

**Special Coordination Procedure  
for the  
Use of Frequencies  
901.125/940.125 MHz and 901.175/940.175 MHz  
for Narrowband PCS Systems**

Recognizing that the priority use of frequencies **901.125/940.125 MHz and 901.175/940.175 MHz** for Narrowband PCS operations, pursuant to the *Interim Sharing Arrangement for the Bands 901 - 902 MHz, 930 - 931 MHz and 940 - 941 MHz* between the Federal Communications Commission (FCC) and Industry Canada, remains with the United States;

Considering that KDM Messaging Inc.(KDM) in the United States and LanSer Telecom Inc.(LanSer), in Canada have been granted authority to use these channels on a nationwide basis in their respective countries; and

Considering that both agencies have agreed in principle to the arrangement between KDM and LanSer as outlined in their letter dated September 26, 1994 to both the FCC and Industry Canada;

It is AGREED that:

Industry Canada may authorize the use of **901.125/940.125 MHz and 901.175/940.175 MHz** between Line B and the Canada/U.S. border (hereinafter "the coordination zone"), to the Canadian licensee that has nationwide authority for use of that channel, *provided that* the following conditions are placed on such authorizations:

stations established under this special procedure will respect the technical criteria as outlined in the *"Interim Sharing Arrangement for the Bands 901 - 902 MHz, 930 - 931 MHz and 940 - 941 MHz"*;

agreement will be reached between the Canadian and U.S. licensees for each proposed Canadian station within the coordination zone before it is placed in operation;

The U.S. licensee has priority use of the subject frequencies within the border area and use of that channel by the Canadian licensee within the coordination zone must not adversely affect any U.S. operations;

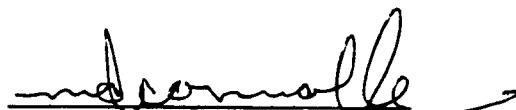

No service may be offered by the Canadian licensee within the U.S.; and

in the event of any harmful interference from Canadian operations within the coordination zone to U.S. operations on this channel, the Canadian licensee would take immediate action to resolve the situation.

This procedure is accepted as an understanding between the Federal Communications Commission and Industry Canada and will become effective on the date of signature by representatives of both agencies.
