**Title:** Requirements for Generators, Transporters, and Waste Management Facilities Under the RCRA Hazardous Waste Manifest System (Renewal).

**ICR numbers:** EPA ICR No. 0801.16, OMB Control No. 2050-0039.

**ICR Status:** This ICR is scheduled to expire on May 31, 2008. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** The Resource Conservation and Recovery Act (RCRA), as amended, establishes a national program to assure that hazardous waste management practices are conducted in a manner that is protective of human health and

the environment. EPA's authority to require compliance with the manifest system stems primarily from RCRA section 3002(a)(5). This section mandates a hazardous waste manifest "system" to assure that all hazardous waste generated is designated for and arrives at the appropriate treatment, storage, and disposal facility. An essential part of this manifest system is the Uniform Hazardous Waste Manifest (Form 8700-22). The manifest is a tracking document that accompanies the waste from its generation site to its final disposition. The manifest lists the wastes that are being shipped and the final destination of the waste. The manifest system is a self-enforcing mechanism that requires generators, transporters, and owner/operators of treatment, storage, and disposal facilities to participate in hazardous waste tracking. In addition, the manifest provides information to transporters and waste management facility workers on the hazardous nature of the waste, identifies wastes so that they can be managed appropriately in the event of an accident, spill, or leak, and ensures that shipments of hazardous waste are managed properly and delivered to their designated facilities.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 1.8 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Businesses and Farms that generate, transport or receive hazardous waste.

**Estimated Number of Respondents:** 190,628.

**Frequency of Response:** Each shipment.

**Estimated Total Annual Hour Burden:** 3,743,122.

**Estimated Total Annual Cost:** \$109,934,365, which includes

\$106,862,075 annualized labor and \$3,072,290 for capital or O&M costs.

*Changes in the Estimates:* There is an increase of 478,131 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to an increase in the projected number of responses from 1,762,276 previously to 2,074,900.

Dated: May 21, 2008.

Director, Collection Strategies Division.

**Title:** Determine Percentage of High Evaporative Emissions Vehicles in On-road Fleet.

**ICR Number:** EPA ICR No. 2292.01, OMB Control No. 2060-NEW.

**ICR Status:** This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or

form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** In response to recommendations from the National Research Council of the National Academy of Sciences, EPA is initiating a systematic data collection to estimate the fraction of light-duty vehicles with high levels of evaporative emissions. Data to be collected include vehicle type, recent repair history and "in-use" or "real-world" evaporative emission rates.

The collection is a test program, to be conducted by the Office of Transportation and Air Quality (OTAQ) in the Office of Air and Radiation (OAR). This study will combine novel, newly developed test procedures with statistical survey design to estimate the number of vehicles with high evaporative emissions. The new procedures will be developed in a pilot study that will precede the actual test program. Development of new test procedures employing new technology and test methods promises to substantially reduce the cost of evaporative emissions measurement as well as improve the accuracy of these estimates.

The test program itself will be conducted in Region 6, and participation in the program shall be voluntary. The pilot program shall be conducted in EPA Region 8, and participation in it shall also be voluntary. Evaporative emissions will be measured using a variety of methods that will include Remote Sensing, an infra-red camera specifically designed to detect fugitive hydrocarbon emissions and a hydrocarbon sniffer designed for automotive applications. Remote sensing data will be collected prior to a standard I/M test as the vehicle approaches the facility. Those owners solicited that agree to participate in the program shall be provided with a rental car and their vehicle immediately subjected to the test protocol outlined below as resources permit. Following quality-assurance and analysis, the data will be stored in OTAQ's Mobile Source Observation Database.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is
