

DEPARTMENT OF JUSTICE**Antitrust Division****Notice Pursuant to the National Cooperative Research and Production Act of 1993—Actuarial Standards Board**

Notice is hereby given that, on September 20, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), Actuarial Standards Board ("ASB") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: Actuarial Standards Board, Washington, DC. The nature and scope of ASB's standards development activities are: Development of technical standards of practice for actuaries practicing in the United States.

Dorothy B. Fountain,

Deputy Director of Operations, Antitrust Division.

BILLING CODE 4410-11-M

DEPARTMENT OF JUSTICE**Antitrust Division****Notice Pursuant to the National Cooperative Research and Production Act of 1993—American Association for Accreditation of Ambulatory Surgery Facilities**

Notice is hereby given that, on September 14, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the American Association for Accreditation of Ambulatory Surgery Facilities ("AAAASF") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting

the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: American Association for Accreditation of Ambulatory Surgery Facilities, Gurnee, IL. The nature and scope of AAAASF's standards development activities are: the development of standards by which single-specialty and multi-specialty outpatient surgery facilities are accredited. The standards for accreditation of such surgery facilities are developed continually revised by AAAASF's committee of medical professionals.

Dorothy B. Fountain,

Deputy Director of Operations, Antitrust Division.

BILLING CODE 4410-11-M

DEPARTMENT OF JUSTICE**Antitrust Division****Notice Pursuant to the National Cooperative Research and Production Act of 1993—American Association of Textile Chemists and Colorists**

Notice is hereby given that, on September 13, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), American Association of Textile Chemists and Colorists ("AATCC") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: American Association of Textile Chemists and Colorists, Research Triangle Park, NC. The nature and scope of AATCC's standards development activities are: to increase knowledge of the application of dyes and chemicals in the textile industry; encouragement of research on chemical processes and materials of important interest to the textile industry; and establishment of channels for information exchange among members. AATCC develops test

methods and evaluation procedures through research committees composed of volunteers from the following sectors: primary textile industry; fiber and yarn suppliers; chemical and dyes suppliers; machinery and instrument suppliers; retail, government, and independent testing laboratories; and academicians. Methods are grouped into the following categories: biological properties; colorfastness; dyeing properties; identification and analysis; and physical properties. AATCC test methods do not set pass/fail criteria or standards for performance. They provide a standard means for testing, often with an evaluation scale.

Dorothy B. Fountain,

Deputy Director of Operations, Antitrust Division.

BILLING CODE 4410-11-M

DEPARTMENT OF JUSTICE**Antitrust Division****Notice Pursuant to the National Cooperative Research and Production Act of 1993—American College of Osteopathic Emergency Physicians**

Notice is hereby given that, on September 17, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the American College of Osteopathic Emergency Physicians ("ACOEP") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: American College of Osteopathic Emergency Physicians, Chicago, IL. The nature and scope of ACOEP's standards development activities are: To develop, plan, establish, coordinate and publish voluntary consensus standards applicable to the fields of emergency medicine, emergency medical services, and toxicology. Specifically, ACOEP develops, plans, establishes, coordinates, and publishes voluntary consensus standards in the form of basic standards for residency training in

emergency medicine, combined family practice/emergency medicine, and emergency medical services; and for subspecialty residency training in toxicology. ACOEP also evaluates osteopathic residency training and fellowship programs for conformance with the standards. Through its standards development activities, ACOEP seeks to ensure the highest quality of training and education in osteopathic emergency medicine. ACOEP's standards development activities are ongoing in nature, and existing standards may be updated and/or amended from time to time.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—American Institute of Aeronautics and Astronautics, Inc.

Notice is hereby given that, on September 21, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), American Institute of Aeronautics and Astronautics, Inc. ("AIAA") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: American Institute of Aeronautics and Astronautics, Inc., Reston, VA. The nature and scope of AIAA's standards development activities are: The development, maintenance, and publishing of standards relating to aerodynamic decelerators; the motion of artificial bodies in space; atmospheric and space environments with emphasis on scientific models; computational fluid dynamics applicable to aeronautics and astronautics; the requirements for humans in development and operation of aerospace systems; application for specific

characteristics of computer software for aerospace use; handling, storage, and use of hydrogen in gaseous liquid and slush form; handling, storage and use of liquid propellants; methods for mitigating the generation of orbital debris including debris flux models and vocabulary; the architecture and interfaces necessary for effective spacecraft servicing; performance parameters related to the use of automation and robotics in space missions with emphasis on interfaces, reliability, and life cycle design; vocabulary, interfaces, safety practices, mission profiles, and other system design aids which will promote space transportation; basic aerospace design principles; the test and evaluation of aerospace equipment in ground-based facilities; methods for the systematic development of reliable systems, including acquisition management issues, methods for planning, implementing, and verifying a Performance-based Reliability and Maintainability (R&M) Program; support design of aerospace structures, including future requirements for loads, materials, processes, configurations, life cycles, and tests.

Additional information may be obtained from David J. Quackenbush, Treasurer and Secretary of the American Institute of Aeronautics and Astronautics, Inc., e-mail daveq@aiaa.org.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—American Society of Baking

Notice is hereby given that, on September 22, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), American Society of Baking ("ASB") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting

the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: American Society of Baking, Sonoma, CA. The nature and scope of ASB's standards development activities are: As Secretariat for the American National Standard for Bakery Equipment Safety and Sanitation Requirements, ASB administers the standards that apply to the design, construction, installation, safe operation and maintenance of bakery machinery and equipment. The purpose of the standards is to provide reasonable safety for bakery workers; and they are intended as a guide to Federal, State and municipal authorities in drafting regulations; as voluntary application; and as a standard reference for safety requirements for the use of bakery machinery and for equipment manufacturers and concerns employing such machinery. The Baking Equipment Safety and Sanitation Standards are on file with the American National Standards Institute, Inc., 11 West 42nd Street, New York, NY.
