

ACKNOWLEDGMENTS

This preliminary compilation of geoenvironmental models represents a monumental effort, completed within a very short time frame, by the authors of the individual models. All of the authors are to be commended for a job well done. I wish to express my thanks to Bill Miller and Ted Theodore who agreed to review the first version of the compilation. This was a huge job, completed with remarkable swiftness, for which I am very grateful. I would also like to thank Alan Wallace, Gerry Czamanske, Steve Ludington, Jeff Doebrich, Gordon Haxel, David John, Dave Lindsey, Rob Zierenberg, Larry Drew, and George Desborough who reviewed various sections of the compilation. Doug Klein and Don Hoover coordinated synthesis of geophysical information pertinent to each of the geoenvironmental models; their efforts are much appreciated.
