Symantec AV Engine Release and Eraser Engine Update

Symantec has two new releases for the Anti-Virus (AV) Engine and the Eraser Engine. The AV Engine version 20071.2.0.18 scanning and repair component within the virus definitions, this release will provide improved detection and enhancements for future products releases. The Eraser Engine version 107.2.0.99 improves threat cleanup. The new releases will cause the size of the xdb file to temporarily increase.

DOI achieving a higher level on IT Hardware Contract

A Greener Tomorrow

For additional information on EO 13423

Contact Ms. Catherine Cesnik at (202) 208-7554

The Green DOI IT Hardware Contract makes DOI a government leader in meeting requirements under Executive Order 13423 “Strengthening Federal Environmental, Energy, and Transportation Management,” signed on January 24th, 2007.

The new EO has several requirements for electronics stewardship at purchase, maintenance and disposal, including are: annually, 95% of electronic products purchased must meet Electronic Product Environmental Assessment Tool standards where applicable; enable Energy Star® features on 100% of computers and monitors; and reuse, donate, sell, or recycle 100% of electronic products using environmentally sound management practices.

DOI is well on its way to meeting the 95% purchasing goal thanks to the proactive DOI IT Hardware Contract team. The team was an early adopter of the Electronic Product Environmental Assessment Tool, using it to green the DOI-wide, mandatory source contract.

Do you know about MS Software Assurance E-Learning?

Microsoft E-Learning is part of the DOI Microsoft Enterprise Licensing Agreement and is designed to provide maximum learning in minimal time. These courses offer a visually engaging, guided learning experience with highly interactive features, including user-selected learning style, assessments, rich simulations, hands-on labs for practice, audio, and multimedia. With the Microsoft Software Assurance E-Learning benefit, you get accurate, relevant, and engaging learning on Microsoft technologies direct from the source. The courses include operating systems, applications, servers, etc.

Official Microsoft E-Learning is delivered through Microsoft E-Learning Online. No need to deploy, manage, update, or host courses—Microsoft will do it for you. With Microsoft E-Learning Online, you get the added benefit of hands-on virtual lab technology that enables IT professionals to get real experience without the risk.

For additional information, contact your Bureau Software Assurance Benefit Administrator.
