AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for comment.

SUMMARY: OSHA solicits comments concerning its proposal to extend OMB approval of the information-collection requirement contained in the Aerial Lift Standard. the modification. The manufacturer's certification demonstrates to interested parties that the manufacturer or an equally qualified entity assessed a modified aerial lift and found that it: Was safe for use by, or near, employees; and would provide employees with a level of protection equivalent to the protection afforded by the lift prior to modification.

II. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e. employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information-collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)).

This program ensures that information is in the desired format, reporting burden (time and cost) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information-collection burden is correct. The Occupational Safety and Health Act of 1970 (the Act) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657).

The certification requirement specified in the Aerial Lifts Standard demonstrates that the manufacturer or an equally-qualified entity has assessed a modified aerial lift and found that it was safe for use by, or near, employees; and would provide employees with a level of protection at least equivalent to the protection afforded by the lift prior to modification.

III. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information-collection requirements are necessary

for the proper performance of the Agency's functions to protect workers, including whether the information is useful;

- The accuracy of OSHA's estimate of the burden (time and costs) of the information-collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

IV. Proposed Actions

OSHA is proposing to extend the information-collection requirements in the Aerial Lift (29 CFR 1926.453(a)(2)). The Agency is requesting an increase of 12 hours, from 3 hours to 15 hours. The increase is a result of increasing the number of aerial lifts, which increased the number being inspected from 60 lifts to 300 lifts. The certification requirement specified in the Aerial Lifts Standard demonstrates that the manufacturer or an equally-qualified entity has assessed a modified aerial lift and found that it was safe for use by employees.

OSHA will summarize the comments submitted in response to this notice, and will include this summary in the request to OMB to extend the approval of the information collection requirements contained in the Aerial Lift Standard.

Type of Review: Extension of a currently-approved information-collection requirement.

Title: Manufacturer's Certification of Aerial Lifts in Construction (29 CFR 1926.453).

OMB Number: 1218-0216.

Affected Public: Business or other for-profit.

Number of Respondents: 300.

Frequency: On occasion.

Total Responses: 300.

Average Time Per Response: 3 minutes.

Estimated Total Burden Hours: 15 hours.

Estimated Cost (Operation and Maintenance): 0.
