Lynda T. Carlson

Division Director

Mary J. Frase

Deputy Director

Ronald S. Fecso

Chief Statistician

Science and Engineering Indicators Program

Rolf F. Lehming

Program Director

DIVISION OF SCIENCE RESOURCES STATISTICS

The Division of Science Resources Statistics (SRS) fulfills the legislative mandate of the National Science Foundation Act to ...

provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government...

To carry out this mandate, SRS designs, supports, and directs periodic surveys as well as a variety of other data collections and research projects. These surveys yield the materials for SRS staff to compile, analyze, and disseminate quantitative information about domestic and international resources devoted to science, engineering, and technology.

If you have any comments or suggestions about this or any other SRS product or report, we would like to hear from you. Please direct your comments to:

ACKNOWLEDGMENTS

Alan Rapoport and Rolf Lehming, Science and Engineering Indicators Program, Division of Science Resources Statistics (SRS), of the National Science Foundation (NSF), provided overall direction and guidance for this report. Mary J. Frase, SRS Deputy Division Director, supplied thoughtful and thorough review of the work. Ronald S. Fecso, SRS Chief Statistician, reviewed early drafts of the report. Other current and former NSF staff attended a number of discussions and seminars about the project and provided useful comments and

suggestions. These include Norman M. Bradburn, Joan S. Burrelli, Lynda T. Carlson, Mary J. Golladay, Susan T. Hill, Kelly H. Kang, Nirmala Kannankutty, Mark C. Regets, and Miron Straf.

Tanya R. Gore and Cheryl S. Roesel of the SRS Information and Technology Services Program (ITSP) provided editorial assistance and final composition for this report. Peg Whalen, ITSP, oversaw electronic publication.

CONTENTS

ACKNOWLEDGMENTS	iii
SECTION 1. INTRODUCTION	1
STUDY DESIGN	1
SUMMARY OF FINDINGS	2
ORGANIZATION OF REPORT	4
SECTION 2. STUDY DESIGN	5
DATA	5
PHASE I STUDY DESIGN	5
PHASE I SAMPLE RESTRICTIONS AND MODEL SPECIFICATIONS	8
PHASE II STUDY DESIGN	10
PHASE II SAMPLE RESTRICTIONS AND MODEL SPECIFICATIONS	12
CONTRIBUTIONS TO THE LITERATURE	13
STUDY LIMITATIONS	14
FUTURE RESEARCH	15
SECTION 3. TENURE ANALYSIS	17
PHASE I TENURE-TRACK ANALYSIS	17
PHASE I TENURE ANALYSIS	20
PHASE II TENURE ANALYSIS	23
SECTION 4. ANALYSIS OF ACADEMIC RANK	27
PHASE I RANK ANALYSIS	27
PHASE II RANK ANALYSIS	32
REFERENCES	37
APPENDICES	
A. STATISTICAL MODELS	39
Logit Analysis	39
Hazard Analysis	40

B. GLOSSARY OF VARIABLE ACRONYMS	41
C. PHASE I MULTIVARIATE LOGIT ANALYSES	47
D. PHASE II MULTIVARIATE HAZARD ANALYSES	139
E. DATA MANAGEMENT AND DATA ISSUES	165
Procedures for Creating Databases	165
Data Issues	165

TEXT TABLES

2-1. Phase I control variables by category	6
2-2. Doctoral fields included in tenure and rank analyses	7
2-3. Phase I models and criteria included	9
2-4. Phase II control variables by category	11
2-5. Phase II models and criteria included	13
3-1. Phase I tenure-track rates by sex	17
3-2. Marginal relations of female variables for Phase I tenure-track models: 8 or 9 years since doctorate	18
3-3. Marginal relations of female variables for Phase I tenure-track models: 14 or 15 years since doctorate	19
3-4. Phase I tenure rates by sex	20
3-5. Marginal relations of female variables for Phase I tenure models: 8 or 9 years since doctorate	21
3-6. Marginal relations of female variables for Phase I tenure models: 14 or 15 years since doctorate	22
3-7. Phase II tenure rates and years to tenure by sex	23
3-8. Marginal relations of female variables for Phase II tenure models	24
4-1. Phase I academic rank by years since doctorate and by sex	27
4-2. Marginal relations of female variables for Phase I rank models: 14 or 15 years since doctorate	29
4-3. Marginal relations of female variables for Phase I rank models: 20 or 21 years since doctorate	30
4-4. Phase II promotion rates and years to rank by sex	32
4-5. Marginal relations of female variables for Phase II rank models: Associate professor	33
4-6. Marginal relations of female variables for Phase II rank models: Full professor	34
