Consistent with the Government Performance and Results Act, the 2004 budget proposes to streamline the decision unit structure of DOJ components to align more closely with the mission and the strategic objectives contained in the DOJ Strategic Plan (FY 2001-2006). In addition, the budget has been realigned to reflect each component's outputs and full costs by major program activity, including the costs of management and administration, so that a more accurate picture of total activity costs is reflected in the budget. In this way, budget and performance are more closely linked, and provide a better basis on which to make budget decisions. Over time, agencies will be expected to identify effective outcome measures, monitor their progress, and accurately present the associated costs.
