#### LIST OF ATTACHMENTS

- Attachment 1.—Map of U.S. Fish and Wildlife Service Pacific Region including Location of Carson National Fish Hatchery and associated field offices.
- Attachment 2.—Historical Background of National Fish Hatcheries in the Pacific Region.
- Attachment 3.—Statutory Mandates and Authorities.
- Attachment 4.—Map of Wind River Watershed in Southwest Washington and Location Map of Carson National Fish Hatchery.
- Attachment 5.— Hatchery Buildings, Primary Use, and Improvements.
- Attachment 6.— Carson NFH Physical Description of Holding, Incubation, and Rearing Units.
- Attachment 7.—Layout Diagram of Carson National Fish Hatchery.
- Attachment 8.—Aerial Photographs of Carson National Fish Hatchery.
- Attachment 9.—Listed and Candidate Species under the Endangered Species Act.
- Attachment 10.—Spawning Ground Survey Data for Spring Chinook Salmon in the Wind River, 1970 2001.
- Attachment 11.—Special Use Permit from the U.S.D.A. Forest Service, Circa 1937.
- Attachment 12.—Historical Releases from Carson National Fish Hatchery, 1938-1980.
- Attachment 13.—Releases of Juvenile Spring Chinook Salmon from Carson National Fish Hatchery into the Wind River since 1990.
- Attachment 14.—Carson National Fish Hatchery Spring Chinook Return Data, 1980-2001.
- Attachment 15.—Age at Return of Carson National Fish Hatchery Spring Chinook Salmon.
- Attachment 16.—Smolt to Adult Survival of Carson National Fish Hatchery Spring Chinook Salmon, 1980-1996 Broods.
- Attachment 17.—Fisheries Contribution of Spring Chinook Salmon from Carson National Fish Hatchery.

Attachment 18.—Budget by Funding Source and Full Time Equivalent (FTE) Personnel for Fiscal Years (FY) 2000 through 2002.

Attachment 19.—Regional and National Calender for the Budget Formulation Process.

Attachment 20.—Projects Submitted as of Fiscal Year 2001 which are Linked to Carson NFH Goals and Objectives.

Attachment 21.—Projects Submitted to FONS in 2001 by the Service's Columbia River Fisheries Program Office (Vancouver, Washington), Lower Columbia River Fish Health Center and Abernathy Fish Technology Center to Support Carson NFH which are Linked to Carson NFH Goals and Objectives.

Attachment 22.—MMS.

Attachment 23.—Quarters Policy.

Attachment 24.—Quarters Plan.

Attachment 25.—Surplus Fish as Government Property.

Attachment 26.—Drugs and Anesthetics.

Attachment 27.—Fisheries Pest Management Policy.

Attachment 1.—Map of Pacific Region including location of Carson National Fish Hatchery.

#### Attachment 3.—Statutory Mandates and Authorities.

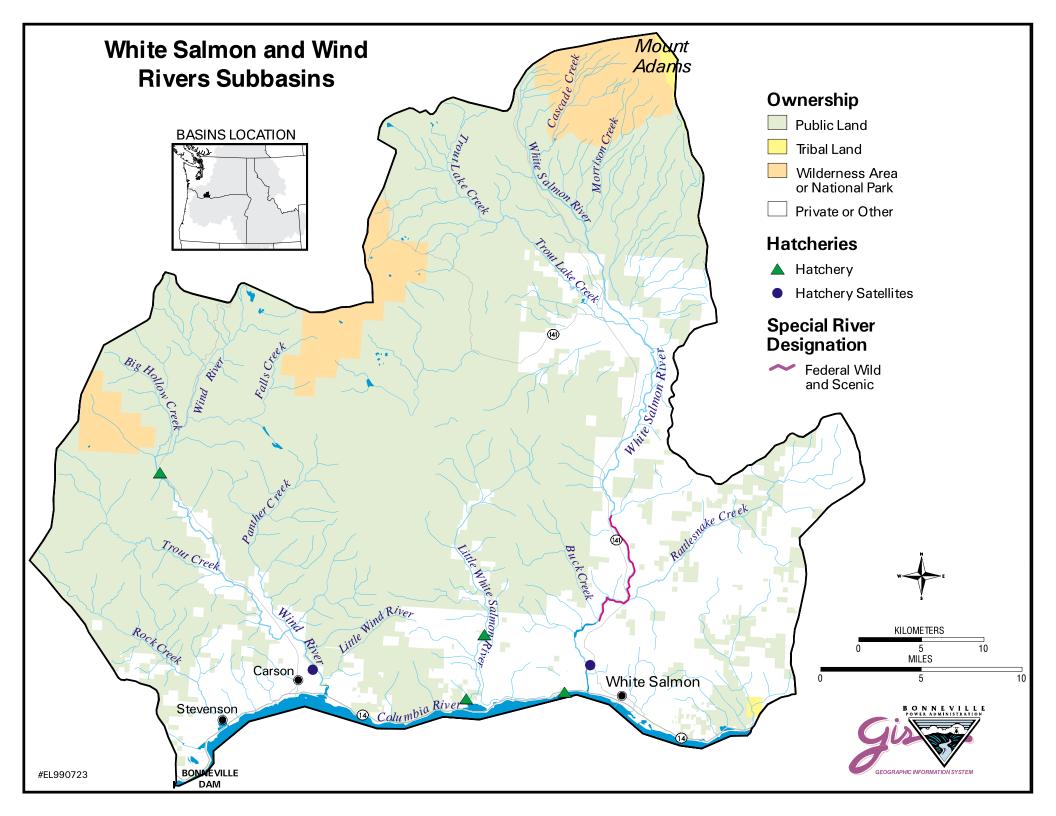

#### General Authorizations

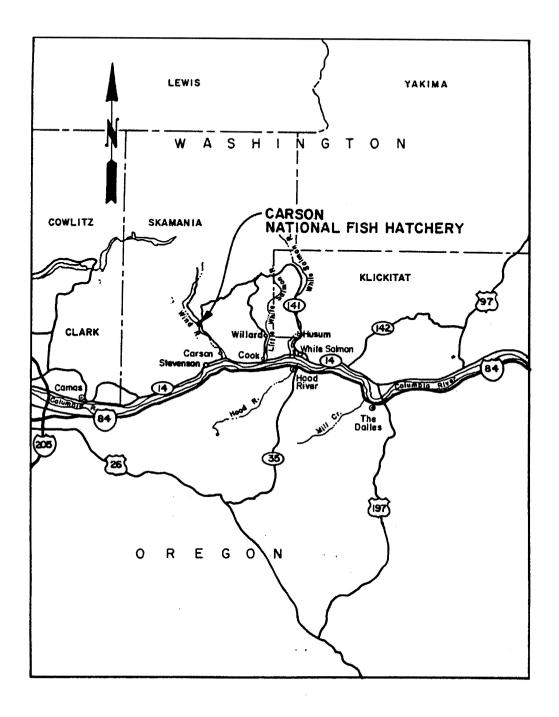

- Anadromous Fish Conservation Act, as amended (16 U.S.C. 757a-757f).
- Department of Transportation Act (16 U.S.C. 1653f).
- Estuary Protection Act (16 U.S.C. 1221-1226).
- Federal Aid in Sport Fish Restoration Act of August 9, 1950, as amended (16 U.S.C. 777k).
- Federal Water Pollution Control Act Amendments, as amended (33 U.S.C. 1251-1365, 1281-1292, 1311-1328, 1341-1345, 1361-1376).
- Fish and Wildlife Act of 1956, as amended (16 U.S.C. 742a-742j).
- Fish and Wildlife Conservation Act of 1980 (16 U.S.C. 2901-2911).
- Indian Self-Determination and Education Assistance Act of 1976 (25 U.S.C. 450-450n).
- Magnuson Fishery Conservation and Management Act of 1976 (16 U.S.C. 1801-1882).
- National Aquaculture Act of 1980, as amended (16 U.S.C. 2801-2810).
- Reorganization Plan No. 4 of 1970 (5 U.S.C. Appendix).
- Rivers and Harbors Act of 1899, as amended (33 U.S.C. 401 et seq.).
- Recreation Use of Conservation Areas Act (16 U.S.C. 460k-460k-4).
- Sikes Act, as amended (16 U.S.C. 670a-670o).
- Watershed Protection and Flood Prevention Act, as amended (16 U.S.C. 1001-1009).
- Code of Federal Regulation, Wildlife and Fisheries, Title 50, Parts 1 to 199.
- Endangered Species Act of 1973 (16 U.S.C. 1531-1544, 87 stat. 884) as amended.
- Federal Power Act (16 U.S.C. 791-828c; Chapter 285, June 10, 1920; 41 Stat. 1063) as amended.
- Federal Water Project Recreation Act (16 U.S.C. 460 (L) (12) 460 (L) (21); P.L. 89-72.
- Fish and Wildlife Coordination Act (16 U.S.C. 661-667e; 48 Stat. 401) as amended.
- Fish and Wildlife Improvement Act (16 U.S.C. 7421; 92 Stat. 3110)
- Lacy Act Amendments of 1981 (P.L. 97-79; 95 Stat. 1073, 16 U.S.C. 3371-3378)
- Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 [Title I of P.L. 101-646 (104 Stat. 4761].
- Oil Pollution Act of 1990 [Public Law 101-380 33 U.S.C. 2701 et seg; 104 Stat. 484].
- Comprehensive Environmental Response Compensation and Liability Act (Superfund) (26 U.S.C. 4611-4682; P.L. 96-510, December 11, 1980; 94 Stat. 2797).
- National Environmental Policy Act of 1969 (P.L. 91-190, 42 U.S.C. 4321-4347, January1, 1970, 83 Stat. 852) as amended by P.L. 94-52.
- National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd-668ee) as amended.
- Emergency Relief Appropriations Act (49 Stat. 115).
- Reclamation Laws (54 Stat. 1198, 1199).
- Flood Control Act of 1962 (76 Stat. 1193).
- White Act (46 Stat. 371).
- Flood Control Act of 1944, as amended 1950 (58 Stat. 887).

#### **Area-Specific Authorizations**

- U. S. v. Oregon, "Belloni Decision" [302 F. Supp. 899 (1969); affirmed, 529 F. 2d 570 (1976)].
- U. S. v. Washington, "Boldt Decision" [384 F. Supp. 312 (1974); affirmed, 520 F. 2d 676 (1975); cert. denied, 423 U.S. 1086 (1976)].
- Water Resources Development Act of 1976 [Lower Snake River Compensation Plan (90 Stat. 2921)].
- Pacific Salmon Treaty Act of 1985, "U.S./Canada Pacific Salmon Treaty" (P.L. 99-5, 16 U.S.C. 3631, 03/15/1985).
- Salmon and Steelhead Conservation and Enhancement Act (16 U.S.C. 3301-3325).
- Yakima Fishery Enhancement Project (P.L. 98-360, P.L. 98-381, P.L. 98-386).
- Grand Coulee Dam Project (49 Stat. 1028).
- Grand Coulee Fish Management Project [Columbia Basin (Grand Coulee Dam) Act] April 3, 1937.
- Chief Joseph Dam Project [Oroville-Tonasket Unit, Washington (76 stat. 761) Section 3 of the Act of October 9, 1962] [Whitestone Coulee Unit, Washington (43 U.S.C. 616uu, 616vv-1-6163; 78 Stat. 704], as amended.
- Columbia Basin Project Act (16 U.S.C. 835 et seg., 57 Stat. 140) as amended.
- Chehalis River Fishery Resources Study and Restoration Act [Public Law 101-454 (104 Stat. 1054].
- Mitchell Act (16 U.S.C. 755-757; 52 Stat. 345).
- Pacific Northwest Electric Power Planning and Conservation (16 U.S.C. 839, P.L. 96-501, 94 Stat. 2697) as amended.
- First Deficiency Appropriation Act, "Central Valley Project" (49 Stat. 1622).
- Reclamation Projects Authorization and Adjustment Act of 1992, "Central Valley Project Improvement Act (106 Stat. 4714-4731).
- Pyramid Lake/Truckee-Carson Water Rights Settlement (P.L. 101-618, 104 Stat. 3289).
- Washoe Project Act (70 Stat. 775-777).

Attachment 4.—Map of Wind River Watershed in Southwest Washington and Location Map of Carson National Fish Hatchery.

# Attachment 5.— Hatchery Buildings, Primary Use, and Improvements.

Building	Construction type
Nursery Building 4141 sq. ft.	Wood frame, constructed 1937. Used to incubate eggs and fry.
Shop 2118 sq.ft	Wood frame, constructed 1937. Expanded 1994.
Residences Residence-1, 192 ft <sup>2</sup> Residence-2 1,500 ft <sup>2</sup> Residence-3 1,500 ft <sup>2</sup> Duplex-37 2,600 ft <sup>2</sup> Duplex-39 2,600 ft <sup>2</sup>	Residences at Carson NFH consist of three wood frame houses constructed circa 1937 and two concrete block three bedroom duplex units constructed in 1955. A third duplex unit was declared excess to hatchery needs and razed in FY 1996.
Service/Administration 3,537 ft <sup>2</sup>	Brick/ceramic block, constructed 1955. Includes office space for Project Leader, Assistant Manager and Administrative Assistant plus storage for three vehicles, fish food storage freezer, feed prep room and production crew office.
Oil and Paint Storage 339 ft <sup>2</sup>	Brick, constructed 1955. Used to store gas powered equipment, oil, and paint.
Pond Cover 17,170 ft <sup>2</sup>	Galvanized steel cover constructed over the middle bank of raceways in 2000 to replace a cover which had collapsed during heavy snow. This structure is made of very heavy steel posts and trusses designed to carry up to 1,000,000 pounds of snow.
Hazardous Material Storage 69 ft <sup>2</sup>	Prefabricated 9' x 12' metal hazardous material storage building purchased in 2001 to store formalin.

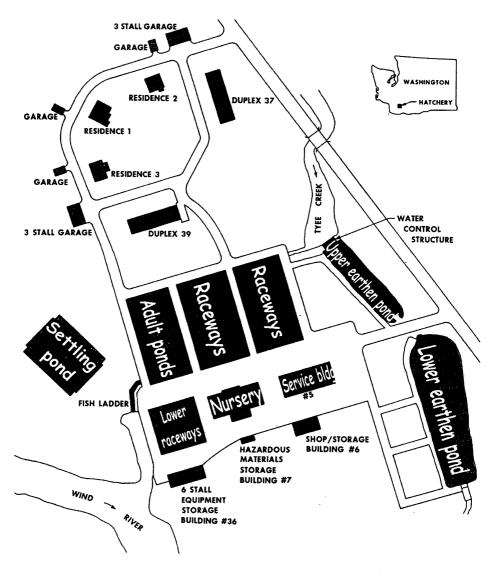

Attachment 6.— Carson NFH Physical Description of Holding, Incubation, and Rearing Units.

Unit type	Length (ft)	Width (ft)	Depth (ft)	Volume (ft <sup>3</sup> )	No.	Material	Age	Condition
Brood pond	146	40	4	23,360	2	concrete	42	fair
Lower earth pond	270	78	3	63,180	1	dirt	42	good
Upper earth pond	170.0	45.0	2.3	17,212	1	dirt	42	good
Raceways	80	8	2	1,280	46	concrete	42	good
Incubator troughs	20.0	1.5	1.5	45	8	fiberglass	20	good
Vertical stack incubators				7	21	fiberglass	5	good
Starter tanks	15.0	3.5	2.0	105	24	fiberglass	20	good

Raceways were lined with polyurethane in 2002.

Attachment 9.—Listed and Candidate Species under the Endangered Species Act.

## United States Department of the Interior

#### FISH AND WILDLIFE SERVICE

Western Washington Fish and Wildlife Office 510 Desmond Drive SE, Suite 102 Lacey, Washington 98503

Phone: (360) 753-9440 Fax: (360) 534-9331

Dear Species List Requester:

We are providing the information you requested to assist your determination of possible impacts of a proposed project to species of Federal concern. Attachment A includes the listed threatened and endangered species, species proposed for listing, candidate species, and/or species of concern that may be within the area of your proposed project.

Any Federal agency, currently or in the future, that provides funding, permitting, licensing, or other authorization for this project must assure that its responsibilities section 7(a)(2) of the Endangered Species Act of 1973, as amended (Act), are met. Attachment B outlines the responsibilities of Federal agencies for consulting or conferencing with us (U.S. Fish and Wildlife Service).

If both listed and proposed species occur in the vicinity of a project that meets the requirements of a major Federal action (i.e., "major construction activity"), impacts to both listed and proposed species must be considered in a biological assessment (BA) (section 7(c); see Attachment B). Although the Federal agency is not required, under section 7(c), to address impacts to proposed species if listed species are not known to occur in the project area, it may be in the Federal agency's best interest to address impacts to proposed species. The listing process may be completed within a year, and information gathered on a proposed species could be used to address consultation needs should the species be listed. However, if the proposed action is likely to jeopardize the continued existence of a proposed species, or result in the destruction or adverse modification of proposed critical habitat, a formal conference with us is required by the Act (section 7(a)(4)). The results of the BA will determine if conferencing is required.

The Federal agency is responsible for making a determination of the effects of the project on listed species and/or critical habitat. For a Federal agency determination that a listed species or critical habitat is likely to be affected (adversely or beneficially) by the project, you should request section 7 consultation through this office. For a "not likely to adversely affect" determination, you should request our concurrence through the informal consultation process.

Candidate species and species of concern are those species whose conservation status is of concern to us, but for which additional information is needed. Candidate species are included as an advance notice to Federal agencies of species that may be proposed and listed in the future. Conservation measures for candidate species and species of concern are voluntary but recommended. Protection provided to these species now may preclude possible listing in the future.

For other federally listed species that may occur in the vicinity of your project, contact the National Marine Fisheries Service at (360) 753-9530 to request a list of species under their jurisdiction. For wetland permit requirements, contact the Seattle District of the U.S. Army Corps of Engineers for Federal permit requirements and the Washington State Department of Ecology for State permit requirements.

Thank you for your assistance in protecting listed threatened and endangered species and other species of Federal concern. If you have additional questions, please contact Yvonne Dettlaff (360) 753-9582.

Sincerely,

Ken S. Berg, Manager Western Washington Fish and Wildlife Office

Enclosure(s)

#### **ATTACHMENT A**

July 2, 2002

# LISTED AND PROPOSED ENDANGERED AND THREATENED SPECIES, CRITICAL HABITAT, CANDIDATE SPECIES, AND SPECIES OF CONCERN THAT MAY OCCUR IN THE VICINITY OF THE CARSON NATIONAL FISH HATCHERY IN SKAMANIA COUNTY, WASHINGTON

(T5N R7E S32)

FWS REF: 1-3-02-SP-1530

#### LISTED

Wintering bald eagles (*Haliaeetus leucocephalus*) may occur in the vicinity of the project. Wintering activities occur from October 31 through March 31.

Bull trout (Salvelinus confluentus) may occur in the vicinity of the project.

Northern spotted owl (*Strix occidentalis caurina*) occur in the vicinity of the project. Nesting activities occur from March 1 through September 30.

Major concerns that should be addressed in your biological assessment of the project impacts to listed species include:

- 1. Level of use of the project area by listed species,
- 2. Effect of the project on listed species' primary food stocks, prey species, and foraging areas in all areas influenced by the project, and
- 3. Impacts from project construction (i.e., habitat loss, increased noise levels, increased human activity) that may result in disturbance to listed species and/or their avoidance of the project area.

#### **PROPOSED**

None

#### **CANDIDATE**

None

#### **CRITICAL HABITAT**

Critical habitat for the northern spotted owl has been designated in the vicinity of the project.

#### **SPECIES OF CONCERN**

The following species of concern have been documented in the county where the project is located. These species or their habitat could be located on or near the project site. Species in **bold** were specific occurrences located on the database within a 1 mile radius of the project site.

California wolverine (Gulo gulo luteus)

Cascades frog (Rana cascadae)

Larch Mountain salamander (Plethodon larselli)

Long-eared myotis (Myotis evotis)

Long-legged myotis (*Myotis volans*)

#### Northern goshawk (Accipiter gentilis)

Northwestern pond turtle (*Clemmys marmorata marmorata*)

Olive-sided flycatcher (Contopus cooperi)

Pacific Townsend's big-eared bat (Corynorhinus townsendii townsendii)

Pacific lamprey (*Lampetra tridentata*)

Peregrine falcon (Falco peregrinus)

River lamprey (Lampetra ayresi)

#### Tailed frog (Ascaphus truei)

Western toad (Bufo boreas)

Penstemon barrettiae (Barrett's beardtongue)

Rorippa columbiae (Columbia yellow-cress)

Sisyrinchium sarmentosum (pale blue-eyed grass)

#### **ATTACHMENT B**

# FEDERAL AGENCIES' RESPONSIBILITIES UNDER SECTIONS 7(a) AND 7(c) OF THE ENDANGERED SPECIES ACT OF 1973, AS AMENDED

#### SECTION 7(a) - Consultation/Conference

Requires:

- 1. Federal agencies to utilize their authorities to carry out programs to conserve endangered and threatened species;
- 2. Consultation with the U.S. Fish and Wildlife Service (FWS) when a Federal action may affect a listed endangered or threatened species to ensure that any action authorized, funded, or carried out by a Federal agency is not likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat. The process is initiated by the Federal agency after it has determined if its action may affect (adversely or beneficially) a listed species; and
- 3. Conference with the FWS when a Federal action is likely to jeopardize the continued existence of a proposed species or result in destruction or an adverse modification of proposed critical habitat.

#### SECTION 7(c) - Biological Assessment for Construction Projects \*

Requires Federal agencies or their designees to prepare a Biological Assessment (BA) for construction projects only. The purpose of the BA is to identify any proposed and/or listed species that is/are likely to be affected by a construction project. The process is initiated by a Federal agency in requesting a list of proposed and listed threatened and endangered species (list attached). The BA should be completed within 180 days after its initiation (or within such a time period as is mutually agreeable). If the BA is not initiated within 90 days of receipt of the species list, please verify the accuracy of the list with the Service. No irreversible commitment of resources is to be made during the BA process which would result in violation of the requirements under Section 7(a) of the Act. Planning, design, and administrative actions may be taken; however, no construction may begin.

To complete the BA, your agency or its designee should (1) conduct an onsite inspection of the area to be affected by the proposal, which may include a detailed survey of the area to determine if the species is present and whether suitable habitat exists for either expanding the existing population or potential reintroduction of the species; (2) review literature and scientific data to determine species distribution, habitat needs, and other biological requirements; (3) interview experts including those within the FWS, National Marine Fisheries Service, state conservation department, universities, and others who may have data not yet published in scientific literature; (4) review and analyze the effects of the proposal on the species in terms of individuals and populations, including consideration of cumulative effects of the proposal on the species and its habitat; (5) analyze alternative actions that may provide conservation measures; and (6) prepare a report documenting the results, including a discussion of study methods used, any problems encountered, and other relevant information. Upon completion, the report should be forwarded to our Endangered Species Division, 510 Desmond Drive SE, Suite 102, Lacey, WA 98503-1273.

<sup>\* &</sup>quot;Construction project" means any major Federal action which significantly affects the quality of the human environment (requiring an EIS), designed primarily to result in the building or erection of human-made structures such as dams, buildings, roads, pipelines, channels, and the like. This includes Federal action such as permits, grants, licenses, or other forms of Federal authorization or approval which may result in construction.

Attachment 11.—Special Use Permit from the U.S.D.A. Forest Service, Circa 1937.

#### SPECIAL USE PERMIT

L-Uses
Columbia
U. S. Bureau of Fisheries
Fish Hatchery
(Case designation)

Permission is hereby granted toRegional Director
f the U.S. Bureau of Fisheries
o use the following-described lands: A tract of not over ten acres, located near (Describe the lands to be occupied, if unsurveyed, by metes and bounds, with reference to a road or the junction of Tyee Creek and Wind River, approximately at what, if surveyed,
stream or well-known landmark; right of way by terminal points, direction, and lands occupied)  Fould be the Quarter Corner of the North line of Section 5, Township 4 North,
Range 7 East, W.M., as shown on site plan which is hereby made a part of this
permit,
or the purpose of building, maintaining and operating a Government Fish Hatchery  (Briefly but clearly describe the use, giving area of inclosures, length and width of right of way, etc.)
ubject to the following conditions:
1. The permittee shall pay to the Regional Fiscal Agent designated by the Forest officer for
eposit to the credit of the Treasurer of the United States, in consideration for this use, the sum of  No charge - Reg. L-2-B dollars (\$) for the period
rom, 19, to December 31, 19, and thereafter annually,
on January 1,
2. The permittee shall comply with the regulations of the Department of Agriculture governing he National Forest, shall observe all sanitary laws and regulations applicable to the premises, and hall keep the premises in a neat and orderly condition and dispose of all refuse and locate outhouses and cesspools as required by the Forest officers.

- 3. This permit is subject to all valid claims.
- 4. The permittee shall take all reasonable precaution to prevent and suppress forest fires.

8--713

- 5. The permittee, if engaged in business, shall conduct same in an orderly manner and in accordapplicable ance with all requirements of the laws of the State of Washington, as well as the laws of the United States.
  - 6. The permittee shall pay the United States for any damage to its property resulting from this use.
- 7. The permittee shall fully repair all damage, other than ordinary wear and tear, to roads and trails in the National Forests caused by the permittee in the exercise of the privilege granted by this permit.
- 8. Construction work (or occupancy and use) under this permit shall begin within <u>two (2)</u> months, be completed within <u>five (5)</u> years from the date of the permit, and this use shall be actually exercised at least <u>ninety (...</u> days each year, unless the time is extended or shortened.
  - 9. In case of change of address, permittee shall immediately notify the Forest Supervisor.
- 10. The charges for this use may be readjusted whenever necessary to place this parmit on a basis consistent with the charge to other permittees for like privileges.—A general readjustment will be made at the end of five years from the date of issuance of permit and at the end of each five year period thereafter.
- 11. No National Forest timber may be cut or destroyed without first obtaining a permit from the Forest Supervisor.
- 12. Upon the abandonment, termination, or revocation of this permit, and in the absence of an agreement to the contrary; the permittee, if all the rental charges due the Government have been paid, may, within a reasonable period to be determined by the issuing officer, remove all structures which have been placed on the premises by him, except where the material was furnished by the Forest Service, but upon failure to remove the structures within that period they shall become the property of the United States.
- 13. This permit may be transferred with the approval of the officer by whom it was given or his successor, subject to such conditions as may be imposed at the time of transfer. It shall terminate upon breach of any of the conditions herein or at the discretion of the Regional Forester or the Forester.
- 14. The permittee shall provide, whenever requested by the Forest officers, a way across the land covered by this permit for the free ingress or egress of Forest officers and for users of National Forest land and purchasers of National Forest products.

15. The permittee will obtain approval of the District Ranger before burning (Special stipulations necessary)
brush piles or any debris resulting from the clearing of the grounds.
16. No building of any sort shall be constructed until plans for each structure
have been submitted to and approved by the Forest Supervisor of the Columbia
National Forest.
17. The permittee shall not permit dead fish to be returned to the stream, but
shall dispose of them in some manner approved by the Forest Supervisor.
18. If no commercial telephone is available the permittee will be allowed to
attach one telephone to the Forest Service line, without cost, and there will be
no charge for calls over the Forest Service line. Calls extending to commercial lines will be paid for by the permittee.
May 27, 1937.) (Signature of officer issuing permit)

<sup>++</sup>Planted by Forest Service.

BBS= Blueback Salmon

BKT= Brook Trout

BST= Black-spotted Trout

CH= Chinook Salmon

COS= Coho Salmon SIS= Silver Salmon

CUT= Cutthroat Trout

FCS= Fall Chinook Salmon

FKS= Fall King Salmon

KMT= Kamloops Trout

**KOK= Kokanes** 

**RBT=** Rainbow Trout

SCS= Spring Chinook Salmon

SES= Sockeye Salmon

SHT= Steelhead Trout

Fry = up to time yolk sac absorbed & feeding begins

Advanced fry = end of fry to 1 inch

Fingerlings = between 1" and yearling, No.1 were 1", up to 2", No. 2 were up to 3", etc.

Yearling = one year old, but less than 2 from date of hatching, could call them No. 1, etc, as well.

<sup>\*</sup>Reared cooperatively with the Washington Dept. of Game

<sup>+</sup>Reared as part of the Lower Columbia River Salmon Development Program

Attachment 13.—Releases of Juvenile Spring Chinook Salmon from Carson National Fish Hatchery into the Wind River since 1980.

In wind R.	.ver,	1980 - 2002.

Attachment 19.—Regional and National Calender for the Budget Formulation Process.

Regional Formulation Process					
November	Project Leaders complete FONS submissions, emphasizing projects related to ecoregion priorities, and forward to the Regional FONS Coordinator. Submissions are reviewed for completeness and clarity. Projects are then submitted to the relevant supervisors for ranking.				
	ARD, Fisheries incorporate supervisor rankings and input, plus regional and national priorities to develop regional ranking recommendations.				
	Regional Director reviews and approves/modifies regional ranking recommendations.				
National For	National Formulation Process				
February	Regional FONS submission to Service's Washington Office.				
Mar/Apr	Assistant Director, Fisheries and Habitat Conservation and ARD, Fisheries review regional submissions and identify themes.				
	Themes communicated to ARD, Fisheries, Regional Directors, and Director.				
May/June	Regions use themes in the development of regional budget requests. Using FONS, project lists will be developed for each theme to be forwarded in the Regional Request.				
June	The Service Budget Committee considers the Regional Requests in setting priorities for the Service's Budget Request to the Department.				
June <sup>o</sup> Jan	As the Service's Budget Request moves through the approval process (Department of Interior and OMB review), ARD, Fisheries will be consulted to ensure that FONS lists still represent the highest priorities of the regions.				
February	Presidents budget submitted to Congress including FONS projects for Fisheries Program increases.				

Attachment 20.—Projects Submitted as of Fiscal Year 2001 which are Linked to Carson NFH Goals and Objectives.

Goal	Objective	Intended accomplishment	FONS project #	Cost (\$1,000)
1	2	Most efficient use of fish rearing facilities to enhance unique spring Chinook in-river fishing opportunities.	1999-001	35
4	1 & 2	Increase public use of hatchery facilities while informing visiting publics of Fish and Wildlife Service activities.	1999-002	110
3	1	Enhanced survival and abundance of listed salmon in Washington.	1999-003	21
3	1	Restoration of ESA listed steelhead (threatened) in the Wind River.	2000-001	10
1 2	1 2 & 3	Development of a Station Development Plan which will make Carson NFH more effective in addressing the needs of fishers reaching conservation hatchery goals.	2001-02	25
1	2	Evaluate the energetic costs of passage and migrational delay, resulting from hydropower projects, on Columbia river adult spring Chinook salmon.	2002-001	4
1	1 & 2	Determine the effects of electrical anesthesia used during spawning activities on adult spawners, eggs, and juveniles	2002-002	4
(All)	1 (All)	Maximizing efforts of fisheries managers and biologists on resource issues by minimizing computer down time which is estimated at 2000 hours (50 weeks) per year for 6 stations	2002-003	18
3	1	Provide information to assist with the recovery of wild and listed fish in the Wind River.	2002-004	15

Total: 242

Done with 2002 funds - Replace 3 1940 era asbestos-sided garages. Garages are usable only for compact vehicles, rotting, large cracks in the foundations permit free access to rodents, and are unlighted creating safety issues. Asbestos is chipped, loose and cracked. Employees are required to live on station to protect irreplaceable salmon stocks.

Attachment 23.—Quarters Policy.

FISH-11

### REGION 1 POLICY ON REQUIRED OCCUPANCY IN GOVERNMENT FURNISHED QUARTERS ON NATIONAL FISH HATCHERIES

### INTRODUCTION

In order to carry out its mandated responsibilities, the Fish and Wildlife Service administers a variety of field offices and National Fish Hatcheries. At many of these National Fish Hatcheries, government owned residences are available to employees on a <u>required occupancy</u> basis. The determination of whether an employee must occupy Government Furnished Quarters as a condition of employment is made on a station-by-station, position-by-position, and residence-by-residence basis. In making the determination, supervisors will consider:

- the dependability of the water supply systems;
- adequacy of the alarm and call back systems;
- 3. response time needed to take emergency corrective actions; and
- 4. the adequacy of the security provided to protect fish, facilities, and equipment (See attached Optimum Protection Standards for National Fish Hatcheries in Region 1).

### AUTHORITY

This policy is promulgated under authority of Public Law 88-459, Section 5 (5 USC 5911); Office of Management and Budget Circular A-18; Department of the Interior Property Management Regulation 114-51.302; Departmental Quarters Handbook, 400 DM; and the Fish and Wildlife Administrative Manual 23 AM 11.3.

### **PURPOSE**

The purpose of this policy is to provide uniform guidance in the identification of required occupancy in government owned residences on National Fish Hatcheries, and to ensure consistency in those requirements throughout the Region. The Region will require occupancy of employees at specified hatcheries only when necessary services cannot be rendered or government property cannot be protected effectively and efficiently through means other than the presence of employees on the station. The policy provides for implementation of other methods of protection and security on hatcheries.

### SCOPE

This policy is applicable to all National Fish Hatcheries in Region 1 where government owned residences exist on the effective date of this policy and where such residences are subsequently acquired or constructed.

### POLICY

### Required Occupancy -

It is the policy of the Region to require occupancy of key employees at specified National Fish Hatcheries where necessary services cannot be rendered or government property cannot be protected effectively and efficiently through means other than the presence of employees residing at the hatchery. Positions and residences assigned required occupancy status will be justified on the basis that the employee filling the position will be familiar enough with station operations to effectively handle emergencies.

The preferred staffing of required occupancy positions will be Project Leader, Assistant Project Leader, and Maintenanceman. However, these positions may vary from hatchery to hatchery based on the availability and capability of individual employees. In any case, the Project Leader will be ultimately responsible for ensuring the adequacy of protection for fish, facilities, and equipment.

Employees who perform work outside their tour of duty are entitled to appropriate compensation. Required occupancy will not be used in a manner which places restriction on the employee's freedom of movement regarding scheduled leave, non-work days, off duty hours, and similar benefits.

### **IMPLEMENTATION**

In implementing and administering this policy, the following will apply:

### Project Leaders

- Will initiate a review and determine the following:
  - 1. the dependability of the water supply;
  - 2. adequacy of existing alarm and call back systems;
  - response time needed to take emergency corrective actions;
  - 4. the adequacy of security provided to protect fish, facilities, and equipment; and
  - 5. the availability of local housing for rent/purchase.
- o Will initiate improvements in alarm systems, security, fencing, water supplies, etc., as soon as funding permits. If existing systems are inadequate to provide the required security and protection, make recommendations to the Associate Manager on the level of required occupancy needed on a station-by-station, position-by-position, and residence-by-residence basis.

 Will identify quarters to be made available for occupancy by other government agencies, or for rental to the general public (upon approval from the appropriate Assistant Secretary).

### Associate Manager/Assistant Regional Director, Fisheries and Federal Aid

- Will review Project Leader recommendations on required occupancy.
- Will modify or approve Project Leader recommendations.
- Will require Project Leaders to annually review required occupancy status and to initiate actions to improve the adequacy of existing security systems (as funding permits).

### Other

- Required occupancy status will be reviewed on an annual basis to address changes in station programs/missions, personnel, and available protection. Where it is determined that occupancy of Government Furnished Quarters is not required, the Project Leader must annually certify in writing to the Associate Manager/Assistant Regional Director, Fisheries and Federal Aid, that necessary services can be rendered and government property can be protected effectively and efficiently through means other than the presence of employees residing at the hatchery. This review and certification will be completed by November 1 of each calendar year.
- Where occupancy is required, it will be made a condition of employment and will be contained in the employee's position description and SF-50. In addition, a Form DI 1872, "Certification of Required Occupancy", will be completed. After concurrence by the Regional Director, the form will be forwarded to the Washington Office for final approval by the Director.
- By December 1 of each calendar year, a listing of those residences and positions which have been reapproved for required occupancy will be provided to the Director.

Any new determinations for required occupancy or deletions from required occupancy will follow the procedures outlined in the "U.S. Fish and Wildlife Policy On Required Occupancy In Government Furnished Quarters".

This policy becomes	effective who	en approved.

### Optimum Protection Standards for National Fish Hatcheries in Region 1

- 1. Maximum response time between the occurrence of a problem and initiation of corrective action 20 minutes.
- 2. Perimeter fencing, fencing around, or gates to isolate critical and sensitive areas.
- 3. Lockable fuel dispensing stations with separate, isolated shut-off switch.
- 4. Outside lighting around office buildings, shop buildings, equipment/vehicle storage buildings, and other sensitive areas.
- 5. Centralized alarm system panel with individualized water and intrusion system status lights.
- 6. Alarm system capabilities must include: a pager system, minimum 30 mile radius range, with at least 3 active belt/pocket receivers (two additional receivers are to be available as replacement equipment). Also, at least one of the following should be included:
  - alarm sirens/bells (on station),
  - alarm indicator light/beacon (on station), and
  - telephone warning system, with roll-over feature.
- 7. Individualized water supply alarms (on each system and/or area used for incubation/rearing) which include:
  - flow or pressure alarms,
  - pond or headbox water high/low level alarms, and
  - equipment failure alarms (pumps on wells or reuse systems, pretreatment, and post-treatment systems).
- 8. Power failure alarms.
- 9. Standby generator(s) with automatic start and transfer feature.
- 10. Building burglar alarms and broodstock pond intrusion alarms.
- 11. Smoke and/or heat sensing alarms in buildings and residences.

Attachment 24.—Quarters Plan.

### Quarters Plan Carson National Fish Hatchery

November 20, 2001

### General Information

The housing at Carson NFH consists of three circa 1937 wood frame, three bedroom houses designated as Q 1, 2, &3 and two circa 1955 block construction, three bedroom duplex units designated as Q 37-1 & 2 and Q 39-1 & 2. Quarters 1, 2, and 39-1 & 2 are generally reserved for station personnel. Quarters 2 and 37-1 & 2 are currently excess to station needs. However, Quarters 2 has been designated as historically significant by Cultural Resources and an attempt to have it removed was thwarted. It is currently rented to a US Geological Survey Willard Laboratory employee. Quarters 37-1 has been used in recent years to provide housing for student and other volunteers. This program has been very successful providing much needed volunteer help in the busy summer months and, most recently, during the winter months. The savings to the government have more than offset the costs of maintaining the unit.

The intent of having personnel living in government quarters at Carson NFH is to provide station security and operations during non-duty hours. Mechanical systems to regulate water flows must be maintained immediately to prevent loss of valuable fish stocks. Additional security protection of government owned property is provided by occupants especially when anadromous broodstock are present. The isolated setting of Carson NFH combined with potential inaccessibility during sever snowstorms precludes adequate protection by other than required housing.

Required housing at present is limited to the station manager, the assistant station manager, and a fish culturist. The job descriptions of the required tenants are less critical to the safety of fish stocks than is the number of tenants required to live on station. Under the Fair Labor Standards Act, employees cannot be required to be at home in government owned quarters without compensation. Since there is no viable mechanism for compensating the employees, the presence of someone at home in government owned quarters and available to respond immediately to a water alarm or other emergency is left to chance. Increasing the number of people living on station increases the probability that someone will be available for emergency response. Therefore, the minimum number required to provide a reasonable prospect of protection is three. Whether the person is management, maintenance, or production personnel is not critical. Most alarm situations at Carson NFH can be managed with a leaf rake. In the event the problem cannot be solved by the responder, maintenance or other staff can be called in for assistance.

### Assignment of Quarters

The assignment of quarters shall be done in accordance with Chapter 8, Department of the Interior Departmental Quarters Handbook (DQM)(400 DM Addition to IPMR 06/02/94).

Assignment Priorities: Assignment of quarters shall follow the priorities in the order listed below.

- 88. Required Occupants.
- 89. Other Station Personnel, including contractors and essential cooperators.

- 90. Volunteers. Must meet requirements of paragraph 8.1C DQH 400 DM.
- 91. Other Bureaus. Employees of other Interior bureaus.
- 92. Other Agencies. Employees of other Federal Agencies.
- 93. Non-Federal Tenants. See paragraph 5.2 DQH.

### Maintenance

The station manager has final approval authority over all quarters maintenance. Quarters maintenance needs are reported to the station manger for inclusion into the prioritization process. Quarters deficiencies affecting safety or health are given top priority, followed by weatherization and structural needs. The station manager meets with the assistant manager and maintenance personnel at the beginning of the fiscal year to determine major deficiencies and prioritize repairs.

### Memorandum

To:

Fishery Project Leaders

From:

Regional Director, Region 1

Portland, Oregon

Subject:

Surplus Fish as Government Property

The Hatchery system in Region 1 is currently enjoying success with increasing returns of adult fish. This success is due in no small part to the dedication of Service Fisheries employees who have worked tirelessly to ensure the Hatchery system produces quality fish. However, it is important that all Service employees honor the public trust placed in them as stewards of the Nation's resources and administrators of public property.

With this memorandum I want to emphasize that live fish entering a National Fish Hatchery (Hatchery), whole fish carcasses or their parts, are Government property and cannot be converted for personal use, even temporarily on loan. Misuse of Government property may result in disciplinary action ranging from a written reprimand to removal from the Service. The attached Standards of Ethical Conduct for Employees of the Executive Branch, contained in 5 CFR 2635.704, specifically address use of Government property. Please review and be acquainted with these standards. Also, please ensure that all your employees read and understand this memorandum.

It is important that you first consider all possible uses of hatchery fish that are consistent with the Service Mission. Surplus fish must be disposed of using prescribed government contracting procedures. Furthermore, you must comply with other Service and FDA policies related to the disposition of carcasses and parts that have been treated with chemicals making them unfit for human consumption. Should you have any questions regarding this policy, please contact the Assistant Regional Director, Fishery Resources, through your supervisor.

### Memorandum

To:

Region 1 Fisheries Project Leaders

From:

Assistant Regional Director, Fishery Resources

Subject:

Guidance on Clove Oil and Other Fisheries Use Drugs and Chemicals

Hatcheries and other Fisheries offices within Region 1 may at times have legitimate and necessary reasons to use certain drugs and chemicals to achieve their goals and complete the mission and objectives of the Service. During the capture, rearing, or monitoring of fish species, several drugs and chemicals are used for anesthesia, disease treatments, or to increase the survival of the animals. Some of these compounds are already registered and labeled for fisheries use. Others may be legally used under the prescription and supervision of a veterinarian, or within the protocols of an existing Investigational New Animal Drug (INAD) exemption permit issued by the Food and Drug Administration (FDA). The Service has existing correspondence (see attached copy) from the FDA concerning the use of compounds in the recovery of threatened and endangered species, but there are certain restrictions even in those situations.

This document is intended to review the use of aquatic animal drugs for Fisheries Projects and provide guidance on their proper use in food animals. Attached are summaries of drugs and chemicals that are approved for aquatic animal use, considered Low Regulatory Priority for use in aquiculture, on the deferred regulatory list for aquiculture, and INAD permitted chemicals. Also attached are the FDA criteria for veterinary extra label use of approved human and animal drugs and a glossary of terms commonly used by FDA and others involved with the use of drugs and chemicals.

Region 1, working closely with the National INAD Office (NIO) and through appropriate consultation with FDA, will fully comply with all regulations and agreements for the use of aquatic drugs and chemicals. The inappropriate use of compounds on fish or aquatic animals intended for human or animal consumption is prohibited.

The use of clove oil as an anesthetic in <u>food fish</u> has been declared illegal by the Center for Veterinary Medicine (CVM) of the FDA. Until notified otherwise by the CVM, a fish is a food fish if it is reasonably likely that it will be consumed directly or indirectly by humans for food. Non-food fish salmon, steelhead, or trout are those to be rendered, buried, or released to the wild where they are not subject to harvest in legal fisheries. <u>If a fish to be treated is not a food fish, then clove oil can be used as an anesthetic.</u> However, juvenile fish cannot be anesthetized using

clove oil because of possible residual effects<sup>1</sup> (this excludes listed fish which are not harvested in legal fisheries as adults). If fish anesthetized with clove oil are rendered, the rendering plant operator who receives the fish must be notified in writing of this treatment; the same is true for MS-222 if its established 21-day withdrawal period is not observed. If the fish is outplanted, the Service must be assured that it will not be harvested in a legal fishery. These situations will be treated on a case-by-case basis and will need written approval from the Assistant Regional Director, Fishery Resources. Please notify your supervisor if you feel you have a non-food fish that would be appropriate for clove oil treatment.

The Service believes that its mission and goals can be achieved within the existing framework of allowable drug and chemical use, but recognizes the pressing needs for additional safe and effective drugs to facilitate recovery and restoration efforts. The Service continues to support the efforts of the National INAD Office, fisheries professionals, and the FDA by supplying data and working towards the registration and labeling of new chemotherapeutic compounds.

Attachment 1: Letter from FDA on the use of drugs in Threatened and Endangered Species Attachment 2: Form TE-1, "Guide for Reporting Shipment/Receipt of Unapproved Drugs for Use on Threatened and Endangered Fish Species," and Form TE-2, "Chemical Use Log for the Use of Unapproved Drugs on Threatened and Endangered Fish Species."

Attachment 3: List of FDA Approved Compounds for Use in Aquatic Animals

Attachment 4: FDA Compliance Policy Guide 1240.4200: Drug use in Aquiculture Enforcement Priorities. Includes the lists of compounds FDA considers to be of Low Regulatory Priority,

Deferred Regulatory Priority, and High Regulatory Priority for enforcement

Attachment 5: List of FDA INAD Permitted compounds and their sponsors

Attachment 6: FDA Compliance Policy Guide 1240.4210 Extralabel Use of Approved Drugs in Aquiculture

Attachment 7: Glossary of terms frequently encountered in chemotherapeutic compound registration and use.

Attachment 8: Clove oil fact sheet

Attachment 9: FDA Compliance Policy Guide 1240-4260: Classification of Aquaculture Species/Population as Food or Nonfood Animal

Attachment 10: Use of Unapproved Drugs in Culturing Endangered and Threatened Fish Species (02/06/96)

Attachment 11: Use of Unapproved Drugs in Culturing Endangered and Threatened Fish Species (03/04/96)

<sup>&</sup>lt;sup>1</sup>If a drug is not covered by an INAD exemption permit it has no established withdrawal period, or more precisely, the drug must be considered to be present in a residual form into adulthood when it is subject to harvest in a legal fishery. On the other hand, juvenile fish exposed to MS-222 or drugs under an INAD exemption permit that have an FDA-specified withdrawal time could be stocked immediately following treatment, as this period of time would elapse before the fish could be legally harvested.

Attachment 27.—Fisheries Pest Management Policy.

### Memorandum

To:

Fishery Project Leaders

From:

Assistant Regional Director, Fishery Resources

SIGNED BY DANIEL H. DIGCU

Subject:

Fisheries Pest Management Policy

It is Fish and Wildlife Service (Service) policy to eliminate unnecessary use of pesticides by implementing integrated pest management techniques and by selecting crops and other vegetation that are beneficial to fish and wildlife but do not require pesticides. The ultimate goal is to eliminate pesticide use on Service lands and facilities and to encourage pest management programs that benefit trust resources and provide long-term, environmentally sound solutions to pest management problems on sites which are off Service lands.

When pesticides are used, they must be part of a pest management program that includes strategies to reduce and eventually eliminate their use. The program must be set forth in an Integrated Pest Management Plan which will be a part of the Comprehensive Hatchery Management Plan and must include consideration of target specificity of the pesticide (insecticide, fungicide, herbicide, etc.), risk to nontarget organisms, incidental reduction of food resources for trust species, persistence, control and prevention of the spread of fish and wildlife diseases, and other environmental hazards.

Land management practices must have high value for fish and wildlife resources, not encourage the exposure to pathogens or development of disease vectors that affect fish or wildlife resources, and they must utilize minimal or no hazardous chemicals. Internal endangered species review, including Section 7 consultation, must be completed for all pest management activities that may affect threatened or endangered species.

Service personnel must be trained in integrated pest management. Those personnel who apply stiffet by pesticides on Service lands must comply with the provisions of the Federal Insecticide, Fungicide and Rodenticide Act and the Endangered Species Act, Department and Service policy, and other applicable laws and regulations. All pesticides must be registered and may only be used in accordance with the pesticide label. Leftover pesticides, rinse water, and empty containers must be disposed of properly. All personnel involved with integrated pest and weed management on and off Service lands must participate in medical surveillance on an annual basis. This program is paid for by the Service from the Field Station budget. Instructions on the land of the surveillance will be issued in a separate memorandum. All pesticides labeled as the land of the lan

12-21-00 ). Andresen "Restricted Use" and "Non-restricted Use" must be applied under the supervision of a certified Pesticide Applicator who holds a current and applicable State certification.

All proposed uses of pesticides and biological control agents, in quantities greater than general household use, on Service lands, facilities or in Service-funded projects will undergo review at the Regional and, if required, at the Departmental level. The exception is projects involving uses of disinfection agents for control of fish and wildlife pathogens and a few other minor exceptions. The Administrative Manual, 30 AM 12, attached, is the latest regulation on this topic and is to be used until new Service regulations are issued. The mechanism used to submit your plan (pesticide, biological controls, and other integrated, sustainable practices, such as herbicide use) for approval is called the PUP, or Pesticide Use Proposal. This request must be submitted at least 30 days prior to use to the Regional Office for review by the Regional Integrated Pest Management Coordinator in Refuges and Wildlife, with a copy to the Assistant Regional Director, Fishery Resources, and will be forwarded to the Washington Office if necessary. A blank PUP form is attached for your use.

If you have any questions, please call Chuck Eggleston at (503) 872-2763, or Scott Stenquist, the Regional Integrated Pest Management Coordinator in National Wildlife Refuges-Operations, at (503) 231-6172.
