Source: D&R International

This data may be reused and referenced as long as D&R International is cited as the original source.

On behalf of the Department of Energy (DOE), D&R International, Ltd., collects sales data from participating national ENERGY STAR retail partners. Sales data is collected for the four appliance categories that the Department of Energy is responsible for within the ENERGY STAR program. For more detailed reports by quarter, region, and state, please use the spreadsheets available at <http://www.energystar.gov>.

The nature of the ENERGY STAR confidentiality agreements with retail partners prohibits the disclosure of details about the specific source of the data. The retail partners that submitted sales data to the ENERGY STAR program for 2002 may be different from those that submitted sales data for previous years; therefore, direct comparisons from year to year should not be made.

For additional information, please contact Bill McNary at (301)588-9387 or bmcnary@drintl.com.
