**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

The Fish and Wildlife Service (we, Service) has contracted with Frederick Sowers Consulting to conduct an independent evaluation of Great Ape Conservation Fund (GACF) grants. The evaluation will be limited to those grants we financed during Fiscal Years 2006 through 2008 through a \$2.5 million/year resource transfer from the Agency for International Development in support of the Central Africa Regional Program for the Environment.

In the central African region, conservation efforts are focused around approximately 12 large landscapes where conservation organizations take the lead in a multi-stakeholder process of land use and conservation planning. We plan to survey the direct recipients of GACF grants and their associated partners (e.g. international and African conservation and development nongovernmental organizations, stakeholder groups, civic organizations, and other funding agencies). The survey will cover both leading partners and smaller implementing partners within the landscape.

The 74 grantees, who serve in direct contact with the public, are spread across five countries in the central African region. We plan to use an online survey as an efficient and minimally disruptive means of collecting information on grants management mechanics and operations and grantee performance in achieving conservation aims. The online survey will be open for an adequate period of time to allow respondents ample time to complete and update the survey questionnaire. We plan to collect:

(1) Basic demographic data about the institutions, such as the size of the organization, the length and duration of its presence in the landscape, the nature of its activities, and its relationship with other stakeholders.

(2) Information on the quality and nature of the relationships between grant recipients and the Government.

(3) Effectiveness of the program in contributing to conservation objectives.
