BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION**Notice of Availability of Model Safety Evaluation and Model License Amendment Request on Technical Specification Improvement Regarding Use of the Improved Banked Position Withdrawal Sequence for General Electric Boiling Water Reactors Using the Consolidated Line Item Improvement Process; Correction**

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability; Correction.

SUMMARY: This document corrects a notice appearing in the **Federal Register** Notice on May 23, 2007 (72 FR 29004). The notice makes a Model Safety Evaluation, Model License Amendment Request, and Model No Significant Hazards Determination available to licensees as a means to make changes to Standard Technical Specifications. This action is necessary to correct an erroneous "Action" item.

FOR FURTHER INFORMATION CONTACT: Matthew Hamm, Reactor Engineer, Office of Nuclear Reactor Regulation, telephone (301) 415-1472.

SUPPLEMENTARY INFORMATION: On page 29004, in the third column, the **ACTION:** item is changed from "Request for comment" to read "Notice of availability."

Dated at Rockville, Maryland, this 23rd day of May, 2007.

For the Nuclear Regulatory Commission.

Timothy J. Kobetz,

Chief, Technical Specifications Branch, Division of Inspection and Regional Support, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. Redacted; License Nos. Redacted; EA-07-082]

In the Matter of Certain 10 CFR Part 50 Licensees Who Transport Spent Nuclear Fuel Under the Provisions of 10 CFR PART 71; Order Modifying Licenses (Effective Immediately)**I.**

The licensees identified in Attachment 1 to this Order have been issued a specific license by the U.S. Nuclear Regulatory Commission (NRC or Commission) authorizing the possession of spent nuclear fuel and a general license authorizing the transportation of spent nuclear fuel [in a transportation package approved by the Commission] in accordance with the Atomic Energy Act of 1954, as amended, and 10 CFR parts 50 and 71. Commission regulations for the shipment of spent nuclear fuel at 10 CFR 73.37(a) require these licensees to maintain a physical protection system that meets the requirements contained in 10 CFR 73.37(b), (c), (d), and (e).

II.

On September 11, 2001, terrorists simultaneously attacked targets in New

York, NY, and Washington, DC, utilizing large commercial aircraft as weapons. In response to the attacks and intelligence information subsequently obtained, the Commission issued a number of Safeguards and Threat Advisories to its licensees in order to strengthen licensees' capabilities and readiness to respond to a potential attack on a nuclear facility or regulated activity. The Commission has also communicated with other Federal, State and local government agencies and industry representatives to discuss and evaluate the current threat environment in order to assess the adequacy of security measures at licensed facilities. In addition, the Commission has been conducting a comprehensive review of its safeguards and security programs and requirements.

As a result of its consideration of current safeguards and security plan requirements, as well as a review of information provided by the intelligence community, the Commission has determined that certain additional security measures are required to be implemented by licensees as prudent, interim measures, to address the current threat environment in a consistent manner. Therefore, the Commission is imposing requirements, as set forth in Attachment 2 of this Order, on all licensees identified in Attachment 1 of this Order.¹ These additional security requirements, which supplement existing regulatory requirements, will provide the Commission with reasonable assurance that the common defense and security continue to be adequately protected in the current threat environment. These requirements will remain in effect until the Commission determines otherwise.

The Commission recognizes that licensees may have already initiated many of the measures set forth in Attachment 2 to this Order in response to previously issued Safeguards and Threat Advisories or on their own. It is also recognized that some measures may not be possible or necessary for all shipments of spent nuclear fuel, or may need to be tailored to accommodate the licensees' specific circumstances to achieve the intended objectives and avoid any unforeseen effect on the safe transport of spent nuclear fuel.

Although the additional security measures implemented by licensees in response to the Safeguards and Threat Advisories have been adequate to provide reasonable assurance of adequate protection of common defense and security, in light of the current

¹ Attachments 1 and 2 contain safeguards information and will not be released to the public.
