Dear Mr. Nirenberg:

I am writing an article for ADAM magazine titled "Your Race and Your Intellect". Have you done any research in your department that would have a bearing on this subject genetically or otherwise? For instance, are Scotsmen really thrifty, Indians loyal, Frenchmen sexy?

Could you tell me where I could get information that would show race to be a factor in crime rate, intelligence, personality, alcoholism, drug addiction or any other life pattern that would be of interest to ADAM magazine readers?

Thank you for your interest.

Sincerely,

Frances Bacus
