DEPARTMENT OF EDUCATION

[CFDA No.: 84.317]

Comprehensive Local Reform Assistance; Notice Inviting Applications From Local Educational Agencies (LEAs) in Montana and Oklahoma for New Awards With Fiscal Year (FY) 1999 and FY 2000 Funds Under the Goals 2000: Educate America Act

Note to Applicants: This notice is a complete application package. Together with the statute authorizing the program and the Education Department General Administrative Regulations (EDGAR), the notice contains all of the information, application requirements, and instructions needed to apply for a grant under this competition.

Purpose of Program: To assist local educational agencies (LEAs) in the development and implementation of comprehensive local improvement plans directed at enabling all children to reach challenging academic standards.

Eligible Applicants: LEAs in Oklahoma and Montana are eligible to apply for grants. The Secretary is especially interested in receiving applications from consortia of LEAs in each State.

LEAs or consortia of LEAs in Oklahoma and Montana that have previously received Goals 2000 funds are eligible to apply for funds under this competition. However, in order that other needy districts may benefit from Goals 2000 support, the Secretary is particularly interested in receiving applications from LEAs or consortia that have not previously received Goals 2000 funding.

Note: This competition, authorized by section 304(e) of the Goals 2000: Educate America Act, is only for LEAs in Oklahoma and Montana. LEAs in other States apply to their respective State educational agency for funds under Title III of Goals 2000.

Applications Available: February 15, 2000.

Deadline for Transmittal of Applications: March 15, 2000.

Deadline for Intergovernmental Review: May 14, 2000.

Available Funds: For LEAs in Oklahoma: \$5,410,428 in FY 1999; \$5,376,407 (estimated) in FY 2000; For LEAs in Montana: \$1,890,358 in FY 1999; \$1,878,472 (estimated) in FY 2000.

In the event that there are an insufficient number of funded applications to use all of either State's allotment, the Secretary may reallocate the remaining funds consistent with the Act.

The Secretary does not intend to conduct competitions for FY 2000 funds. Instead, pursuant to 34 CFR 75.253, the Secretary intends to make continuation awards from the FY 2000 allotments to each grantee that has made substantial progress toward meeting the objectives in its approved application.

Project Period: Up to 24 months.

Estimated Range of Awards: \$30,000–\$750,000 annually.

The sizes of the awards requested should be governed by the size of the LEA or consortium and the scope of the proposed project. The Secretary will consider each applicant's request and the needs of all successful applicants in determining the amount of each grant award. The Department of Education is not bound by the estimates in this notice.

Estimated Average Size of FY 1999 and FY 2000 Awards: \$109,000 annually.

Estimated Numbers of Awards: 40 in Oklahoma; 20 in Montana.

Note: Consistent with section 309(c) of the Goals 2000 Act, the Secretary will award at least 50 percent of each State's available allotment to LEAs that have a greater percentage or number of disadvantaged children than the statewide average percentages or numbers for all LEAs in each respective State. The Department may waive this provision if it does not receive a sufficient number of applications from such districts.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) as follows:

- (1) 34 CFR part 75 (Direct Grant Programs).
- (2) 34 CFR part 77 (Definitions that Apply to Department Regulations).
- (3) 34 CFR part 79 (Intergovernmental Review of Department of Education Programs and Activities).
- (4) 34 CFR part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments).
- (5) 34 CFR part 81 (General Education Provisions Act—Enforcement).
- (6) 34 CFR part 82 (New Restrictions on Lobbying).
- (7) 34 CFR part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)).

GEPA Section 427 Requirements: In preparing applications, LEAs should pay particular attention to the requirements in section 427 of the General Education Provisions Act (GEPA), as detailed later in this notice. Applicants must address the requirements in section 427 in order to

receive funding under this competition. Section 427 requires each applicant to describe the steps it proposes to take to address one or more barriers (i.e., gender, race, national origin, color, disability, or age) that can impede equitable access to, or participation in, the program. A restatement of compliance with civil rights requirements is not sufficient to meet the GEPA 427 requirements.

SUPPLEMENTARY INFORMATION:**(a) Background**

Section 304(e) of the Goals 2000: Educate America Act (Pub. L. 103–227) (20 U.S.C. 5801 *et seq.*) (the Act) authorizes the Secretary to award direct grants to LEAs in States that were not participating in Goals 2000 as of October 20, 1995, if the applicable SEA approves the LEAs' participation in the program. Oklahoma and Montana were not participating in Goals 2000 as of that date, and the Oklahoma and Montana SEAs have approved LEA participation in this direct grant program.

The Secretary has determined that grants awarded under section 304(e) will be used to support the development and implementation of comprehensive local improvement plans designed to help all children reach challenging academic standards. In particular, the Secretary encourages LEAs to address in their applications how their reform strategies might include enhanced preservice teacher education and professional development activities of educators that are directly connected to challenging standards.

Applicants that have already developed comprehensive improvement plans may propose activities funded through the grant that are aligned with and carry out parts of this plan. Where appropriate, LEAs should use funds awarded under this notice to build upon comprehensive reform strategies that have already been initiated with federal and other resources.

Application Requirements

The authorizing statute—section 304(e) of the Act—permits the Secretary to fund LEA applications that are consistent with the provisions of Goals 2000. Grants under this competition will support the development and implementation of comprehensive local improvement plans to help *all* students reach challenging academic standards. Local improvement plans that are developed or implemented with funds awarded under section 304(e) must be consistent with the requirements in sections 309(a)(3) (B) through (E) of the Act. Adapted to this direct grant

program, these requirements specify that local plans—

(1) Describe a process of broad-based community participation in the development, implementation, and evaluation of the local improvement plan;

(2) Address districtwide education improvement, directed at enabling all students to meet the State content standards and State student performance standards, including specific goals and benchmarks; reflect the priority of the State improvement plan (if there is a comprehensive State improvement plan) and include a strategy for—

(a) Improving teaching and learning, with strategies such as enhanced professional development and preservice education activities aligned to the standards;

(b) Improving governance, management, and accountability for performance; and

(c) Generating, maintaining, and strengthening parental and community involvement;

(3) Promote the flexibility of local schools in developing plans that address the particular needs of their school and community and are consistent with the local improvement plan; and

(4) Describe how the LEA will encourage and assist schools to develop and implement comprehensive school improvement plans that focus on helping all students reach State content standards and student performance standards.

An LEA that applies for funds under this program should indicate whether funds are being requested to (a) develop and implement a plan in accordance with the requirements of sections 309(a)(3) (B) through (E) of the Act; or (b) implement an existing comprehensive improvement plan that meets the requirements of sections 309(a)(3) (B) through (E) of the Act. (An applicant that received FY 1995 and 1996 funding or FY 1997 and 1998 funding under the previous two competitions must have completed the development of a plan that meets the stated requirements in order to be eligible for funding under this competition.)

An LEA seeking funds to both develop and implement a comprehensive plan must demonstrate evidence of a clear process that will result in a plan that meets the stated plan requirements. This evidence may include a description of how stakeholders will be involved in plan development and specific steps and timelines for developing the plan. Successful applicants will only be

eligible to receive FY 2000 continuation funding if they have completed development of a plan that meets the plan requirements stated above.

An LEA that has already developed a comprehensive improvement plan may seek FY 1999 and 2000 funds to implement the plan. The applicant must demonstrate that its existing plan meets the plan requirements listed above. The applicant may do this, for example, by providing a description of how its plan addresses these requirements and the progress the applicant has made in implementing its plan. In addition, the applicant may demonstrate the comprehensiveness of the plan by providing evidence that the plan is coordinated with other LEA plans that, collectively, provide a framework for how federal and other funds are used to achieve the goals and objectives of the district.

An applicant should clearly explain the strategies that will be funded under this award and how these strategies are aligned with the comprehensive plan.

The Secretary recommends that applicants reserve in their budgets approximately \$2,000 each year for activities that will be designed by the Secretary, in conjunction with grantees, to facilitate the sharing among grantees of information on successful comprehensive reform strategies.

PROTECTION OF HUMAN SUBJECTS IN RESEARCH (Attachment to ED 424)

I. Instructions to Applicants about the Narrative Information that Must be Provided if Research Activities Involving Human Subjects are Planned

If you marked item 12 on the application "Yes" and designated exemptions in 12a, (**all research activities are exempt**), provide sufficient information in the application to allow a determination that the designated exemptions are appropriate. Research involving human subjects that is exempt from the regulations is discussed under II.B. "Exemptions," below. The Narrative must be succinct. **Provide this information in an "Item 12/Protection of Human Subjects Attachment" and insert this attachment immediately following the ED 424 face page.**

If you marked "Yes" to item 12 on the face page, and designated no exemptions from the regulations (**some or all of the research activities are nonexempt**), address the following six points for each nonexempt activity. In addition, if research involving human subjects will take place at collaborating site(s) or other performance site(s), provide this information before discussing the six points. Although no specific page limitation applies to this section of the application, be succinct. Provide the six-point narrative and discussion of other performance sites in an "Item 12/Protection of Human Subjects Attachment" and insert this attachment immediately following the ED 424 face page.

(1) Provide a detailed description of the proposed involvement of human subjects. Describe the characteristics of the subject population, including their anticipated number, age range, and health status. Identify the criteria for inclusion or exclusion of any subpopulation. Explain the rationale for the involvement of special classes of subjects, such as children, children with disabilities, adults with disabilities, persons with mental disabilities, pregnant women, prisoners, institutionalized individuals, or others who are likely to be vulnerable.

(2) Identify the sources of research material obtained from individually identifiable living human subjects in the form of specimens, records, or data. Indicate whether the material or data will be obtained specifically for research purposes or whether use will be made of existing specimens, records, or data.

(3) Describe plans for the recruitment of subjects and the consent procedures to be followed. Include the cir-

cumstances under which consent will be sought and obtained, who will seek it, the nature of the information to be provided to prospective subjects, and the method of documenting consent. State if the Institutional Review Board (IRB) has authorized a modification or waiver of the elements of consent or the requirement for documentation of consent.

(4) Describe potential risks (physical, psychological, social, legal, or other) and assess their likelihood and seriousness. Where appropriate, describe alternative treatments and procedures that might be advantageous to the subjects.

(5) Describe the procedures for protecting against or minimizing potential risks, including risks to confidentiality, and assess their likely effectiveness. Where appropriate, discuss provisions for ensuring necessary medical or professional intervention in the event of adverse effects to the subjects. Also, where appropriate, describe the provisions for monitoring the data collected to ensure the safety of the subjects.

(6) Discuss why the risks to subjects are reasonable in relation to the anticipated benefits to subjects and in relation to the importance of the knowledge that may reasonably be expected to result.

II. Information on Research Activities Involving Human Subjects

A. Definitions.

A research activity involves human subjects if the activity is research, as defined in the Department's regulations, and the research activity will involve use of human subjects, as defined in the regulations.

—Is it a research activity?

The ED Regulations for the Protection of Human Subjects, Title 34, Code of Federal Regulations, Part 97, define research as "a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge." *If an activity follows a deliberate plan whose purpose is to develop or contribute to generalizable knowledge, such as an exploratory study or the collection of data to test a hypothesis, it is research.* Activities which meet this definition constitute research whether or not they are conducted or supported under a program which is considered research for other purposes. For example, some demonstration and service programs may include research activities.

—Is it a human subject?

The regulations define human subject as “a living individual about whom an investigator (whether professional or student) conducting research obtains (1) data through intervention or interaction with the individual, or (2) identifiable private information.” (1) *If an activity involves obtaining information about a living person by manipulating that person or that person’s environment, as might occur when a new instructional technique is tested, or by communicating or interacting with the individual, as occurs with surveys and interviews, the definition of human subject is met.* (2) *If an activity involves obtaining private information about a living person in such a way that the information can be linked to that individual (the identity of the subject is or may be readily determined by the investigator or associated with the information), the definition of human subject is met.* [Private information includes information about behavior that occurs in a context in which an individual can reasonably expect that no observation or recording is taking place, and information which has been provided for specific purposes by an individual and which the individual can reasonably expect will not be made public (for example, a school health record).]

B. Exemptions.

Research activities in which the only involvement of human subjects will be in one or more of the following six categories of *exemptions* are not covered by the regulations:

(1) Research conducted in established or commonly accepted educational settings, involving normal educational practices, such as (a) research on regular and special education instructional strategies, or (b) research on the effectiveness of or the comparison among instructional techniques, curricula, or classroom management methods.

(2) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior, unless: (a) information obtained is recorded in such a manner that human subjects can be identified, directly or through identifiers linked to the subjects; and (b) any disclosure of the human subjects’ responses outside the research could reasonably place the subjects at risk of criminal or civil liability or be damaging to the subjects’ financial standing, employability, or reputation. *If the subjects are children, this exemption applies only to research involving educational tests or observations of pub-*

lic behavior when the investigator(s) do not participate in the activities being observed. [Children are defined as persons who have not attained the legal age for consent to treatments or procedures involved in the research, under the applicable law or jurisdiction in which the research will be conducted.]

(3) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior that is not exempt under section (2) above, if the human subjects are elected or appointed public officials or candidates for public office; or federal statute(s) require(s) without exception that the confidentiality of the personally identifiable information will be maintained throughout the research and thereafter.

(4) Research involving the collection or study of existing data, documents, records, pathological specimens, or diagnostic specimens, if these sources are publicly available or if the information is recorded by the investigator in a manner that subjects cannot be identified, directly or through identifiers linked to the subjects.

(5) Research and demonstration projects which are conducted by or subject to the approval of department or agency heads, and which are designed to study, evaluate, or otherwise examine: (a) public benefit or service programs; (b) procedures for obtaining benefits or services under those programs; (c) possible changes in or alternatives to those programs or procedures; or (d) possible changes in methods or levels of payment for benefits or services under those programs.

(6) Taste and food quality evaluation and consumer acceptance studies, (a) if wholesome foods without additives are consumed or (b) if a food is consumed that contains a food ingredient at or below the level and for a use found to be safe, or agricultural chemical or environmental contaminant at or below the level found to be safe, by the Food and Drug Administration or approved by the Environmental Protection Agency or the Food Safety and Inspection Service of the U.S Department of Agriculture.

Notice to All Applicants

The purpose of this enclosure is to inform you about a new provision in the Department of Education's General Education Provisions Act (GEPA) that applies to applicants for new grant awards under Department programs. This provision is Section 427 of GEPA, enacted as part of the Improving America's Schools Act of 1994 (Pub. L. 103-382).

To Whom Does This Provision Apply?

Section 427 of GEPA affects applicants for new grant awards under this program. ALL APPLICANTS FOR NEW AWARDS MUST INCLUDE INFORMATION IN THEIR APPLICATIONS TO ADDRESS THIS NEW PROVISION IN ORDER TO RECEIVE FUNDING UNDER THIS PROGRAM.

(If this program is a State-formula grant program, a State needs to provide this description only for projects or activities that it carries out with funds reserved for State-level uses. In addition, local school districts or other eligible applicants that apply to the State for funding need to provide this description in their applications to the State for funding. The State would be responsible for ensuring that the school district or other local entity has submitted a

sufficient section 427 statement as described below.)

What Does This Provision Require?

Section 427 requires each applicant for funds (other than an individual person) to include in its application a description of the steps the applicant proposes to take to ensure equitable access to, and participation in, its Federally-assisted program for students, teachers, and other program beneficiaries with special needs. This provision allows applicants discretion in developing the required description. The statute highlights six types of barriers that can impede equitable access or participation: gender, race, national origin, color, disability, or age. Based on local circumstances, you should determine whether these or other barriers may prevent your students, teachers, etc. from such access or participation in, the Federally-funded project or activity. The description in your application of steps to be taken to overcome these barriers need not be lengthy; you may provide a clear and succinct description of how you plan to address those barriers that are applicable to your circumstances. In addition, the information may be provided in a single narrative, or, if appropriate, may be discussed in connection with related topics in the application.

Section 427 is not intended to duplicate the requirements of civil rights statutes, but rather to ensure that, in designing their projects, applicants for Federal funds address equity concerns that may affect the ability of certain potential beneficiaries to fully participate in the project and to achieve to high standards. Consistent with program requirements and its approved application, an applicant may use the Federal funds awarded to it to eliminate barriers it identifies.

What Are Examples of How an Applicant Might Satisfy the Requirement of This Provision?

The following examples may help illustrate how an applicant may comply with Section 427.

(1) An applicant that proposes to carry out an adult literacy project serving, among others, adults with limited English proficiency, might describe in its application how it intends to distribute a brochure about the proposed project to such potential participants in their native language.

(2) An applicant that proposes to develop instructional materials for classroom use might describe how it will make the materials available on

audio tape or in braille for students who are blind.

(3) An applicant that proposes to carry out a model science program for secondary students and is concerned that girls may be less likely than boys to enroll in the course, might indicate how it intends to conduct "outreach" efforts to girls, to encourage their enrollment.

We recognize that many applicants may already be implementing effective steps to ensure equity of access and participation in their grant programs, and we appreciate your cooperation in responding to the requirements of this provision.

Estimated Burden Statement for GEPA Requirements

The time required to complete this information collection is estimated to vary from 1 to 3 hours per response, with an average of 1.5 hours, including the time to review instructions, search existing data resources, gather and maintain the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: U.S. Department of Education, Washington, DC 20202-4651.

Paperwork Burden Statement

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. The valid OMB control number for this information collection is 1810-0594. The time required to complete this information collection is estimated to average 30 hours (or minutes) per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: U.S. Department of Education, Washington, DC 20202-4651. Instructions for Part III: Application Narrative

Before preparing the Application Narrative, an applicant should read carefully the description of the program, the background of the program, application requirements, and the selection criteria the Secretary will use to evaluate these applications.

The narrative should encompass each function or activity for which funds are being requested and should—

1. Begin with an Abstract that summarizes the proposed project;
2. Describe the proposed project in light of the application requirements and each of the selection criteria in the order in which the criteria are listed in the application; and
3. Include any other pertinent information that might assist the Secretary in reviewing the application.

The Secretary strongly requests the applicant to limit the Application Narrative to no more than 20 pages (double-spaced, typed on one-side only, using font no smaller than 11 point). The Department has found that successful applications for similar programs generally meet this page limit. In addition to the Application Narrative, the applicant must include the cover form (SF-424), budget forms and budget narrative, assurances, and a statement regarding how the application meets the requirements of GEPA 427. Any supplemental attachments should be limited to those that are crucial to supporting the integrity of the applicant's project and how it has met application requirements.

Performance Measures

The Government Performance and Results Act (GPRA) of 1993 places new management expectations and requirements on Federal departments and agencies by creating a framework for more effective planning, budgeting, program evaluation, and fiscal accountability for Federal programs. The intent of the Act is to improve public confidence by holding departments and agencies accountable for achieving program results. Departments must set program goals and objectives and measure and report on

their achievements. One important source of program information on successes and lessons learned is the project evaluation and other information collected under individual grants.

The U.S. Department of Education supports the GPRA initiative that all agencies be held accountable for program success and is committed to forging a partnership with grantees that will ensure accountability in the use of Goals 2000 funds. To assist grantees in the process of creating an instrument for evaluating program goals and achievements, the form titled "Performance Measures Template" is included in the application package. The Template identifies the key components for measuring performance (Performance Objective, Baseline, Source of Data, Outcome) and gives an example of each component. Applicants are encouraged to incorporate the components of the objectives described in their performance plans into the template; applicants may also use another similar format. It is important, however, that all applications are not only developed to achieve successful project outcomes, but that they also include a process to measure progress toward attaining those outcomes.

The performance measures will be used during the life of the grant to ensure that project outcomes are achieved. Progress will be assessed via regularly scheduled communication, which may include telephone calls, letters, and site visits, between Department staff and the project director. Where sufficient progress is not being achieved, the Department and the grantee will work together to identify strategies and resources to overcome challenges and resolve problems. When necessary, the Department and the grantee may modify the performance measures.

Teacher Training: As a result of providing training to all teachers regarding the use of test data to make instructional decisions, by the conclusion of the 1999–2000 school year, 75% of teachers in the district in the elementary grades will be proficient in using test data to inform instruction.	A survey of teachers will be made to assess teacher proficiency in using test data to inform decisions about instruction; teachers' lesson plans will be examined for evidence of test data driven instruction; and school administrators will observe the implementation of such instruction in the classroom.	25% of district elementary teachers surveyed in 1998 reported that they were proficient in using test data to inform instructional decision making.	At least 75% of teachers will provide instruction, as indicated in their lesson plans, that has been differentiated according to student proficiency revealed in the test data.

Goals 2000 Comprehensive Local Reform Assistance Q & A

Introduction

The following questions and answers have been prepared to assist local educational agencies (LEAs) as they apply for and use funds available under Goals 2000, and as they develop and implement their local comprehensive improvement plans. This guidance should be read as a supplement to the Application Notice, and does not replace any of the information contained in the Notice. Please read the Notice carefully to ensure that your application addresses all requirements.

In 1994, the Goals 2000: Educate America Act was signed into law. The purpose of the Act is "to improve the quality of education for all students by improving student learning through a long-term, broad-based effort to promote coherent and coordinated improvements in the system of education throughout the Nation at the State and local levels." Through Title III of this Act, states receive funding to develop and implement comprehensive plans for improving education and provide subgrants to districts to develop and implement plans that are coordinated with the state plan. In 1995, the states of Montana and Oklahoma elected to not participate in Goals 2000.

On April 26, 1996, the President signed into law the Omnibus Consolidated Rescissions and Appropriations Act of 1996, which amended portions of Titles II and III of the Goals 2000: Educate America Act. Under the Goals 2000 amendments, LEAs in a state that was not participating in Goals 2000 as of October 25, 1995 may apply directly to the Department for a portion of their state's Goals 2000 allotment, if the state educational agency (SEA) approves participation of its LEAs in the program. The Montana and Oklahoma SEAs have allowed their LEAs to participate in the competition for funding. The grants will be made for a two-year period.

Application Facts

- Who is eligible to apply for funding?

Eligible applicants are LEAs as defined in Section 14101(18) of the Elementary and Secondary Education Act of 1965. In general, if an agency is defined as an LEA for funding purposes, it meets the requirement of eligibility for this federal grant competition.

- How do eligible LEAs apply for funding?

The Secretary has published a notice in the **Federal Register** inviting applications from LEAs in Montana and Oklahoma. The application deadline for the grant awards is as announced in the **Federal Register**. The grant selection criteria and application requirements are detailed in the notice. Funds will be awarded on a competitive basis for the development and implementation of comprehensive local improvement plans, or implementation of existing plans, designed to enable all children to reach challenging academic standards.

- How much funding is available for awards?

For LEAs in Oklahoma, the amounts available from the State's FY 1999 and 2000 allotments are \$5,410,428 and \$5,376,407 (estimated), respectively. For LEAs in Montana, the amounts are \$1,890,358 and \$1,878,472 (estimated).

- How much funding can applicants request?

Included in the notice is an estimate of how many awards could be made with an estimated average award amount. These are only estimates.

The funding range provided is based on the allocations made to Montana and Oklahoma Goals 2000 grantees in the most recent competition (1998). The amount of funding an applicant requests should be related to factors such as the number of students in the district(s), the number of students in poverty or otherwise educationally disadvantaged in the district(s), the needs and proposed activities of the district in terms of implementing comprehensive standards-based reform, the expected results of such activities, and other factors that create a higher need for

funds, such as high mobility of the student population and extreme isolation from other resources. Please understand that the funding provided is not for the purpose of implementing a district's entire comprehensive improvement plan. Rather, the funding is coordinated with other Federal, State, and local resources to enable the district to implement an aligned, standards-based reform plan that is designed to raise the achievement levels of all students and simultaneously narrow the gap in achievement levels by different populations within the district.

- How long should the application be?

As stated in the notice, the application narrative should not exceed 20 pages in length. Attachments, other than those that are required, should be kept to only those that are essential.

- How long will it take for the Department to review the application? Who will review the applications and how will they be reviewed? When will the awards be made?

The deadline for applications is the date announced in the **Federal Register**. A period of approximately two months is then needed to process the applications, conduct a peer review, and make funding decisions. The applications will be reviewed by individuals from states and districts that are familiar with the purpose of Goals 2000 grants. They will score the applications based on the seven selection criteria described in the application notice. It is anticipated that awards will be made in early June.

- What are the reporting requirements? What are the future oversight activities by the federal government for successful applicants?

LEAs are required to submit an annual report each year describing their activities and accomplishments. This information must demonstrate that the LEA is making substantial progress towards achieving its goals and objectives in order to receive second year funding. Applicants that needed to complete development of a local comprehensive improvement plan in

order to meet the requirements (as noted in the application) for such plan must have a plan that meets the requirements before receiving second year funds.

In addition to report requirements, Department staff may call, visit, and/or convene multiple grantees to facilitate the use of best practices, learn what strategies are working and aren't working, and verify that the grant is being implemented according to the application. The applicant is subject to a financial audit, as is the case with any grant of federal funds.

- Will new applicants be given a competitive preference over applicants that previously received Goals 2000 funding?

No. However, the Secretary is particularly interested in receiving applications from LEAs that have not previously received Goals 2000 funding. An applicant may not receive funding to develop a local comprehensive plan for more than one year. Therefore, applicants that have previously received Goals 2000 funds must have developed the required local comprehensive plan in order to be eligible for funding in this competition. Other applicants can be funded to develop and then implement plans that meet the plan requirements.

Writing the Application

- In the application notice, there is the requirement that local comprehensive plans "address districtwide education improvement, directed at enabling all students to meet the State content standards and State student performance standards, including specific goals and benchmarks; reflect the priority of the State improvement plan (if there is a comprehensive State improvement plan)." What does this requirement mean within the particular contexts of Montana and Oklahoma?

Montana

The Office of Public Instruction (OPI) is implementing a statewide initiative for school improvement in Montana. This initiative lays out a framework for how the SEA will support districts and schools as they further student learning. The plan consists of five elements: Standards, Accreditation, Assessment, Education Profile, and Professional Development/Teacher Certification. Applicants should be aware of and align with the efforts that the State is taking within each of these project components, where appropriate. The State has informed us that as part of the standards work, the Montana Board of Public Education and OPI, in partnership with various educational organizations, has developed content

and performance standards in Reading, Mathematics, World Language, Technology, Science, Writing, Health Enhancement, Speaking and Listening, Media Literacy, and Literature. The Board of Education is currently revising and preparing content and performance standards in Social Science, Workplace Competencies, and Library.

Pursuant to the application requirement that districts address districtwide improvements to meet these standards and Rule 10.55.603 of the Montana Standards of Accreditation, OPI plans to provide guidance to districts to incorporate the new content and performance standards into the curriculum, establish curriculum and assessment development processes, and meet the other requirements of the State accreditation standards. In the comprehensive improvement plan required through Goals 2000, an applicant should include other strategies to implement the standards, such as through professional development activities that are aligned to the standards (see the application notice for the specific types of strategies that must be addressed in the plan). Strategies such as professional development are critical to helping teachers develop instructional approaches to assist students meet the standards, demonstrate exemplary performance that meets the standards, and use data to determine what instructional approaches are working. The funding available through Goals 2000 can assist districts to take these critical steps to implement the state standards.

Oklahoma

The State of Oklahoma requires all districts to develop a Comprehensive Local Education Plan (CLEP) to address school improvement. In their plans, districts review implementation of the state-mandated content standards, Priority Academic Student Skills (PASS), and state performance standards as measured through the Oklahoma School Testing Program (OSTP).

Districts should address school reform identified in their CLEP in the goals 2000 application and focus on implementation of district reform. While the CLEP forms the basis of a school improvement plan, it may not fully meet the application requirements contained in the notice. (See Application Requirements section.) For example, a plan developed under Goals 2000 by a school district would include strategies for improving governance and management. Additional materials would need to be provided by the

applicant to address those elements not included in the CLEP.

- How should the local comprehensive plan be related to planning requirements for all programs, federal, state, or local?

The comprehensive plan Goals 2000 supports should be the sole comprehensive plan for the district. It is not a plan for use of Goals 2000 funds; rather, it describes how the district intends to improve its schools, using all resources it has available. It is the district's framework for reform.

Other plans the district may have should fit in under the general comprehensive plan. For instance, most districts will have consolidated plans describing how they will use Federal funds provided by the programs included in the consolidation (or individual plans for each of the programs). These plans should describe how Federal funds will be used to support the comprehensive plan—the Federal contribution. Likewise, technology plans could describe, in greater detail, the role of technology in the comprehensive plan.

- How should Goals 2000 funds be used in relation to other funding sources to support the comprehensive plan?

The local comprehensive plan should provide direction for how the district uses all resources available to it. Goals 2000 resources should be focused on plan development and on implementation activities for which other funds are not available. Other resources that are targeted to a particular strategy should be accounted for first. The district can then determine the best use of the limited Goals 2000 funds. For instance, Title III funds, Technology Literacy Challenge Funds (TLCF), are for the purpose of improving the use of technology in the classroom. TLCF money could be used to provide professional development in teaching standards through the use of instructional technology. Goals 2000 funds could be used to help align curriculum with the new standards. The alignment of funds creates the potential for a greater systemic impact. Districts should consider the best use of Goals 2000 funds in the context of the local comprehensive plan, State plan/initiatives, and available resources. For instance, in Montana, other possible uses of Goals 2000 funds could be to aggregate standardized test data at the district level, disaggregate data by gender, race, socioeconomic status, etc., and thereby help districts develop a means for being eligible for Performance-Based Accreditation.

- The application requires that an applicant have a comprehensive

improvement plan in place in order to implement it. Does this mean that no implementation activities can be carried out until a plan is completely developed? Do these requirements imply that a plan, once developed, is to remain unchanged while it is being implemented? What if an LEA has an existing plan that meets some, but not all, of the elements required in the legislation?

If an applicant does not have a comprehensive improvement plan that meets all of the plan requirements, its primary focus in the first year should be to develop the additional components of its plan to make it complete. In addition to these plan development activities, the applicant may use funds to implement some of the completed portions of its plan that will not be greatly affected by the other portions being developed. For instance, a district that has completed development of its standards and assessments (or uses those the state has developed) may wish to begin professional development of staff in relation to the standards while the parent involvement component of its plan is being developed.

Plan development and plan implementation are not intended to be entirely distinct activities. Once a plan has been developed that meets the plan requirements of Goals 2000, continual revision of this plan should be seen as a natural part of implementing the plan. Revisions should be informed by data collected on student performance and the effectiveness of various strategies. It is anticipated that districts may already have plans that address at least some of the requirements of Goals 2000. These plans that are already in place should serve as a starting point for continued plan development; a district need not start from scratch in developing a plan to meet the requirements. When applying for Goals 2000 funds, a district should clearly identify the status of its plans in relation to the plan requirements and the steps it will take to complete its comprehensive plan.

- What should applicants consider in determining whether to apply as a member of a consortium of districts rather than as a single district?

By working together with other districts as a consortium, a district can make better use of limited resources, improve continuity of services for students, or broaden the expertise that contributes to developing and implementing a particular set of strategies. A small district that does not have a broad base of resources could form a consortium with several other districts to create a single plan or implement a common component of

individual district plans, such as professional development activities designed to help teachers create and use classroom assessments aligned to the standards. Another potentially strong consortium is one between districts that share the same students, such as an elementary district that feeds into a high school district or two K-12 district where students frequently move back and forth between the districts.

Applying in consortium provides participating districts with an opportunity to present a stronger need for funding, have higher quality strategies, and have a stronger case to meet other selection criteria for this competition. However, the purposes for a consortium, its benefit to the districts, and the commitment by participating districts should be clear. In order to meet the application requirements, a consortium application should state whether a single plan is being developed and implemented or whether a common strategy is being implemented across plans being developed and implemented within the individual districts participating in the consortium. For consortia wishing to implement existing plans, each district in a consortium should demonstrate that it has a plan to meet the plan requirements of Goals law.

- How should an applicant use the Performance Measures Template included in the application package?

Applicants should have clear and appropriate performance objectives related to the specific activities proposed in the grant. A process for measuring progress towards attaining these objectives should also be identified as well as a means for stating outcomes. Applicants are encouraged to incorporate the components of the performance measures into the template, but they may also use another, similar format. (Refer to Performance Measures and Performance Measures Template in application package.)

- Are applicants for Goals 2000 funds allowed to use grant funds to pay a consultant for writing a grant application?

No. According to a provision in the Education Department General Administrative Regulation (EDGAR, 75.515), grantees are prohibited from utilizing grant funds to pay a consultant for writing a grant application. Consultants may be used when there is a need in the approved project for services that cannot be met by an employee; however, paying a consultant to write a grant application does not meet this criterion.

- May local funds (other than federal grant funds) be used to hire a consultant to develop a grant proposal?

Yes; however, the local district should be aware that occasionally consultants use boilerplate applications. Such applications are inconsistent with the aim of Goals 2000 grants which is to support local school reform built on assessment, planning, and improvement efforts that are tied to individual districts.
