A = alkaline option included

P = permanent paper standard/option

PC = postconsumer fiber content

R = recovered material

(1) This requirement may be waived by the ordering agency when purchasing less than a *mill run* quantity and so stated in the procurement document.

(2) This grade is typically a low Government usage paper and currently not readily and/or economically available with postconsumer recovered fiber content.

(3) This grade is typically a low Government usage paper and currently not readily and/or economically available with postconsumer fiber content. If a 10% postconsumer recovered fiber content is desired in the paper, that number will be stated in the procurement document.

(4) Exceeds EO 13101 *minimum content* requirement.

(5) For technological reasons, this grade is currently not readily or economically available with postconsumer fiber content.
