About the North and South Trams

Like the structure of the Gateway Arch itself, the north and south trams are a unique feat of engineering. Completed in 1968 and incorporating principles of conventional elevator, streetcar and Ferris wheel technologies, the trams have traveled over 300,000 miles and safely transported more than 30 million visitors to the observation deck at the top of the Arch. For more information, visit www.nps.gov.

About Maida Engineering, Inc.

Maida Engineering, Inc. is a multi-discipline engineering and architectural firm based in Fort Washington, Pa. Maida offers complete engineering, design and project management services for domestic and international industrial and commercial customers. With an engineering staff experienced in automation, electrical, instrumentation, mechanical, architectural and fire protection disciplines, Maida provides procurement, inspection and construction management for integrated engineering services.
