

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- vi. Provide specific examples to illustrate your concerns and suggest alternatives.
- vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- viii. Make sure to submit your comments by the comment period deadline identified.

II. What Guidance Does this PRN Provide?

This draft PRN provides guidance to the registrant concerning the policies described in the August 2, 2002 **Federal Register** (67 FR 50578) Notice on "*Proposed Federal Actions to Update Field Test Requirements for Biotechnology Derived Plants and to Establish Early Food Safety Assessments for New Proteins Produced by Such Plants*" issued under the auspices of the Office of Science and Technology Policy (OSTP). The OSTP notice was issued to outline what measures federal agencies would take to prevent low levels of biotechnology derived genes and gene products from being found in commercial food and feed. The OSTP notice stated that EPA would rely on existing processes and publish guidance for individuals and organizations conducting field testing of Plant-Incorporated Protectants (PIPs). The proposed PRN describes those existing rules along with the existing procedures related to them. Additionally, the PRN provides guidance on residue containment in small-scale field testing and the kinds of information that EPA has received to support the PIP tolerances issued thus far.

No actions are required of registrants or other individuals involved in small scale field testing of PIPs as a result of this PRN. The PRN provides guidance and helps explain the existing rules and regulations pertinent to this topic and provides a point of contact for those wishing to discuss the issue or ask questions related to specific test parameters. The PRN is also intended to reinforce coordination of EPA regulatory efforts related to biotechnology products with those of the Food and Drug Administration (FDA) and of the U.S. Department of Agriculture (USDA) Animal and Plant Health Inspection Service (APHIS), as outlined under the Coordinated Framework for the Regulation of the Products of Biotechnology.

III. Do PRNs Contain Binding Requirements?

The PRN discussed in this document is intended to provide guidance to EPA

personnel and decision makers and to pesticide registrants. While the requirements in the statutes and Agency regulations are binding on EPA and the applicants, this PRN is not binding on either EPA or pesticide registrants, and EPA may depart from the guidance where circumstances warrant and without prior notice. Likewise, pesticide registrants may assert that the guidance is not appropriate generally or not applicable to a specific pesticide or situation.
