

File No. USA-MEX-2001-1904-03. The binational panel remanded the redetermination on remand to the International Trade Administration. Copies of the panel decision are available from the U.S. Section of the NAFTA Secretariat.

FOR FURTHER INFORMATION CONTACT: Caratina L. Alston, United States Secretary, NAFTA Secretariat, Suite 2061, 14th and Constitution Avenue, Washington, DC 20230, (202) 482-5438.

SUPPLEMENTARY INFORMATION: Chapter 19 of the North American Free-Trade Agreement ("Agreement") establishes a mechanism to replace domestic judicial review of the final determinations in antidumping and countervailing duty cases involving imports from a NAFTA country with review by independent binational panels. When a Request for Panel Review is filed, a panel is established to act in place of national courts to review expeditiously the final determination to determine whether it conforms with the antidumping or countervailing duty law of the country that made the determination.

Under Article 1904 of the Agreement, which came into force on January 1, 1994, the Government of the United States, the Government of Canada and the Government of Mexico established *Rules of Procedure for Article 1904 Binational Panel Reviews* ("Rules"). These Rules were published in the **Federal Register** on February 23, 1994 (59 FR 8686). The panel review in this matter has been conducted in accordance with these Rules.

Panel Decision: The Panel ordered the Department as follows:

That this case be remanded to the Department for the Department to make a determination consistent with the decision of this Panel to the effect that the evidence on the record does not support a finding of likelihood of recurrence or continuation of dumping upon revocation of the antidumping duty order, and to make that determination within ten (10) days from the date of this Fifth Panel Decision, or not later than June 11, 2007.

Dated: June 4, 2007.

Caratina L. Alston,
United States Secretary, NAFTA Secretariat.

SUPPLEMENTARY INFORMATION:

I. Abstract

The commercial fishing vessels active in the Hawaii-based pelagic longline fishery must allow the National Marine Fisheries Service (NMFS) to install vessel monitoring system (VMS) units on their vessel when directed to do so by NMFS enforcement personnel. VMS units automatically send periodic reports on the position of the vessel. NMFS uses the reports to monitor the vessel's location and activities while enforcing longline fishing area closures. NMFS pays for the units and messaging.
