SUPPLEMENTARY INFORMATION:

I. Abstract

The International Trade Administration's U.S. Commercial Service (CS) is mandated by Congress to help U.S. businesses, particularly small and medium-sized companies, export their products and services to global markets. As part of its mission, the CS currently uses transactional user satisfaction surveys to collect feedback from U.S. business clients that use CS pay-for-use products/events provided by the organization's international offices. These surveys ask the client to evaluate the CS on its customer service delivery for a specific transaction. The results from these transactional user satisfaction surveys are used to ensure that clients' needs and expectations are met and service delivery is consistent across the organization. In addition to conducting user satisfaction surveys on a transactional basis for pay-for-use products/events provided by the CS's international offices, the CS would like to conduct a strategic user satisfaction survey on an annual basis to collect more in-depth user satisfaction feedback from CS clients in order to assess the importance or relative impact of specific service delivery processes and attributes on overall customer satisfaction. Survey responses would enable the CS to prioritize the allocation of time, budget and resources using performance-importance diagrams. Without this information, CS is unable to systematically determine the actual and relative levels of performance for attributes, processes and subprocesses, identify the drivers or determinants of overall satisfaction, and provide clear, actionable insights for managerial intervention. This information will be used for program improvement, strategic planning, and allocation of resources.

II. Method of Collection

The data collection method for the CS is an e-mail message delivering a hot link to a web-enabled survey. If the client does not respond to the survey within two weeks, another e-mail reminder is sent to the client.

SUPPLEMENTARY INFORMATION:

I. Abstract

In response to the European Union Directive on Data Protection that restricts transfers of personal information from Europe to countries whose privacy practices are not deemed "adequate," the U.S. Department of Commerce (DOC) has developed a "Safe Harbor" framework that will allow U.S. organizations to satisfy the European Directive's requirements and ensure that personal data flows to the United States are not interrupted. In this process, the DOC repeatedly consulted with U.S. organizations affected by the European Directive and interested non-government organizations. On July 27, 2000, the European Commission issued its decision in accordance with Article 25.6 of the Directive that the Safe Harbor Privacy Principles provide adequate privacy protection. The Safe Harbor framework bridges the differences between the European Union (EU) and U.S. approaches to privacy protection. The complete set of Safe Harbor documents and additional guidance materials may be found at <http://export.gov/safeharbor>.

Once the Safe Harbor was deemed "adequate" by the European Commission on July 27, 2000, DOC began working on the requirements that are necessary to put this accord into effect. The European Member States implemented the decision made by the Commission within 90 days. Therefore, the Safe Harbor became operational on November 1, 2000. The DOC created a list for U.S. organizations to sign up to the Safe Harbor and provided guidance on the mechanics of signing up to this list. As of March 1, 2007, 1,100 U.S. organizations have been placed on the Safe Harbor List, located at <http://export.gov/safeharbor>.

Organizations that have signed up to this list are deemed "adequate" under the Directive and do not have to provide further documentation to European officials. This list will be used by EU organizations to determine whether further information and contracts will be needed for a U.S. organization to receive personally identifiable information. This list is necessary to make the Safe Harbor accord

operational, and was a key demand of the Europeans in agreeing that the Principles were providing "adequate" privacy protection.

The Safe Harbor provides a number of important benefits to U.S. firms. Most importantly, it provides predictability and continuity for U.S. organizations that receive personal information from the European Union. Personally identifiable information is defined as any information that can be identified to a specific person, for example an employee's name and extension would be considered personally identifiable information. All 15 member countries are bound by the European Commission's finding of "adequacy". The Safe Harbor also eliminates the need for prior approval to begin data transfers, or makes approval from the appropriate EU member countries automatic. The Safe Harbor principles offer a simpler and cheaper means of complying with the adequacy requirements of the Directive, which should particularly benefit small and medium enterprises.

The decision to enter the Safe Harbor is entirely voluntary. Organizations that decide to participate in the Safe Harbor must comply with the safe harbor's requirements and publicly declare that they do so. To be assured of Safe Harbor benefits, an organization needs to reaffirm its self-certification annually to the Department of Commerce that it agrees to adhere to the safe harbor's requirements, which includes elements such as notice, choice, access, data integrity, security and enforcement.

This list will be most regularly used by European Union organizations to determine whether further information and contracts will be needed by a U.S. organization to receive personally identifiable information. It will be used by the European Data Protection Authorities to determine whether a company is providing "adequate" protection, and whether a company has requested to cooperate with the Data Protection Authority. This list will be accessed when there is a complaint logged in the EU against a U.S. organization. This will be on a monthly basis. It will be used by the Federal Trade Commission and the Department of Transportation to determine whether a company is part of the Safe Harbor. This will be accessed if a company is practicing "unfair and deceptive" practices and has misrepresented itself to the public. It will be used by the Department of Commerce and the European Commission to determine if organizations are signing up to the list.
