National Alliance of State Science & Mathematics Coalitions

TEACHER IMPROVEMENT

NASSMC's member coalitions are involved a variety of staff development and professional development programs for teachers. Member coalitions in Connecticut, Maine, Oklahoma, Wyoming, New Hampshire, and New Mexico have sponsored or supported teacher improvement programs in math and science. NASSMC supports and assists in these efforts by helping to identify resources.

The NASSMC -Annenberg/CPB collaboration makes possible and assists coalitions to distribute Annenberg Channel staff development video from coalition web sites.
