

## TABLE OF CONTENTS

Executive Summary .....	ES-1
1.0 Introduction.....	1-1
1.1 Background and Organization .....	1-1
1.2 The Comprehensive Procurement Guidelines and Federal Requirements Governing the Use of Recovered Mineral Components (RMCs) in Federal Cement and Concrete Projects .....	1-2
1.3 RMCs Analyzed.....	1-7
2.0 Industry Overview, Materials Evaluated, and Current RMC Substitution Levels .....	2-1
2.1 RMCs Identified by Congress.....	2-2
2.2 Other Materials Evaluated .....	2-12
2.3 Summary of RMC Generation and Beneficial Use.....	2-21
3.0 Energy and Environmental Benefits of RMC Use in Federal Concrete Projects .....	3-1
3.1 Introduction.....	3-1
3.2 Analytical Approach and Model.....	3-1
3.3 Current and Expanded Use Scenarios.....	3-3
3.4 RMC Unit Impact Savings.....	3-7
3.5 Historical Energy and Environmental Impacts of RMC Beneficial Use .....	3-9
3.6 Projected Energy and Environmental Impacts of RMC Beneficial Use.....	3-12
4.0 Barriers to Increased RMC Substitution .....	4-1
4.1 Technical Barriers.....	4-2
4.2 Legal, Regulatory Policy, and Contractual Barriers .....	4-4
4.3 Economic Barriers .....	4-7
4.4 Perceived Safety and Health Risk Barriers.....	4-11
5.0 Mechanisms to Increase the Beneficial Use of RMCs.....	5-1
5.1 Procurement Policies and Material Use Standards .....	5-1
5.2 Education, Technical Assistance, and Recognition Programs.....	5-9
5.3 Economics.....	5-15
6.0 Conclusions.....	6-1
References.....	R-1
Glossary .....	G-1
Abbreviations and Acronyms .....	AA-1

Appendix A: Overview of Portland Cement and Concrete

Appendix B: Background of Recovered Mineral Components

Appendix C: Cement and RMC Producers

Appendix D: RMC Beneficial Use Model - Technical Approach

Appendix E: Summary of Industry Representative Comments on Mechanisms to Increase RMC Substitution
