AMATYC Program and Curriculum Issues Committee

Goal: IMPROVING TEACHER KNOWLEDGE

Summary:

AMATYC's Program and Curriculum Issues Committee has an active Teacher Preparation subcommittee. A significant outcome of that committee was a Symposium on teacher preparation held at the national AMATYC conference in Chicago in Fall 2000. This same committee ensures that Teacher Preparation is well represented in the annual conference program.

Purpose:

Ensure that Teacher Preparation is part of the annual conference program and identify and work on other ways in which AMATYC can help its members in the area of Teacher Preparation.

Accomplishments/Results:

The above-mentioned Symposium was a highlight, bringing in national speakers and conducting a workshop on Teacher Prep in two-year colleges. Also, the committee works to solicit quality, relevant presentations at the annual AMATYC conference. There are always a significant number of these presentations at every annual AMATYC conference (the next one of which is November 13-16, 2003 in Salt Lake City).

Plans for the next 12 months:

Continue the ongoing work of this committee.
