Process_Step:

Process_Description: These data were collected, ground truthed, and attributed at the field office in which the wilderness area is located. The Ely, Mount Moriah Wilderness, data had been previously submitted. The Winnemucca, Black Rock Area, data was created and submitted after designations in the Black Rock Desert High Rock Canyon area in 2001. The Las Vegas/Clark County data were created and submitted after the Clark County Conservation of Public Land and Natural Resources Act of 2002. The data were sent from the respective field offices to the State office where they were joined together using ArcInfo 8.2. Tolerance values were reset. Values used: Fuzzy 2.00 Edit 2.00 Node Snap 0.50 Weed 0.50 Grain 0.50 Snap 0.50. After the tolerances were reset the CLEAN command was used. The resulting coverage was standardized according to the NLCS GIS Boundary Data Standard and reviewed for inconsistencies.
