

SUBJECT: Notices for USAID Web Sites

NEW MATERIAL: OMB Memorandum 99-18 requires that every Federal web site include a privacy policy statement, even if the site does not collect any information that results in creating a Privacy Act record. This statement tells the visitors to your site how you handle any information you get from them. Federal agency web sites are highly diverse, and have many different purposes. Every USAID web site, including web sites whose operation is financed under USAID contracts, must have a notice section by December 1, 1999.

POLICY

USAID/General Notice  
LPA/IC  
11/09/1999

SUBJECT: Notices for USAID Web Sites

OMB Memorandum 99-18 requires that every Federal web site include a privacy policy statement, even if the site does not collect any information that results in creating a Privacy Act record. This statement tells the visitors to your site how you handle any information you get from them. Federal agency web sites are highly diverse, and have many different purposes.

1. DUE DATE. Every USAID web site, including web sites whose operation is financed under USAID contracts, must have a notice section by December 1, 1999.
2. HOME PAGE. The notice must be accessible from the home page (i.e.: the first page visible to the viewer) of each site
3. CONTENT. Your notice must deal with the following subjects:  
Privacy Notice | Security Notice | General Disclaimer | Disclaimer of Endorsement | Disclaimer of Liability | Links to this Web Site or Its Contents | Links to Other Sites | Copyright Notice | Computer Fraud and Abuse Act | Site Management | Verification or Hard Copy of Content | For More Information

[NOTE: For further information on the Security Notice see ADS 545 and General Notice on "Pre-Logon Automated Data Processing System Warning", September 28, 1999]

Attached is the notice for the USAID external web site that can be used as a model. Also attached are the OMB Memorandum and its attachment "GUIDANCE AND MODEL LANGUAGE FOR FEDERAL WEB SITE PRIVACY POLICIES" which provides useful

guidance and model language. You need to analyze what information is being collected and tailor your notice accordingly.

Point of Contact: Joe Fredericks, Acting Chief, LPA/IC, (202) 712-0502.

Notice 1124

### **USAID Privacy and Security Information**

**Privacy Notice | Security Notice | General Disclaimer | Disclaimer of Endorsement | Disclaimer of Liability | Links to this Web Site or Its Contents | Links to Other Sites | Copyright Notice | Computer Fraud and Abuse Act | Site Management | Verification or Hard Copy of Content | For More Information**

#### **Privacy Notice**

#### **USAID PRIVACY STATEMENT**

This section of the page explains how the U.S. Agency for International Development will handle information we learn about you from your visit to our website. The information we receive depends upon what you do when visiting our site.

\* If you visit our site to read or download information, such as country information or information about one of our projects:

We collect and store only the following information about you: the name of the domain from which you access the Internet (for example, aol.com, if you are connecting from an America Online account, or iowa.edu if you are connecting from the University of Iowa's domain); the date and time you access our site, the Internet address of the website from which you linked directly to our site; and what information you view while you visit our web site.

We use the information we collect to measure the number of visitors to the different sections of our site, find out what information is the most viewed, and to help us make our web site more useful to visitors.

This gathering and storing of information is separate from the activity described as monitoring in our Security Notice.

The information gathered is used for two purposes: site management and, in the case of suspected unauthorized activity, for law enforcement and possible criminal prosecution (see Security Notice).

\* If you identify yourself by sending us a comment using our contact page or an E-mail:

You also may decide to send us personally-identifying information, for example, in an electronic mail message asking a question or providing us with a comment or suggestion. We use personally-identifying information to respond to your comment or suggestion, and to count the number of people sending us comments. In certain instances, your comment or suggestion may be forwarded to other U.S. government agencies or departments if they are in the best position to respond to your message.

We want to be very clear: We will not obtain personally-identifying information about you when you visit our site, unless you choose to provide such information to us.

### **Cookies and other information stored on your computer**

In general, this site does NOT use the "cookies" that some Web sites use to gather and store information about your visits to their sites.

However, please note that one specific site [<http://gemini.info.usaid.gov/yellowbook/>] associated with these web pages sets cookies. These cookies are set only to facilitate the rapid transmission of information. No personal information is gathered or requested by these "cookies."

Cookies are essentially tokens of information, such as preferences and passwords, which some Web servers collect from you when you access them. That data is stored on your hard drive-not on the Web site's server. Whenever you visit a "cookie" site, the server looks for its cookie on your hard drive and, if found, then reads the information it stored there. Cookies generally are stored in your browser's directory or folder in a file named cookie.txt (MagicCookie on a Macintosh).

### **Security Notice**

For SITE SECURITY purposes and to ensure that this service remains available to all users, this government computer system employs software programs to monitor network traffic to identify unauthorized attempts to upload or change information, or otherwise cause damage.

Unauthorized attempts to upload information or change information on this service are strictly prohibited and may be punishable under the Computer Fraud and Abuse Act of 1986 and the National

Information Infrastructure Protection Act."

### **General Disclaimer**

Information presented on this Web site is considered public information and may be distributed or copied freely unless identified as being subject to copyright protection. In return, we request only that USAID be cited as the source of any information, photos, and images copied from this site and that any photo credits or bylines be similarly credited to the photographer or author.

We strongly recommend that USAID data be acquired directly from this Web site and not through other sources that may change the information in some way or exclude material crucial to the understanding of that information. While we make every effort to provide accurate and complete information, some information may change between site updates. Substantive changes may be noted when content is next updated.

[Return to top]

### **Disclaimer of Endorsement**

The documents posted on this Web site may contain hypertext links or pointers to information created and maintained by other public and private organizations. These links and pointers are provided for visitors' convenience. We do not control or guarantee the accuracy, relevance, timeliness, or completeness of any linked information. Further, the inclusion of links or pointers to Web sites other than a USAID-managed Web site is not intended to assign importance to those sites and the information contained therein, nor is it intended to endorse, recommend, or favor any views expressed, or commercial products or services offered on these outside sites, or the organizations sponsoring the sites, by trade name, trademark, manufacture, or otherwise.

Reference in this Web site to any specific commercial products, processes, or services, or the use of any trade, firm or corporation name is for the information and convenience of the site's visitor's, and does not constitute endorsement, recommendation, or favoring by the United States Government or USAID.

The views and opinions of authors expressed herein do not necessarily state or reflect those of the U.S. Government or the USAID, and shall not be used for advertising or product endorsement purposes.

[Return to top]

### **Disclaimer of Liability**

Every effort is made to provide accurate and complete information. However, with the thousands of documents available, often uploaded within short deadlines, we cannot guarantee that there will be no errors. We make no claims, promises or guarantees about

the accuracy, completeness, or adequacy of the contents of this Web site and expressly disclaim liability for errors and omissions in the contents of this Web site.

With respect to the content of this site, neither the United States Government, nor USAID, nor their employees and contractors make any warranty, expressed or implied or statutory, including but not limited to the warranties of non-infringement of third party rights, title, and the warranties of merchantability and fitness for a particular purpose with respect to content available from this USAID Web site or other Internet resources linked from it. Additionally, neither the U.S. Government nor USAID assume any legal liability for the accuracy, completeness, or usefulness of any information, product, or process disclosed herein nor freedom from computer virus, and do not represent that use of such information, product, or process would not infringe on privately owned rights.

[Return to top]

### **Links to this Web Site or Its Contents**

You may freely link to this Web site or any of its content. We ask only that you identify that the link is to a Internet resource.

[Return to top]

### **Links to Other Sites**

Our Web site has links to other United States Government agencies and to private organizations, who we believe are relevant to our agency's mission. Once you link to another site, you are subject to the disclaimers and security and privacy policies of the new site.

[Return to top]

### **Copyright Notice**

Unless a copyright is indicated, information on this Web site is in the public domain and may be reproduced, published or otherwise used without USAID's permission. We request that USAID be cited as the source of the information and that any photo credits or bylines be similarly credited to the photographer or author or USAID, as appropriate.

If a copyright is indicated on a photo, graphic, or any other material, permission to copy these materials must be obtained from the original source.

This copyright notice does not pertain to information at Web sites other than this Web site.

[Return to top]

### **Computer Fraud and Abuse Act**

Unauthorized attempts to upload information and/or change information on this Web site is strictly prohibited and is subject to prosecution under Title 18 U.S.C., Sections 1001 and 1030). [See Security Notice]

[Return to top]

### **Site Management**

The Bureau for Legislative and Public Affairs' Information Center and the Bureau for Management, Office of Information Resource Management, manages the overall information content, design, and, organization of this Web site and coordinates release of USAID information on the Internet.

[Return to top]

### **Verification or Hard Copy of Content**

If you would like verification or a hard copy of information released on this USAID Web site, contact our staff:

Information Center  
U.S. Agency for International Development  
Washington, D.C. 20523-1000  
Phone: 202-712-4810  
Fax: 202-216-3524

[Return to top]

### **For More Information**

If you have any questions or comments about the information presented here, please contact USAID at the address or phone or fax numbers listed above.

M-99-18

June 2, 1999

MEMORANDUM FOR THE HEADS OF EXECUTIVE DEPARTMENTS AND AGENCIES

FROM: Jacob J. Lew

Director

SUBJECT: Privacy Policies on Federal Web Sites

This memorandum directs Departments and Agencies to post clear privacy policies on World Wide Web sites, and provides guidance for doing so. As a first priority, you must post privacy policies to your Department or Agency's principal web site by September 1, 1999. By December 1, 1999, add privacy policies to any other known, major entry points to your sites as well as at any web page where you collect substantial personal information from the public. Each policy must clearly and concisely inform visitors to the site what information the agency collects about individuals, why the agency collects it, and how the agency will use it. Privacy policies must be clearly labeled and easily accessed when someone visits a web site.

Federal agencies must protect an individual's right to privacy when they collect personal information. This is required by the Privacy Act, 5 U.S.C. 552a, and OMB Circular No. A-130, "Management of Federal Information Resources," 61 Fed. Reg. 6428 (Feb. 20, 1996), and supported by the Principles for Providing and Using Personal Information published by the Information Infrastructure Task Force on June 6, 1995. Posting a privacy policy helps ensure that individuals have notice and choice about, and thus confidence in, how their personal information is handled when they use the Internet.

New information technologies offer exciting possibilities for improving the quality and efficiency of government service to the American people. Web sites are a powerful tool for conveying information on topics relating to activities, objectives, policies and programs of the Federal Government. Web pages provide a simple and speedy means of gaining access to information about the Government, thereby increasing knowledge and understanding of what Government is doing on the people's behalf. Looking ahead, as contemplated for instance by the Government Paperwork Elimination Act, people will conduct more and more business and other activities with the Government electronically. We cannot realize the full potential of the web until people are confident we protect their privacy when they visit our sites.

To assist Departments and Agencies in reviewing their existing privacy policy or in creating such a policy, I have attached guidance and model privacy language for several different information practices that may apply to your web sites. You can use the model language verbatim, or as a starting point in crafting a policy tailored to meet your own requirements and needs.

For any questions about this guidance, contact Peter P. Swire, Chief Counselor for Privacy, Office of Management and Budget, phone (202) 395-1095, fax (202) 395-5167, e-mail [Peter\\_Swire@omb.eop.gov](mailto:Peter_Swire@omb.eop.gov). To provide assistance to Agencies and Departments in implementing web privacy policies, Mr. Swire will form a Steering Committee for Federal Agency Privacy Policies.

Attachment: Guidance and Model Language for Federal Web Site Privacy Policies

June 1, 1999

## **GUIDANCE AND MODEL LANGUAGE FOR FEDERAL WEB SITE PRIVACY POLICIES**

Every Federal web site must include a privacy policy statement, even if the site does not collect any information that results in creating a Privacy Act record. This statement tells the visitors to your site how you handle any information you get from them. Federal agency web sites are highly diverse, and have many different purposes. The privacy policies that agencies write for those sites are also diverse. Agencies must tailor their statements to the information practices of each individual site. It is important to post your site's policy promptly, so visitors to your site know the site's information practices.

This attachment provides guidance and model language on privacy statements. You can use this guidance and model language to help identify the issues that privacy policies must cover, draft the language, and get it approved. This will allow you to post your policies expeditiously.

Agencies have been carrying out reviews of their systems of records notices to implement the President's Memorandum of May 14, 1998. Agencies should have sent their reports on their reviews to OMB by May 14, 1999. If you have not already done so, at this time you should post a general privacy policy on your Department and Agency web sites. The statement should include a clear overall description of your privacy practices. Do NOT delay creating this privacy policy until you revise all your agency's systems of records.

This attachment provides a brief discussion of different information practices, followed where appropriate by one or more samples from existing federal web sites and by a URL for each of those samples. The discussion is based on analysis by the Steering Committee for Federal Agency Privacy Policies. The members of the committee are listed at the end of this attachment. The Steering Committee includes representatives of different parts of agencies that may play a role in creating web privacy policies, such as web masters, Chief Information Officers, General Counsels, Privacy Act officials, and designated privacy policy officials. You can contact members of the Steering Committee to talk about their experiences in creating privacy policies.

This document provides guidance on the following situations:

- (1) Introductory language.
- (2) Information collected and stored automatically.
- (3) Information collected from e-mails and web forms.
- (4) Security, intrusion, and detection language.
- (5) Significant actions where information may be subject to the Privacy Act.

### **(1) Introductory language.**

*Discussion:* Web sites are the front door for many contacts by individuals with the government. Having clear overview language about your privacy practices at the start

of the policy can provide a helpful introduction to a web policy.

Web privacy policies can reassure individuals that information you collect about them when they visit your site will be well and appropriately handled. You should write such reassurances in plain English.

*Sample One:*

"Thank you for visiting the White House Website and reviewing our privacy policy. Our privacy policy is clear: We will collect **no** personal information about you when you visit our website unless you choose to provide that information to us.

*Source:* [www.whitehouse.gov/WH/html/privacy.html](http://www.whitehouse.gov/WH/html/privacy.html).

*Sample Two:*

"The privacy of our customers has always been of utmost importance to the Social Security Administration. In fact our first regulation, published in 1937, was written and published to ensure your privacy. Our concern for your privacy is no different in the electronic age.

Our Internet privacy policy is:

- You do not have to give us personal information to visit our site.
- We collect personally identifiable information (name, email address, Social Security number, or other unique identifier) only if specifically and knowingly provided by you.
- Personally identifying information you provide will be used only in connection with Social Security Online or for such other purposes as are described at the point of collection.
- Information is collected for statistical purposes and SSA sometimes performs analyses of user behavior in order to measure customer interest in the various areas of our site. We will disclose this information to third parties only in aggregate form.
- We do not give, sell or transfer any personal information to a third party.
- We do not enable "cookies." (A "cookie" is a file placed on your hard drive by a Web site that allows it to monitor your use of the site, usually without your knowledge.)

*Source:* [www.ssa.gov/privacy.html](http://www.ssa.gov/privacy.html)

## **(2) Information collected and stored automatically.**

*Discussion:* In the course of operating a web site, certain information may be collected automatically in logs or by cookies. Some agencies may be able to collect a great deal of information, but by policy elect to collect only limited information. In some instances,

agencies may have the technical ability to collect information and later take additional steps to identify people, such as by looking up static Internet Protocol addresses that can be linked to specific individuals. Your policy should make clear whether or not you are collecting this type of information and whether you will take further steps to collect more information.

*Sample One:*

### **"Information Collected and Stored Automatically**

If you do nothing during your visit but browse through the website, read pages, or download information, we will gather and store certain information about your visit automatically. This information does not identify you personally. We automatically collect and store **only** the following information about your visit:

1. The Internet domain (for example, "xcompany.com" if you use a private Internet access account, or "yourschool.edu" if you connect from a university's domain) and IP address (an IP address is a number that is automatically assigned to your computer whenever you are surfing the Web) from which you access our website;
2. The type of browser and operating system used to access our site;
3. The date and time you access our site;
4. The pages you visit; and
5. If you linked to the White House website from another website, the address of that website.

We use this information to help us make our site more useful to visitors -- to learn about the number of visitors to our site and the types of technology our visitors use. We do not track or record information about individuals and their visits.

*Source:* [www.whitehouse.gov/WH/html/privacy.html](http://www.whitehouse.gov/WH/html/privacy.html).

*Sample Two:*

"This is how we will handle information we learn about you from your visit to our website. The information we receive depends upon what you do when visiting our site.

If you visit our site to read or download information, such as consumer brochures or press releases:

We collect and store only the following information about you: the name of the domain from which you access the Internet (for example, aol.com, if you are connecting from an America Online account, or princeton.edu if you are connecting from Princeton University's domain); the date and time you access our site; and the Internet address of the website from which you linked directly to our site.

We use the information we collect to measure the number of visitors to the different

sections of our site, and to help us make our site more useful to visitors.

Source: [www.ftc.gov/ftc/privacy1.htm](http://www.ftc.gov/ftc/privacy1.htm).

*Sample Three:*

"Example Information Collected for Statistical Purposes

Below is an example of the information collected based on a standard request for a World Wide Web document:

```
xxx.yyy.com - - [28/Jan/1997:00:00:01 -0500]
"GET /sitename/news/nr012797.html HTTP/1.0" 200 16704
Mozilla 3.0/www.altavista.digital.com
```

xxx.yyy.com (or 123.123.23.12) -- this is the host name (or IP address) associated with the requester (you as the visitor). In this case, (...com) the requester is coming from a commercial address. Depending on the requestor's method of network connection, the host name (or IP address) may or may not identify a specific computer. Connections via many

Internet Service Providers assign different IP addresses for each session, so the host name identifies only the ISP. The host name (or IP address) will identify a specific computer if that computer has a fixed IP address.

[28/Jan/1997:00:00:01 -0500] -- this is the date and time of the request

"GET /sitename/news/nr012797.html HTTP/1.0" - this is the location of the requested file

200 -- this is the status code - 200 is OK - the request was filled

16704 -- this is the size of the requested file in bytes

Mozilla 3.0 -- this identifies the type of browser software used to access the page, which indicates what design parameters to use in constructing the pages

www.altavista.digital.com -- this indicates the last site the person visited, which indicates how people find this site

Requests for other types of documents use similar information. No other user-identifying information is collected.

Source: [www.defenselink.mil/warning/example.html](http://www.defenselink.mil/warning/example.html)

### **(3) Information Collected from E-mails and Web Forms.**

*Discussion:* Many websites receive identifiable information from e-mails or web forms. Some statement is appropriate about how the identifiable information is treated when the individual provides it. One general and helpful comment is to say (when it is true) that you only use information included in an e-mail for the purposes provided and that the information will be destroyed after this purpose has been fulfilled.

*Sample One:*

The Federal Trade Commission has two levels of disclosure. On its principal privacy policy page, it states the following:

"If you identify yourself by sending an E-mail:

You also may decide to send us personally-identifying information, for example, in an electronic mail message containing a complaint. We use personally-identifying information from consumers in various ways to further our consumer protection and competition activities. Visit Talk to Us to learn what can happen to the information you provide us when you send us e-mail."

*Source:* [www.ftc.gov/ftc/privacy1.htm](http://www.ftc.gov/ftc/privacy1.htm).

The FTC then has the following disclosure at its "Talk to Us" link:

You can contact us by postal mail, telephone, or electronically, via an on-line form. Before you do, there are a few things you should know.

The material you submit may be seen by various people. We may enter the information you send into our electronic database, to share with our attorneys and investigators involved in law enforcement or public policy development. We may also share it with a wide variety of other government agencies enforcing consumer protection, competition, and other laws. You may be contacted by the FTC or any of those agencies. In other limited circumstances, including requests from Congress or private individuals, we may be required by law to disclose information you submit.

Also, e-mail is not necessarily secure against interception. If your communication is very sensitive, or includes personal information like your bank account, charge card, or social security number, you might want to send it by postal mail instead."

*Source:* [www.ftc.gov/ftc/talk\\_to\\_us.htm](http://www.ftc.gov/ftc/talk_to_us.htm).

#### **(4) Security, Intrusion, Detection Language.**

*Discussion:* Many webmasters use information collected on a site to detect potentially harmful intrusions and to take action once an intrusion is detected. In some situations, the policy of the agency may be not to collect personal information such as from IP logs. In the event of authorized law enforcement investigations, however, and pursuant to any required legal process, information from those logs and other sources may be used to help identify an individual.

*Sample One:*

The Department of Defense uses the following language to alert users that information may be collected for security purposes:

"4. For site security purposes and to ensure that this service remains available to all users, this government computer system employs software programs to monitor network traffic to identify unauthorized attempts to upload or change information, or otherwise cause damage.

5. Except for authorized law enforcement investigations, no other attempts are made to identify individual users or their usage habits. Raw data logs are used for no other purposes and are scheduled for regular destruction in accordance with National Archives and Records Administration guidelines.

6. Unauthorized attempts to upload information or change information on this service are strictly prohibited and may be punishable under the Computer Fraud and Abuse Act of 1986 and the National Information Infrastructure Protection Act."

*Source:* [www.defenselink.mil/warning/warn-dl.html](http://www.defenselink.mil/warning/warn-dl.html).

*Sample Two:* Department of Justice Privacy and Security Notice:

"For SITE SECURITY purposes and to ensure that this service remains available to all users, this Government computer system employs software programs to monitor network traffic to identify unauthorized attempts to upload or change information, or otherwise cause damage.

NOTICE: We will not obtain personally-identifying information about you when you visit our site, unless you choose to provide such information to us."

*Source:* [www.usdoj.gov/privacy-file.htm](http://www.usdoj.gov/privacy-file.htm)

## **(5) Significant actions where information enters a System of Records.**

*Discussion:* To date, a large fraction of federal web pages have not collected significant amounts of identifiable information in ways that entered directly into systems of records covered by the Privacy Act. Looking ahead, a greater range of actions may take place based on information provided to web sites. Examples might include electronic commerce transactions or updating of information about eligibility for benefits.

In systems of records where traditional paper collections of information are supplemented or replaced by electronic forms offered through a web site, the rules of the Privacy Act continue to apply. For situations where a Privacy Act notice would be required in the paper-based world, the general principle is that the equivalent notice is required in the on-line world. Posting of the relevant Privacy Act notice on the web page or through a well-marked hyperlink would be appropriate.

## **Steering Committee for Federal Agency Privacy Policies**

The Steering Committee has helped develop the guidance in this document, drawing on the diverse functional experience of its members. Its members are available for questions

and comments on the development of agency web privacy policies.

Peter Swire (chair), Chief Counselor for Privacy, Office of Management and Budget, phone (202) 395-1095, e-mail Peter\_Swire@omb.eop.gov.

Roger Baker, Chief Information Officer, Department of Commerce, phone (202) 482-4797, e-mail rbaker@doc.gov.

John Bentivoglio, Chief Privacy Officer, Department of Justice, phone (202) 514-2707, e-mail john.t.bentivoglio@usdoj.gov.

Ruth Doerflein, Internet/Intranet Program Manager, Department of Health and Human Services, phone (202) 690-5709, e-mail rdoerfle@us.dhhs.gov.

Peggy Irving, Director, Office of the Privacy Advocate, Internal Revenue Service, phone (202) 283-7755, e-mail peggy.a.irving@m1.irs.gov (note: the number "1" follows @m).

Vahan Moushegian, Jr., Director, Defense Privacy Office, Department of Defense, phone (703) 607-2943, e-mail Vahan.Moushegian@osd.pentagon.mil.

Andy Pincus, General Counsel, Department of Commerce, phone (202) 482-4772, e-mail apincus@doc.gov.

The following two persons from the Federal Trade Commission are not members of the Steering Committee. They have worked with privacy policies for both the public and private sector, however, and have offered to be available for questions from those working on agency policies:

~~Martha Landesberg, attorney, Federal Trade Commission, phone (202) 326-2825, e-mail mlandesberg@ftc.gov. David Medine, Associate Director for Financial Practices, Federal Trade Commission, phone (202) 326-3025, e-mail dmedine@ftc.gov.~~
