Explanatory Document to the September 2005 Draft North American Free Trade Agreement Standard Operating Procedure for Determining Pesticide Maximum Residue Limits; Notice of Availability

AGENCY: Environmental Protection

Agency (EPA). **ACTION:** Notice.

SUMMARY: EPA is seeking public comment on the document entitled Statistical Basis of the NAFTA Method for Calculating Pesticide Maximum Residue Limits from Field Trial Data available at http://www.pmra-arla.gc.ca/english/pdf/nafta/docs/nafta_mrls-e.pdf. Although Canada's Management

Regulatory Agency (PMRA) is also accepting comments, EPA and PMRA will be jointly responding to comments submitted to either agency. The document was prepared by the NAFTA MRL Harmonization Working Group (a group comprised of United States and Canadian governments, created to develop a coordinated pesticides regulatory framework among North American Free Trade Agreement (NAFTA) partners). The document provides additional technical and explanatory material for a standard operating procedure (SOP) previously released by Canada's PMRA for public comment in September 2005. The document currently open for public comment supports the September 2005 draft SOP that is intended for use by residue chemistry reviewers in the United States and Canada to ensure that the same or similar residue chemistry data sets will result in the same or similar recommendation for maximum residue limit (MRL) levels for pesticide residues on food and feed commodities by each agency. The goal for this method is to minimize trade barriers of pesticide treated commodities between the United States and Canada.
