

it is not currently part of the general railroad system of transportation, it will begin operation of tourist trains on five to ten miles of the 33 miles of track owned by the Incorporated Town of North Judson, Indiana between North Judson and LaCrosse, IN. The Chesapeake & Indiana Railroad (CKIN) conducts freight operations on 23 miles of this 33-mile rail line; however, the only common track use would be a wye track in LaCrosse. HVRM's tourist train operations would normally be conducted on weekends and would not operate at the same time as the CKIN freight trains.

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

Northeast Illinois Regional Commuter Railroad Corporation

[Waiver Petition Docket Number FRA-2006-24562]

The Northeast Illinois Regional Commuter Railroad Corporation (Metra), further identified herein as the railroad, seeks approval for a waiver of compliance with the requirements of the *Passenger Equipment Safety Standards* contained in 49 CFR 238.309(b)(3), *Periodic brake equipment maintenance*, which requires that brake equipment receive periodic maintenance at 736 days. Metra requests an extension of the time period to 1840 days for 26 new bi-level electric passenger MU's.

The twenty-six new electric MU locomotives for which the relief is being requested are being built by Sumitomo Corporation of America/Nippon Sharyo and the air brake system is provided by Knorr Brake Corporation in Westminster, Maryland. The railroad explains that the brake application is transmitted electronically to each MU's Friction Brake Control Unit (FBCU). The FBCU then provides the requested brake application without drawing down brake pipe pressure. An Emergency Magnetic Valve (EMV) is provided on each MU for an electronic emergency brake application.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. Each comment shall set forth specifically the basis upon which it is made, and contain a concise statement of the interest of the commenter in the proceeding.
