless and toll service based on the proportions of local, wireless and toll intrastate and interstate revenues by type of carrier

Non-Telecommunications Revenues in Prior-Year Data 2/	(6,944)	(7,518)	(8,324)	(9,071)	(10,474)						
Other Adjustments 3/	(248)	2,693	(461)	280	187	0	0	0	0	0	0
Total Telecommunications Revenues	\$153,409	\$165,342	\$174,890	\$190,076	\$211,782	\$231,168	\$246,392	\$268,505	\$292,762	\$301,799	\$292,341

1/ Filers are asked to select for themselves a service provider category that best describes their operations. The choices have changed over the years. For example, most satellite service providers identified themselves as other toll carriers in their 1997 Form 431 TRS worksheets because that worksheet did not contain a separate category for satellite service providers.

2/ Significant amounts of enhanced service, billing and collection, CPE and other non-telecommunications revenues were reported on TRS worksheets by incumbent local exchange carriers (ILECs) and wireless carriers through 1996. Universal Service Worksheet filers report these revenues in the non-telecommunications category. For prior years, the amounts of non-telecommunications revenues reported as mobile and other local revenues were estimated as 70% of the amounts that Tier 1 ILECs reported in ARMIS as miscellaneous and nonregulated revenues (currently account 5200 + account 5280) and 10% of amounts reported as mobile service revenues.

3/ Other adjustments include some amounts withheld to preserve confidentiality and revisions made after the initial publication of the data.

Total: Toll Service Providers	323	321	366	453	587	569	647	651	808	940	1,072	1,089
All Filers	2,558	2,709	2,847	3,058	3,832	3,604	4,121	4,486	4,879	5,001	5,364	4,748

- 1/ Starting in 1993, filers have been asked to select for themselves a service provider category that best describes their operations. The choices have changed over the years; for example, most satellite service providers identified themselves as other toll carriers in their 1997 TRS worksheets because that worksheet did not contain a separate category for satellite service providers.
- 2/ Counts through 2002 are based on the numbers of filers actually reporting revenues. Due to changes in the Commission's rules, it is now permissible, under certain conditions, for telecommunications providers to file summary worksheets that cover related legal entities. The preliminary 2003 counts include all entities that filed an FCC Form 499-A by October 22, 2003. This group comprises entities that offered telecommunications service in 2002 and new filers during 2003. These figures may double count some firms that have been bought, sold or merged during the year and includes some firms that were not yet providing service in 2003. For the number of filers for 2002, one consolidated filing took the place of 76 filings from individual entities. For the number of filers for 2003, 22 consolidated filings replaced the filings of 436 individual legal entities. Therefore, changes in the number of filers over time can be attributed to consolidated filing as well as other factors.
- 3/ Fewer incumbent local exchange carriers filed in 1998 than in 1997 because of consolidation of study areas.

## Statistics of Communications Common Carriers

### General Index 1. By Company

The company index that appeared in previous editions of this publication has been eliminated. The names of companies that provide domestic telecommunications services appear in the following tables: 1.1 through 1.4, 1.5 and 1.6 (the 3 largest interexchange carriers), 2.1, 2.6, and 2.8. Individual company statistical data and other information are presented in each of these tables.

For a listing of companies that provide international telecommunications services, see Table 3.4, general traffic information. The notes for this table list mergers, name changes, and other information regarding traffic reports filed by these carriers. See also Tables 3.5 through 3.9, each a subset of Table 3.4.
