Internet at the Commission's Web site: <http://wireless.fcc.gov/auctions/65/>.

I. Additional Default Payments of Twenty Percent Will Apply in Auction No. 65

1. 47 CFR 1.2104(g)(2) of the Commission's rules provides that if, after the close of an auction, a winning bidder defaults on a down payment or final payment obligation or is disqualified (e.g., fails to submit a timely long-form application), the bidder is liable for a default payment. This payment consists of a deficiency payment, equal to the difference between the amount of the bidder's bid and the amount of the winning bid the next time a license covering the same spectrum is won in an auction, plus an additional payment equal to a percentage of the defaulter's bid or of the subsequent winning bid, whichever is less.

2. In the *CSEA/Part 1 Report and Order*, 71 FR 6214, February 7, 2006, the Commission modified 47 CFR 1.2104(g)(2) by increasing the limit on the additional default payment for non-combinatorial auctions from three to twenty percent. The Commission further indicated that prior to each non-combinatorial auction it will establish an additional default payment of three to twenty percent for that auction and that the specific level of this payment in each case will be based on the nature of the service and the inventory of the licenses being offered.

3. In the *Auction No. 65 Second Comment Public Notice*, 71 FR 10034, February 28, 2006, the Bureau proposed an additional default payment of twenty percent for Auction No. 65. The Bureau received no comments on its proposal.

4. In Auction No. 65, licenses in three band plans will be available, but the only licenses that will be awarded will be those that comprise the band plan that receives the highest aggregate bid. A bid on a single license therefore may determine not only the winner of that license but also the winning band plan, and thus affect the ability of other bidders to win other licenses in the auction. By contrast, a bid on a license in an auction using the Commission's standard simultaneous multiple round auction format (SMR) may determine only the winner of that license.

5. The Bureau continues to believe, as explained in the *Auction No. 65 Second Comment Public Notice*, that, because of the particular interdependence among bids in Auction No. 65 and the potential effects of one winning bidder's default on bidders for other licenses, the detrimental effects of a default may be significantly greater than in a standard

SMR auction. The Bureau therefore adopts its proposal and will apply an additional default payment of twenty percent to any defaults after the close of Auction No. 65.

Deputy Chief, Auctions and Spectrum Access Division, WTB.
