

Geothermal Heat Pump Programs Workshop

September 11-12, 2007, Bismarck, N.D.

Sept. 11: Noon – 4:30 p.m.

Sept. 12: 7:30 a.m. – 3 p.m.

Country Inn and Suites

3205 N. 14th Street
Bismarck, ND 58503

As public concern about energy and the environment grows, so does interest in energy-efficient technologies like the geothermal heat pump (GHP). This clean, “green,” heating-and-cooling system could potentially save consumers, utilities and the nation trillions of Btus of energy for space conditioning and water heating.

Learn more about GHPs from the experts at the two-day workshop, *Geothermal Heat Pump Programs*, in Bismarck N.D.

This workshop is for utility staff and management who are interested in:

- assessing the potential for GHP programs
- determining the cost effectiveness of the programs
- hearing about the experiences of utilities with GHP programs
- learning about new GHP technologies

Speakers include:

GUY NELSON – Utility Geothermal Working Group Team Leader

KATHERINE JOHNSON – Market Development Group, author of *Geothermal Heat Pump Report*

GEORG SCHULTZ – USDA Rural Utility Services
