Atlantic Coastal Fisheries Cooperative Management Act Provisions; Application for Exempted Fishing Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of a request for Exempted Fishing Permits to conduct experimental fishing; request for comments.

SUMMARY: This Exempted Fishing Permit (EFP) application is a continuation of a collaborative project involving the University of New Hampshire (UNH), Durham, New Hampshire (NH); the Lobster Conservancy, Friendship, Maine; the New England Aquarium, Boston, Massachusetts; and the Atlantic Offshore Lobstermen's Association, Candia, NH. The EFP proposes to continue monitoring a total of 150 legal sized egg bearing female lobsters (berried lobsters) carrying early-stage eggs until the eggs mature and are released. Each berried lobster will be tagged and fitted with a small ambient temperature recording device (Tidbit temperature-loggers) and then the movement and egg-development stages of these tagged berried lobsters will be documented. When a tagged berried lobster is recaptured in commercial lobster gear, participating lobstermen will download thermal data from the attached Tidbit temperature-logger, and also preserve a maximum of 10 eggs from each tagged berried lobster to allow researchers to estimate the egg developmental stage and time to maturity. The tagged berried lobsters will then be released unharmed. The EFP would waive the prohibition on removal of eggs specified at 50 CFR 697.7(c)(1)(iv) for a maximum of 16 participating vessels and is limited to the 150 pre-tagged berried lobsters in this project.
