SUPPLEMENTARY INFORMATION:**A. Purpose**

These regulations implement the statutory requirements of the Miller Act (40 U.S.C. 3131-3134), which requires performance and payment bonds for any construction contract exceeding \$100,000, unless it is impracticable to require bonds for work performed in a foreign country, or it is otherwise authorized by law. In addition, the regulations implement the note to 40 U.S.C. 3132, entitled "Alternatives to Payment Bonds Provided by the Federal Acquisition Regulation," which requires alternative payment protection for construction contracts that exceed \$25,000 but do not exceed \$100,000. Although not required by statute, under certain circumstances the FAR permits the Government to require bonds on other than construction contracts.

SUPPLEMENTARY INFORMATION:**A. Purpose**

United States laws impose duties on foreign supplies imported into the customs territory of the United States. Certain exemptions from these duties are available to Government agencies. These exemptions are used whenever the anticipated savings outweigh the administrative costs associated with processing required documentation. When a Government contractor purchases foreign supplies, it must notify the contracting officer to determine whether the supplies should be duty-free. In addition, all shipping documents and containers must specify certain information to assure the duty-free entry of the supplies.

The contracting officer analyzes the information submitted by the contractor

to determine whether or not supplies should enter the country duty-free. The information, the contracting officer's determination, and the U.S. Customs forms are placed in the contract file.

General

The purpose of the CSR Quality Initiatives program, authorized under section 1608 of the Elementary and Secondary Education Act of 1965, as amended (ESEA), is to provide discretionary grants to support activities that will enhance the State-administered CSR program and to enable schools that have been identified for improvement, corrective action, or restructuring under

Title I of the ESEA to meet their State's definition of adequate yearly progress (AYP). Under this program, the Secretary awards funds to support two specific categories of activities: Category 1—technical assistance to States, school districts and schools in making informed decisions regarding approving or selecting providers of comprehensive school reform, and Category 2—capacity building for comprehensive school reform providers to expand their work in more schools, assure quality and promote financial stability.

Background of Proposed Priorities

Grantees under Category 1 assist States, local educational agencies (LEAs), and schools in making informed decisions regarding approving or selecting providers of comprehensive school reform, consistent with the requirements of section 1606(a) of the ESEA, as amended. Research and evaluation studies of comprehensive school reform implementation indicate that schools in need of improvement face a myriad of challenges in meeting AYP. One of these challenges is to expand the knowledge of district and school personnel regarding school reform strategies and methods so that they can effectively assist in identifying clearly the teaching and learning needs of the school and can identify the service provider that can best meet those needs. With more quality information about the problem areas and scientifically-based solutions, schools will be in a stronger position to implement school reforms effectively. In addition to the need for schools and districts to become better consumers of school reform data and research, school- and district-based reformers need to have a better understanding of the timeline for implementing the necessary changes in teaching and learning and how to track student achievement gains throughout the process. Accordingly, we are proposing a priority for Category 1 projects that will provide States, districts and schools with high-quality information tools and other forms of technical assistance to identify the instructional needs of students and to select a reform approach and provider to meet those needs effectively so that all students are able to meet challenging State academic content and student achievement standards and so that schools are able to make AYP.

To implement the matching requirements of the ESEA, we are also proposing a priority for Category 1 projects that propose to match Federal funds received under this competition with funds from one or more private organizations.
