American Mathematical Association of Two-Year Colleges

AMATYC *Crossroads* Revisited Initiative

Goal: Improving Teacher Knowledge

Summary:

AMATYC has begun the process of updating its 1995 publication, *Crossroads in Mathematics: Standards for Introductory College Mathematics Before Calculus*. The mathematical preparation of future teachers will play a role in the new product, since many future teachers take some or all of their introductory college mathematics while enrolled at a two-year college. It is important that future teachers have a strong mathematical preparation.

Purpose:

To provide a vision and recommendations about the teaching and learning of mathematics in two-year colleges.

Accomplishments/Results:

The *Crossroads Revisited* project has identified an Editor, Writing Team Chairs, Section Writers, and Contributing Writers, and has established an Advisory Committee to provide guidance on the project. Work is in progress on the new product.

Plans for the next 12 months:

Continue the ongoing work of this project.
