

Constructed on or Before September 20, 1994.

ICR Numbers: EPA ICR Number 1847.04, OMB Control Number 2060-0390.

ICR Status: This ICR is scheduled to expire on August 30, 2006. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct, or sponsor, and a person is not required to respond to, a request for collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The Emission Guidelines apply to all municipal waste combustion (MWC) units with a combustion capacity greater than 250 tons per day of municipal solid waste (large MWC units), if construction of the unit commenced on, or before September 20, 1994, and the unit is not covered by an Environmental Protection Agency (EPA)-approved and currently effective state or tribal plan.

The Emission Guidelines require initial notifications, performance tests, and periodic reports. Owners, or operators also are required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Owners, or operators subject to these regulations are required to maintain records of measurements and reports for at least five years.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 1,701 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose, or provide information to, or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and

requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit, or otherwise disclose the information.

Respondents/Affected Entities: Large Municipal Waste Combustors.

Estimated Number of Respondents: 9.
Frequency of Response: Initially, semiannually, annually, and on occasion.

Estimated Total Annual Hour Burden: 38,417.

Estimated Total Annual Cost: \$384,000, includes \$384,000 annualized O&M costs and \$0 capital costs.

Changes in the Estimates: There is a decrease of 650 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. The decrease in burden from the most recently approved ICR is due to an adjustment. In the previous ICR, the number of MWCs (i.e., sources) was reported rather than the number of respondents. The costs associated with O&M also decreased slightly due to the decrease in the number of respondents.

Dated: June 29, 2006.

Richard T. Westlund,

Acting Director, Collection Strategies Division.

Underground Injection Control Program; Hazardous Waste Injection Restrictions; Petition for Exemption—Class I Hazardous Waste Injection; Merisol USA LLC

AGENCY: Environmental Protection Agency.

ACTION: Notice of Final Decision on No Migration Petition Reissuance.

SUMMARY: Notice is hereby given that an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been reissued to MERISOL USA LLC (MERISOL) for two Class I injection wells located at Houston, Texas. As required by 40 CFR part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by the petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous

constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the continued underground injection by MERISOL, of the specific restricted hazardous wastes identified in the exemption, into Class I hazardous waste injection wells WDW-147 and WDW-319, until December 31, 2020, unless EPA moves to terminate the exemption under provisions of 40 CFR 148.24.

Additional conditions included in this final decision may be reviewed by contacting the Region 6 Ground Water/UIC Section. As required by 40 CFR 148.22(b) and 124.10, a public notice was issued May 8, 2006. The public comment period closed on June 22, 2006. One comment was received and a typographical error in the approval conditions was corrected. This decision constitutes final Agency action.

DATES: This action is effective as of June 28, 2006.

ADDRESSES: Copies of the petition and all pertinent information relating thereto are on file at the following location:

Environmental Protection Agency,
Region 6, Water Quality Protection
Division, Source Water Protection
Branch (6WQ-S), 1445 Ross Avenue,
Dallas, Texas 75202-2733.

FOR FURTHER INFORMATION CONTACT:

Philip Dellinger, Chief Ground Water/UIC Section, EPA—Region 6, telephone (214) 665-7165.

Miguel I. Flores,

Director, Water Quality Protection Division (6WQ).

ENVIRONMENTAL PROTECTION AGENCY

[FRL-8196-3; Docket ID No. EPA-HQ-ORD-2004-0002]

Draft Toxicological Review of Dichlorobenzenes: In Support of Summary Information on the Integrated Risk Information System (IRIS)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Public Comment Period and External Peer Review Panel Meeting.

SUMMARY: The EPA is announcing a public comment period and an external peer review panel meeting to review selected sections of the final draft document titled, "Toxicological Review of Dichlorobenzenes: In Support of Summary Information on the Integrated Risk Information System (IRIS)" (EPA/

635/R-03/015), related to the inhalation reference concentration (RfC) and inhalation cancer assessment for 1,4-dichlorobenzene. The document was prepared by the National Center for Environmental Assessment (NCEA) within EPA's Office of Research and Development.

EPA is releasing this draft document solely for the purpose of pre-dissemination peer review under applicable information quality guidelines. This document has not been formally disseminated by EPA. It does not represent and should not be construed to represent any Agency policy or determination. EPA will consider any public comments submitted in accordance with this notice when revising the document.

DATES: The public comment period begins on July 11, 2006 and ends August 9, 2006. Technical comments should be in writing and must be received by EPA by August 9, 2006. The peer review panel meeting will be conducted on August 16, 2006 by teleconference and will begin at 1 p.m. and end at 4 p.m. Members of the public may call into the teleconference meeting and are invited to provide oral statements at the commencement of the teleconference. (For more information refer to the instructions for registration provided in the **ADDRESSES** section of this notice.)

ADDRESSES: The external peer review panel meeting will be held by teleconference. Under an Interagency Agreement between EPA and the Department of Energy, the Oak Ridge Institute of Science and Education (ORISE) is organizing, convening, and conducting the peer review panel meeting. To obtain the teleconference call-in number and access code, register by August 11, 2006, by calling ORISE, P.O. Box 117, MS 17, Oak Ridge, TN 37831-0117, at (865) 576-2922 or (865) 241-3168 (facsimile). Interested parties may also register on-line at: <http://www.ornl.gov/dichlorobenzene>. Public comments submitted to the EPA by August 9, 2006 will be provided to the external peer review panel prior to the teleconference meeting.

The draft "Toxicological Review of Dichlorobenzenes: In Support of Summary Information on the Integrated Risk Information System (IRIS)" (EPA/635/R-03/015) is available primarily via the Internet on NCEA's home page under the Recent Additions menu at <http://www.epa.gov/ncea>. A limited number of paper copies are available by contacting the IRIS Hotline at (202) 566-1676, (202) 566-1749 (facsimile), or hotline.iris@epa.gov. If you are requesting a paper copy, please provide

your name, mailing address, the document title, and the EPA number of the requested publication. Copies are not available from ORISE.

Copies of the study by Aiso et al. (2005), referenced in the **SUPPLEMENTARY INFORMATION** section of this notice are available from the IRIS Hotline in paper or electronic format. If you are requesting a copy, please provide your name, mailing address or email address, and document citation: Aiso et al. (2005) Carcinogenicity and chronic toxicity in mice and rats exposed by inhalation to para-dichlorobenzene for two years. *J Vet Med Sci* 67(10): 1019-1029.

Technical comments may be submitted electronically via www.regulations.gov, by mail, by facsimile, or by hand delivery/courier. Please follow the detailed instructions provided in the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: Questions regarding registration and logistics for the external peer review panel teleconference should be directed to Margaret Lyday, ORISE, P.O. Box 117, MS 17, Oak Ridge, TN 37831-0117, at (865) 576-2922 or (865) 241-3168 (facsimile), lydaym@ornl.gov (e-mail).

If you have questions about the document, contact Audrey Galizia, Chemical Manager, National Center for Environmental Assessment telephone: 732-906-6887 facsimile: 732-452-6429 e-mail: galizia.audrey@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Information About the Document

IRIS is a database that contains scientific Agency positions on potential adverse human health effects that may result from chronic (or lifetime) exposure to specific chemical substances found in the environment. The database (available on the Internet at <http://www.epa.gov/iris>) contains qualitative and quantitative health effects information for more than 500 chemical substances that may be used to support the first two steps (hazard identification and dose-response evaluation) of the risk assessment process. When supported by available data, the database provides oral reference doses (RfDs) and inhalation reference concentrations (RfCs) for chronic health effects, and oral slope factors and inhalation unit risks for carcinogenic effects. Combined with specific exposure information, government and private entities use IRIS to help characterize public health risks of chemical substances in a site-specific situation and thereby support risk management decisions designed to protect public health.

1,4-Dichlorobenzene is widely used as a space deodorant for toilets and refuse containers, as a moth repellent in moth balls or crystals, and in other pesticide applications. The current IRIS assessment for 1,4-dichlorobenzene was placed on the database in 1994 and contains an inhalation RfC. A reassessment of the potential health effects of dichlorobenzenes has been undertaken. The draft assessment for dichlorobenzenes (including the 1,2-, 1,3-, and 1,4-isomers) was subject to an external peer review and 30-day public comment period in February 2004 (69 FR 4514, January 30, 2004). The scope of the current external peer review and public comment is limited to the analyses based on a chronic inhalation bioassay of 1,4-dichlorobenzene published in the peer-reviewed literature (Aiso et al., 2005. *J Vet Med Sci* 67(10): 1019-29) that was not included in the February 2004 external peer review draft. This study was identified originally as an unpublished study report by the Japan Bioassay Research Center (JBRC, 1995). Data from Aiso et al. (2005) were used subsequently in the quantitative dose-response assessments for the 1,4-dichlorobenzene RfC and inhalation cancer assessment.

II. How To Submit Technical Comments to the Docket at www.regulations.gov

Submit your comments, identified by Docket ID No. EPA-HQ-ORD 2004-0002 by one of the following methods:

- <http://www.regulations.gov>: Follow the online instructions for submitting comments.
- *E-mail*: ORD.Docket@epa.gov.
- *Fax*: 202-566-1753.
- *Mail*: Office of Environmental Information (OEI) Docket (Mail Code: 2822T), U.S. Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460. The phone number is 202-566-1752.

- *Hand Delivery*: The OEI Docket is located in the EPA Headquarters Docket Center, EPA West Building, Room B102, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is 202-566-1744. Such deliveries are only accepted during the docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

If you provide comments in writing, please submit one unbound original with pages numbered consecutively, and three copies of the comments. For

attachments, provide an index, number pages consecutively with the comments, and submit an unbound original and three copies.

Instructions: Direct your comments to Docket ID No. EPA-HQ-ORD-2004-0002. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through <http://www.regulations.gov> or e-mail. The www.regulations.gov Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through www.regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at <http://www.epa.gov/epahome/dockets.htm>.

Docket: All documents in the docket are listed in the www.regulations.gov index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in <http://www.regulations.gov> or in hard copy at the OEI Docket in the EPA Headquarters Docket Center.

Dated: July 5, 2006.

Peter W. Preuss,

Director, National Center for Environmental Assessment.

[FR Doc. E6-10870 Filed 7-10-06; 8:45 am]

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-8195-3]

"Great Lakes Legacy Act—Request for Projects"

AGENCY: Environmental Protection Agency.

ACTION: Notice; funding availability.

SUMMARY: The U.S. Environmental Protection Agency (USEPA) Great Lakes National Program Office (GLNPO) is requesting proposals for projects, for up to \$29,600,000, addressing contaminated sediment problems in Great Lakes Areas of Concern located wholly or partially in the United States (U.S. AOCs) as outlined in the Great Lakes Legacy Act of 2002 (the Legacy Act).

DATES: The deadline for all Project proposals is 5 p.m. Central Time, September 15, 2006.

ADDRESSES: U.S. EPA Great Lakes National Program Office (G-17J), 77 W. Jackson Blvd. Chicago, IL 60604.

FOR FURTHER INFORMATION CONTACT: Marc Tuchman, 312-353-1369/tuchman.marc@epa.gov.

SUPPLEMENTARY INFORMATION: The Request for Projects (RFP) is available on the Internet at <http://www.epa.gov/glla>. The purpose of this request is to solicit project proposals that would help to implement the Great Lakes Legacy Act. In order to receive funding under the Legacy Act, projects must be located in one of the 31 U.S. Great Lakes AOCs. Top priority will be given to projects that (1) Constitute remedial action for contaminated sediment; (2) have been identified in a Remedial Action Plan and are ready to be implemented; (3) use an innovative approach, technology, or technique that may provide greater environmental benefits, or equivalent environmental benefits at a reduced cost; or (4) included remediation to be commenced not later than one year after the date of receipt of funds for the project. Remediation projects would include, but are not limited to, remedial options such as: dredging, capping, monitored natural recovery, treatment technologies, or a combination of remedial alternatives for contaminated sediment.

The next priority level would be given to projects that seek to monitor or evaluate contaminated sediment or prevent further or renewed contamination of sediment. These projects could include: site characterizations, site assessments, source identification/source control,

monitoring, risk assessments, remedial alternatives evaluations and short-term/long-term effects analyses.

The Legacy Act program is not a grant program, and it is not an enforcement or regulatory program. The process for the selection of Legacy Act projects is not a grants competition, but it is based on the development of a negotiated Project Agreement (PA) between USEPA and the non-federal sponsor. USEPA will consider projects based on the extent to which they meet the requirements of the Legacy Act and the RFP.

The non-federal share of the cost of a project shall be at least 35% of the total project costs in those cases where no responsible parties are clearly identified; when the non-federal sponsor is a responsible party, USEPA will require a substantially higher contribution (minimum of 40-50%). The non-federal sponsor is also responsible for 100% of cost of operation and maintenance of the project. The non-federal share may include the value of in-kind services contributed by the non-federal sponsor, and may include funds or in-kind services provided pursuant to an administrative order on consent or a judicial consent decree. The non-federal share of the cost of a project may not include any funds paid pursuant to, or the value of any in-kind service performed under, a unilateral administrative order or court order.

GLNPO will review Legacy Act project proposals as they are received. GLNPO intends to enter into PA discussions with project applicants that meet the required components outlined in the RFP, and receive a high score (per the Legacy Act Rule), subject to the availability of funds. Projects that result in a PA will be funded with FY06 funds to the extent they are available. Other projects that result in a PA will be dependent upon funding, if any, received for the Legacy Act in FY07.

Refer to "Final Rule: Implementation of the Great Lakes Legacy Act of 2002" at <http://www.epa.gov/glla/rule/> for more detailed information on EPA's process for identification, evaluation, selection, and implementation of projects for funding under the Legacy Act.

Funding (through project agreements) is available pursuant to section 118(c) of the Federal Water Pollution Control Act (33 U.S.C. 1268(c)). States, tribes, industry, non-governmental organizations, and other stakeholders are eligible to apply.
