Petitions for Modification

The following parties have filed petitions to modify the application of existing safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. Knott County Mining Company

[Docket No. M–2003–096–C]

Knott County Mining Company, PO Box 102, Kite, Kentucky 41828 has filed a petition to modify the application of 30 CFR 75.900 (Low and medium-voltage circuits serving three-phase alternating current equipment; circuits breakers) to its Mine 582 (MSHA I.D. No. 15–18522) located in Knott County, Kentucky. The petitioner proposes to use contactors for under-voltage protection in lieu of using the required circuit breakers. The petitioner states that an additional ground fault protection device will be provided for the affected circuits; the hazards caused by personnel rushing to the remote locations to reset breakers will be eliminated; and travelways will be safer and the miners will not have to take risks out of a sense of urgency to resume production. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.
