

over, observers would be re-deployed on the SDC and supply vessels. All personnel stationed aboard the SDC during the open water season of 2003 would also receive training on marine mammal monitoring and utilize marine mammal reporting forms to document any incidental takes of marine mammals.

Reporting

All monitoring data collected will be reported to NMFS and the U.S. Fish and Wildlife Service on a weekly basis. EnCana must provide a final report on 2003–2004 activities to NMFS within 90 days of the completion of the activity. This report will provide dates and locations of the SDC movements and other operational activities, weather conditions, dates and locations of any activities related to monitoring the effects on marine mammals, and the methods, results, and interpretation of all monitoring activities, including estimates of the level and type of take, species name and numbers of each species observed, direction of movement of species, and any observed changes or modifications in behavior.

Endangered Species Act (ESA) Consultation

A biological opinion on oil and gas exploration was issued on May 25, 2001. NMFS has issued an Incidental Take Statement, pursuant to section 7 of the ESA.

National Environmental Policy Act (NEPA)

In 1997, NMFS prepared and released an EA that addressed the impacts on the human environment from issuance of an authorization for taking marine mammals incidental to moving an oil drilling structure through the Beaufort Sea during the summer and conducting oil exploration activities in the eastern Beaufort Sea and the alternatives to that proposed action. A Finding of No Significant Impact was signed on September 25, 1997. Because the action discussed in this document is not substantially different from the 1997 action, and because no significant new scientific information or analyses have been developed in the past several years significant enough to warrant new NEPA documentation, this action is categorically excluded from further review under NOAA Administrative Order 216–6. A copy of that EA is available upon request (see ADDRESSES).

Determinations

NMFS has determined that the short-term impact of SDC mobilization from Cross Island, McCovey Prospect, AK

through the Beaufort Sea to Herschel Island, Yukon Territory, and associated activities will result, at worst, in a temporary modification in behavior by certain species of whales and pinnipeds. While behavioral modifications may be made by these species to avoid the resultant noise or visual cues, this behavioral change is expected to have a negligible impact on the survival and recruitment of stocks.

While the number of potential incidental harassment takes will depend on the year-to-year distribution and abundance of marine mammals in the area of operations, due to the distribution and abundance of marine mammals during the projected period of activity and the location of the proposed activity, the number of potential harassment takings is estimated to be small. In addition, no take by injury and/or death is anticipated, and there is no potential for temporary or permanent hearing impairment as a result of the activities. No rookeries, mating grounds, areas of concentrated feeding, or other areas of special significance for marine mammals occur within or near the relocation route.

The measures undertaken to ensure that the SDC relocation will not have an adverse impact on subsistence activities are the CAA, Plan of Cooperation, and an operation schedule prior to the annual bowhead whale subsistence hunt, as amended on June 9, 2003.

Authorization

Authority: NMFS has issued an IHA to EnCana for the harassment of marine mammals incidental to movement of a SDC from Cross Island, McCovey Prospect, AK through the Beaufort Sea to Herschel Island, Yukon Territory, and associated activities. The issuance of this IHA is contingent upon incorporation of the previously mentioned mitigation, monitoring, and reporting requirements.
