

maintained by USDA, AMS, Fruit and Vegetable Programs.

AMS is considering revisions to the voluntary United States Standards for Grades of Pineapples using procedures that appear in Part 36, Title 7 of the Code of Federal Regulations (7 CFR part 36). These standards were last revised on July 5, 1990.

Background

AMS has been reviewing the Fresh Fruit and Vegetable grade standards for usefulness in serving the industry. AMS has identified the United States Standards for Grades of Pineapples for possible revision. Prior to undertaking detailed work to develop the proposed revisions to the standards, AMS is soliciting comments on the proposed revisions, to the United States Standards for Grades of Pineapples that may be necessary to better serve the industry.

AMS is proposing to revise the tolerances by replacing Table I Shipping Point and Table II En Route or at Destination with numerical tolerances. These tables utilize acceptance numbers of fruit with maximum numbers of defective permitted. These changes would simplify the inspection process and bring the pineapple standard in line with other standards which use numerical tolerances for defects.

This notice provides for a 60-day comment period for interested parties to comment on the proposed changes to the United States Standards for Grades of Pineapples. Should AMS conclude that revisions are needed, it will develop a proposed revised standard that will be published in the **Federal Register** with a request for comments in accordance with 7 CFR part 36.
