Comments

A 60-day public comment Notice was published in the **Federal Register** on January 30, 2007. This comment period ended March 30, 2007. One public comment was received from this notice. This questioned whether the

AmeriCorps member or the program's Certifying Official should certify a member's prior service. The Corporation determined that the member should self-certify this information as it may not be available to the certifying official. A further suggestion to delete names of inactive program types will be implemented as appropriate.

Description: Currently, the Corporation is soliciting comments concerning the proposed renewal of its AmeriCorps Enrollment Form and its AmeriCorps Exit Form. The enrollment and exit forms are completed jointly by members interested in performing a period of national service and by programs providing that opportunity. Upon successfully completing a term of service an AmeriCorps participant may receive an education award that may be used to pay for certain educational expenses or for qualified student loans. Enrollment and exit processing is completed electronically. The paper forms are retained by the programs for audit purposes.

POLICY JUSTIFICATION**France – Used E-2C Aircraft**

The Government of France has requested a possible sale of one (1) used E-2C aircraft with HAWKEYE 2000 Airborne Early Warning (AEW) Suite, three (3) T-56-A-427 spare engines, spare and repair parts, support equipment, personnel training and training equipment, publications and technical data, system software development and installation, ground/flight testing of new systems and system modifications, U.S. Government and contractor engineering and logistics support services, and other related elements of logistics support. The estimated cost is \$260 million.

This proposed sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of France while enhancing weapon system standardization and interoperability with U.S. forces.

France requires an additional E-2C aircraft to strengthen its AEW surveillance and enhanced command, control, and communications capabilities for both carrier and shore-based operations within their defense network. A fourth aircraft will ensure enhanced fleet communications and interoperability with North Atlantic Treaty Organization obligations. France will have no difficulty absorbing the additional E-2C aircraft into its armed forces.

This proposed sale will not adversely affect the military balance in the region.

The principal contractors will be:

Northrop Grumman Corporation
Rolls-Royce Corporation

Bethpage, New York
Indianapolis, Indiana

There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government and contractor representatives to France.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
