I. Funding Opportunity Description

Purpose of Program: The purposes of this program are to (1) help address State-identified needs for highly qualified personnel—in special education, related services, early intervention, and regular education—to work with infants or toddlers with disabilities, or children with disabilities; and (2) ensure that those personnel have the skills and knowledge—derived from practices that have been determined through research and experience to be successful—that are needed to serve those children.

Priority: In accordance with 34 CFR 75.105(b)(2)(v), this priority is from allowable activities specified in the statute (see sections 662(d) and 681(d) of the Individuals with Disabilities Education Act (IDEA)).

Absolute Priority: For FY 2006 this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is:
Principal Leadership Professional Development Center to Support School Improvement to Ensure Access to, and Participation and Progress in the General Education Curriculum in the Least Restrictive Environment

Background

Principal leadership is an essential element of school improvement that entails simultaneous attention to effective and efficient service delivery, use of resources, and academic performance. Successful principals use a variety of strategies and tools to leverage improvement on a school-wide basis, for all students including students with disabilities. For example, effective principals often build partnerships with families, business leaders, and community organizations, and establish and mobilize leadership teams to assess community resources, align initiatives, and design and implement coherent strategic plans to support student success. Principal leadership guides students, families, school personnel, and community partners through the development, design, implementation, and evaluation of coherent and evidence-based systemic school improvement strategies. Effective principals also mentor and coach teachers to build school capacity to ensure that all students have access to a content-rich general education curriculum and instructional supports to achieve academic success.

Unfortunately, there is a gap between evidence-based best practice and current practice in principal leadership and implementation of school improvement activities. This gap is particularly evident in providing access to the general education curriculum in the least restrictive environment for students with disabilities.

Many principals have difficulty with the logistics of establishing inclusive classrooms due to the small number of highly qualified special education teachers who have full schedules and caseloads, causing many schools to group special education students together rather than assign them general education classrooms with supplementary supports. According to the Special Education Elementary Longitudinal Study (2004), 45 percent of elementary and middle school students with disabilities receive their primary language arts instruction in special education settings—resource rooms, self-contained special education classes, or one-to-one instruction rather than in the general education classroom. According to the National Longitudinal Transition Study 2 (2003), even when
