

THE GOING-TO-THE-SUN ROAD PROJECT TRAVEL INFORMATION

For the week of August 13-19, 2007

Starting Monday, September 17, 2007, the alpine section of the Sun Road between the west tunnel and Haystack Creek will close for the season to accommodate accelerated road work; therefore, vehicle access to Logan Pass from the west will not be available for the remainder of the fall season beginning September 17. East of Logan Pass, a washout must be repaired and a temporary bridge removed before winter. A fall season east side schedule will soon be announced for this work.

Construction crews are continuing masonry work above the west tunnel. From now until September 17, 4 hour delays will be in effect between 10 p.m. and 6 a.m. Sunday to Friday. All other times, expect 30 minute delays. Pilot cars are escorting traffic between the west side tunnel and one mile above the loop. Vehicles higher than 10' are discouraged from traveling through the construction zone because of the existing rock cuts. Watch for construction traffic.

Note: Nighttime travelers may drive U.S. Highway 2.

PLEASE NOTE: July 1st through Labor Day, the new Glacier National Park shuttle system is available as an option for free transportation to locations along the road. Depending on the route, the buses depart every 15 to 30 minutes. The last buses leave Logan Pass at 9:30 pm. The shuttle system is not intended to accommodate large tour groups, which may need to separate into several buses and could lead to excessive delays for these groups. Stop by the Apgar Transit Center or St. Mary Visitor Center for additional information and park trip-planning resources.
