Background and Purpose

Section 610 of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires the Coast Guard and other rulemaking agencies to review existing rules for their economic impact on small entities. The Coast Guard reviews the small entities impact of its existing rules pursuant to a plan adopted by the Department of Transportation (DOT) and described in Appendix D of DOT's semiannual regulatory agenda (*see* 67 FR 74799, December 9, 2002 for the latest publication of the agenda).

Where our 610 Analysis Year shows that a rule has a "significant economic impact on a substantial number of small entities" (SEIOSNOSE), we begin a 610 Review Year. During the 610 Review Year, we determine whether and how the SEIOSNOSE can be lessened. In making that determination, the Regulatory Flexibility Act requires us to consider the:

- Continued need for the rule.
- Nature of public complaints or comments received concerning the rule.
- Rule's complexity.
- Extent to which the rule overlaps, duplicates, or conflicts with other Federal rules and, to the extent feasible, with State and local governmental rules.
- Length of time since the rule has been evaluated or the degree to which technology, economic conditions, or other factors have changed in the area affected by the rule.

In the fall 2002 agenda, we concluded the 610 Analysis Year for several rules and determined that 33 CFR parts 179, 181, and 183 significantly affect enough small entities to warrant a 610 Review Year for the three parts. Section 610 requires us to notify you that the Review Year is underway and to solicit your input, which we will consider in conducting our review.

In the fall 2003 agenda, we will announce the results of that review. We may determine that no further action seems possible or advisable at this time, in which case we will explain the basis for that determination. Or, we may determine that a rulemaking project is needed, to delete or amend the existing

rule in a way that will lessen its small-entity impact. We will indicate whether a rulemaking project will begin promptly or be scheduled at a later date.

Dated: February 4, 2003.

Rear Admiral, Coast Guard, Director of Operations Policy.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[OPP-2002-0274; FRL-7288-7]

Methoprene, Watermelon Mosaic Virus-2 Coat Protein, and Zucchini Yellow Mosaic Virus Coat Protein; Proposed Tolerance Actions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: In this document, EPA is proposing to amend the exemption expression for methoprene from the requirements of a tolerance when used on food commodities as an insect larvicide, and to revoke all the tolerances for methoprene because a recent EPA review finds that no harm is expected to the public from exposure to residues of methoprene. Therefore, these tolerances are no longer needed and their associated uses are proposed to be covered by tolerance exemptions. Also, EPA is proposing to revoke the exemptions for watermelon mosaic virus-2 coat protein, and zucchini yellow mosaic virus coat protein and specific portions of the viral genetic material when used as plant-incorporated protectants in squash, because these exemptions are covered in other sections of 40 CFR part 180. Because methoprene's 37 tolerances were previously reassessed, the regulatory actions proposed in this document do not contribute toward the Agency's tolerance reassessment requirements of the Federal Food, Drug, and Cosmetic Act (FFDCA) section 408(q), as amended by the Food Quality Protection Act (FQPA) of 1996. By law, EPA is required by August 2006 to reassess the tolerances in existence on August 2, 1996.

DATES: Comments, identified by docket ID number OPP-2002-0274, must be received on or before April 14, 2003.

ADDRESSES: Comments may be submitted electronically, by mail, or through hand delivery/courier. Follow the detailed instructions as provided in
