

## **ACKNOWLEDGMENTS**

EPA and SOCMA would like to offer our sincere thanks to the following individuals for their help by sharing their knowledge of environmental management systems and plant operations. Through their generous donation of time and effort, we were able to develop this guide for the specialty-batch chemical sector.

Ken Frato  
Environmental, Health and Safety Manager  
Lubrizol Corporation

Seth Levine  
Senior Director, Regulatory Affairs  
Cambrex Corporation

Roland Mostovy  
Manager, Employee/Process Safety  
International Specialty Products

Rich Rosera  
Manager, Environmental and Regulatory Concerns  
Lubrizol-Dock Resins

Mike Shatynski  
Environmental Compliance Manager  
Rhodia ChiRex, Inc.

Christine Weber  
Environmental, Safety and Health Manager  
Flexsys America, LP

We would also like to thank and credit McGean, Inc. for the use of their photo on the cover.

## Table of Contents

### ***Introduction***

|                                     |     |
|-------------------------------------|-----|
| Introduction and User’s Guide ..... | iii |
| Index of Exhibits and Examples..... | v   |

### **Plan**

|   |     |
|---|-----|
| Module 1: Laying the Groundwork for EMS .....     | 1-1 |
| Module 2: Structure and Responsibility.....       | 2-1 |
| Module 3: Environmental Policy.....               | 3-1 |
| Module 4: Legal and Other Requirements.....       | 4-1 |
| Module 5: Environmental Aspects .....             | 5-1 |
| Module 6: Objectives and Targets.....             | 6-1 |
| Module 7: Environmental Management Programs ..... | 7-1 |

### **Do**

|  |      |
|--|------|
| Module 8: Training, Awareness, and Competence .....  | 8-1  |
| Module 9: Communication.....                         | 9-1  |
| Module 10: EMS Documentation.....                    | 10-1 |
| Module 11: Document Control.....                     | 11-1 |
| Module 12: Operational Control .....                 | 12-1 |
| Module 13: Emergency Preparedness and Response ..... | 13-1 |

### **Check and Act**

|   |      |
|---|------|
| Module 14: Monitoring and Measurement .....                         | 14-1 |
| Module 15: Nonconformance and Corrective and Preventive Action..... | 15-1 |
| Module 16: Records.....   | 16-1 |
| Module 17: EMS Audits.....  | 17-1 |
| Module 18: Management Review.....                                   | 18-1 |

### **Appendices**

|   |  |
|---|--|
| A | Glossary   |
| B | Integration of Environmental Management Systems and Quality Management Systems |
| C | Health and Safety Integration Questionnaire                                    |
| D | Environmental Aspect/Impact Ranking  |
| E | Additional Tools   |
| F | EPA-sponsored EMS Source Documents   |

## **INTRODUCTION AND USER'S GUIDE**

This Environmental Management Systems Implementation Guide for the Specialty-Batch Chemical Manufacturing Industry (EMS Guide) is a combination of examples and tools from U.S. Environmental Protection Agency (EPA)-sponsored EMS source documents (see Appendix F for an annotated list of sources) and actual industry examples developed during a Synthetic Organic Chemical Manufacturers Association (SOCMA) EMS Guide development project, supported by EPA's Sector Strategies Division.

The EMS Guide is meant to assist specialty-batch chemical manufacturing facilities in weaving environmental decision-making into the fabric of the way they do business.

The purpose is not only to achieve better compliance assurance, but also to improve environmental performance in areas such as resource conservation, energy efficiency, water-use efficiency, hazardous and non-hazardous waste reduction, and mitigation of impacts associated with noise, odor, and dust. As a result of comprehensive planning, rigorous implementation, regular checking, and effective corrective action, EMSs are helping facilities to consistently meet their environmental goals and commitments. Specialty-batch chemical manufacturing facilities that have an effective EMS are becoming more efficient, more competitive, and better able to meet other crucial challenges, such as increased security.

Many specialty-batch chemical manufacturing facilities have components of an EMS already in place. This EMS Guide encourages the user to identify and build on existing components whenever possible. It describes an EMS that is based on the elements of the ISO 14001 standard and also incorporates EPA's National Environmental Performance Track (Performance Track) emphasis on sustained compliance, pollution prevention, and information sharing with the community. Though there are other types of EMSs that one could adopt, and EPA does not specifically endorse any individual EMS standard, the ISO 14001 EMS is the most widely recognized and one that many companies are beginning to require their suppliers to adopt. Therefore, moving in the direction of implementation and maintenance of an EMS based on the ISO 14001 standard may be a wise business decision. The choice to build an EMS that, if desired, could be certified in the future, may make sense for you based on your business goals and needs. Facilities implementing an EMS that meets the requirements of the ISO 14001 standard can either self-declare conformance or seek third-party registration.

To facilitate your implementation process, this EMS Guide contains 18 modules—an initial "laying the groundwork" module followed by 17 modules, each of which corresponds to an ISO 14001 EMS element. Each module contains:

- Background information that explains the EMS element and recommends what should be established and maintained for this element to be suitable and effective;
- A summary checklist that presents the main points in simple step-wise form;
- Sample procedures as required by the ISO 14001 EMS standard, and accompanying forms that will be used to document conformance with the procedures. The procedures are meant to serve as

templates that can be customized by your facility to define roles, responsibilities, activities, and record keeping for that EMS element; and

- Examples of how a facility might document and record information associated with the requirements of its EMS. Usually these are examples of how to complete the recommended forms.

The EMS Guide recommends that facilities establish, at a minimum, the several documented procedures required by the ISO 14001 EMS Standard. An index of sample procedures and forms is provided as ***Exhibit 11-3: Master Document List for EMS Manual***. When you create an EMS for your facility, you will want to adopt a labeling system for identifying procedures, forms, and work instructions. As you can see in the index of procedures and forms, this EMS Guide uses a hypothetical labeling system wherein environmental procedures (EP) that apply facility-wide are labeled EP-001 to EP-017. The first form associated with EP-003 is labeled EF-003.01 and the second form associated with EP-003 is labeled EF-003.02, and so forth. Environmental work instructions (EWI) that apply to a subset of the whole facility are labeled EWI-001 to EWI-003. The first form associated with EWI-001 is labeled EWI-001.01 and the second form associated with EWI-001 is labeled EWI-001.02, and so forth.

In this EMS Guide are sample procedures and other examples of how a facility might document and record its EMS. Revising these examples should be much easier than starting with a blank page. However, when using these examples, it is crucial to review the requirements of your facility in accordance with company policies and the most recent federal, state, and local requirements.

Definitions of EMS terms used in this EMS Guide are provided in the text, as well as in Appendix A—Glossary.

## **INDEX OF EXHIBITS AND EXAMPLES**

### **Module 1: Laying the Groundwork for EMS**

---

Exhibit 1-1: EMS Program Costs

Exhibit 1-2: EMS Program Savings

Exhibit 1-3: “Plan, Do, Check, Act” Model

Exhibit 1-4: EMS Model

Exhibit 1-5: Gap Analysis Tool/Self-Assessment Checklist

Exhibit 1-6: Sample Worksheet for People Responsible for EMS Development

### **Module 2: Structure and Responsibility**

---

Exhibit 2-1: EMS Expertise and Roles Across Facility Functions

Exhibit 2-2: Summary Checklist

Exhibit 2-3: EMS Responsibilities Descriptions

Exhibit 2-4: EMS Responsibilities Form

Example 2-1: Responsibility Matrix

Example 2-2: Sample Organization Chart

### **Module 3: Environmental Policy**

---

Exhibit 3-1: Summary Checklist

Exhibit 3-2: Environmental Policy Template

Example 3-1: Sample Environmental Policies

### **Module 4: Legal and Other Requirements**

---

Exhibit 4-1: Summary Checklist

Exhibit 4-2: Procedure for Identification of Legal and Other Requirements (EP-001)

Exhibit 4-3: Information Resources for Legal Requirements

Exhibit 4-4: Procedure for Obtaining Agency Approval (EP-002)

Example 4-1: Commonly Applicable Federal Environmental Laws in the U.S.

Example 4-2: Sample List of Relevant Legal and Other Requirements for Specialty-Batch Chemical Manufacturers

### **Module 5: Environmental Aspects**

---

Exhibit 5-1: Cause and Effect – Environmental Aspects and Environmental Impacts

Exhibit 5-2: Selected Techniques and Data Sources for Identifying and Evaluating Environmental Aspects and Impacts

Exhibit 5-3: A List of Common Activities and Processes with Functional Areas at Specialty-Batch Chemical Manufacturing Facilities

Exhibit 5-4: Summary Checklist

Exhibit 5-5: Significant Environmental aspects as a Basis for Operational Controls and Objectives and Targets

Exhibit 5-6: Procedure for Environmental Aspects, Objects and Targets, and Programs (EP-003)

Example 5-1: Flow Diagram and Aspects Form for Centralized Air Pollution Control Operations

Example 5-2: Flow Diagram and Aspects Form for QC Laboratory

Example 5-3: Flow Diagram and Aspects Form for a Pressurized Reactor Operation

Example 5-4: Flow Diagram and Aspects Form for Packaging Area

Example 5-5: Flow Diagram and Aspects Form for Raw Materials Handling and Storage

Example 5-6: Flow Diagram and Aspects Form for Wastewater Treatment Plant Operations

## Module 6: Objectives and Targets

---

Exhibit 6-1: Considerations for Developing Objectives and Targets

Exhibit 6-2: Summary Checklist

Example 6-1: Improvement Objectives and Targets Organized by Category

## Module 7: Environmental Management Programs

---

Exhibit 7-1: Summary Checklist

Exhibit 7-2: Environmental Management Program(s) Form (EF-003.03)

Exhibit 7-3: Procedure for Environmental Review for New Purchases, Processes, and Products (EP-010)

Example 7-1: EMP for Energy and Water Use Reductions

Example 7-2: EMP for Reduction of Permitted Air Emissions

Example 7-3: EMP for Process Wastewater Treatment Optimization

Example 7-4: EMP for Hazardous and Non-hazardous Waste Reduction

Example 7-5: EMP for PCB Elimination

## Module 8: Training, Awareness, and Competence

---

Exhibit 8-1: Two Areas of EMS Training

Exhibit 8-2: Summary Checklist

Exhibit 8-3: Procedure for Environmental Training and Awareness (EP-008)

Example 8-1: Training Needs Analysis Matrix

## Module 9: Communication

---

Exhibit 9-1: Levels of Stakeholder Interest

Exhibit 9-2: Summary Checklist

Exhibit 9-3: Communications Program Matrix

Exhibit 9-4: Procedure for Communication with Stakeholders (EP-004)

Example 9-1: Case Study – Working with Stakeholders

Example 9-2: Communications Program Matrix

## Module 10: EMS Documentation

---

Exhibit 10-1: Summary Checklist

Exhibit 10-2: Worksheet for Development of EMS Documentation

Exhibit 10-3: EMS Manual

## Module 11: Document Control

---

Exhibit 11-1: Summary Checklist

Exhibit 11-2: Procedure for Document Control (EP-014)

Exhibit 11-3: Master Document List for EMS Manual

## Module 12: Operational Control

---

Exhibit 12-1: Summary Checklist

Exhibit 12-2: Partial List of Typical Activity Areas and Operational Controls at Specialty-batch Chemical Manufacturing Facilities

Exhibit 12-3: Procedure for Contractors and Sub-contractors (EP-016)

Example 12-1: Worksheet for Linking SEAs to Operational Controls, Measurement Indicators, Job Functions, Responsible Parties, and Locations of Documents

Example 12-2: Operational Control for Container Labeling (EWI-001)

Example 12-3: Operational Control for Hazardous Waste Satellite Accumulation Areas (EWI-002)

Example 12-4: Operational Control for Empty Chemical Container Handling (EWI-003)

## Module 13: Emergency Preparedness and Response

---

Exhibit 13-1: Summary Checklist

Exhibit 13-2: Procedure for Emergency Preparedness and Response (EP-007)

## Module 14: Monitoring and Measurement

---

Exhibit 14-1: Summary Checklist

Exhibit 14-2: EMS Program Measurement Criteria Worksheet

Exhibit 14-3: Procedure for Monitoring and Measurement (EP-009)

Example 14-1: Example of Links Between Aspects, Objectives and Targets, Operational Controls, and Monitoring and Measurement

Example 14-2: Linking Operational Controls and Monitoring

## Module 15: Nonconformance and Corrective and Preventive Action

---

Exhibit 15-1: Cause and Effect Fishbone Diagram

Exhibit 15-2: Summary Checklist

Exhibit 15-3: Procedure for Corrective and Preventive Action (EP-015)

## Module 16: Records

---

Exhibit 16-1: Summary Checklist

Exhibit 16-2: Procedure for Environmental Records (EP-005)

Example 16-1: Environmental Records Organizer

Example 16-2: EMS Records Management Table

## Module 17: EMS Audits

---

Exhibit 17-1: Linkages Among EMS Audits, Corrective Action, and Management Reviews

Exhibit 17-2: Summary Checklist

Exhibit 17-3: Procedure for EMS and Regulatory Compliance Audits (EP-017)

Example 17-1: General Facility Population Checklist for EMS Internal Audits

Example 17-2: Top Management Checklist for EMS Internal Audits

Example 17-3: Questionnaire for General Facility Population in Spanish

## Module 18: Management Review

---

Exhibit 18-1: Summary Checklist

Exhibit 18-2: Procedure for Environmental Management System Management Review (EP-006)

## Appendix B: Integration of Environmental Management Systems and Quality Management Systems

---

Exhibit B-1: Relationship of EMS Elements to QMS (based on ISO 9001: 1994)

## Appendix D: Environmental Aspect/Impact Ranking

---

Exhibit D-1: Significance Determination for Aspects Based on Environmental and Business Considerations

Exhibit D-2: Toxicity and Effects Worksheet

Exhibit D-3: Worksheet for Exposure to Chemicals and Materials

Exhibit D-4: Example of Ranking Symbols

Exhibit D-5: Information Required to be on an MSDS

Exhibit D-6: Worksheet for Impact Ranking

Exhibit D-7: Identification and Significance Determination of Environmental Aspects That Includes Impact Ranking

Example D-1: Toxicity and Effects Worksheet — VOC and HAP Particle Emission

Example D-2: Worksheet for Exposure to Chemicals and Materials — VOC and HAP Particle Emissions

Example D-3: Worksheet for Impact Ranking — VOC and HAP Particle Emissions
