

7. The Joint Helmet Mounted Cueing System (JHMCS) provides an off-boresight visual targeting of sensors and weapons with a head-out display where the pilot is looking. The system improves situational awareness in visual combat while providing off-boresight visual cueing and threat identification. Also, when combined with a high off-boresight missile, aircraft weapon system lethality is improved for short-range air-to-air engagements.

8. The configuration requested is compatible for use in F-18 aircraft. The configuration consists of the following equipment: electronics unit, cockpit unit, magnetic transition unit, seat position sensor, mounting bracket, lower helmet vehicle interface, helmet display unit, visor day, visor night, visor high contrast, oxygen mask, helmet upper interface, JHMCS/ANVIS-9 Night Vision Goggles adapters, and JHMCS helmet bag. The JHMCS is classified as Confidential.

9. The MIDS Enhanced Interference Blanking Units (EIBU) enhances input/output signal capacity of the MIDS LVT and addresses parts obsolescence.

10. The configuration requested is compatible for use in F-18 aircraft. The configuration consists of the following equipment: MX-11741/A interference blanker.

11. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

12. A determination has been made that Switzerland can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Thailand – UH-60L BLACKHAWK Helicopters

The Government of Thailand has requested a possible sale of two UH-60L BLACKHAWK helicopters with T-700 engines, two spare T-700 engines, M130 chaff dispenser, receivers, spare and repair parts, gun pods, tools and support equipment, publications and technical data, personnel training and training equipment, U.S. Government Quality Assurance Team (QAT), contractor engineering and technical support services and other related elements of logistics support. The estimated cost is \$35 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for political stability and economic progress in South East Asia.

This procurement will upgrade its air mobility capability and provide for the defense of vital installations and close air support for ground forces. Thailand will have no difficulty absorbing these helicopters into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The principle contractor will be United Technology, Sikorsky Aircraft of Stratford, Connecticut. There are no offset agreements proposed in connection with this potential sale.

Implementation of this sale will require the assignment of several U.S. Government Quality Assurance Teams for one-week intervals, twice annually, to participate in program management and technical reviews. There will be several U.S. Army National Guard Personnel, for a month, and a contractor field service representative, for two years, in Thailand.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 03-09

**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act**

**Annex
Item No. vii**

(vii) Sensitivity of Technology:

1. The UH-60L BLACKHAWK helicopter is Unclassified. The highest level of classified information required to be released for training, operation and maintenance of the BLACKHAWK is Confidential. The highest level which could be revealed through reverse engineering or testing of the end item is Confidential.

2. A determination has been made that Thailand can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

DEPARTMENT OF DEFENSE**Office of the Secretary****Defense Science Board**

AGENCY: Department of Defense.

ACTION: Notice of Advisory Committee meeting.

SUMMARY: The Defense Science Board Task Force on Enduring Freedom Lessons Learned will meet in closed session on April 2, 2003, in Washington, DC; April 8, 2003, location TBD; April 21, 2003, location TBD; May 14-27, 2003, location TBD; and June 4-6, 2003, in Washington, DC. This Task Force will review current activities of Operation Enduring Freedom to determine both near and longer-term technical and operational considerations that could be used to improve this operation and future campaigns initiated in the War Against Terrorism.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology & Logistics on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings, the Defense Science Board Task Force will review and evaluate operational policy and procedures, command and control, intelligence, combat support activities, weapon system performance, and science and technology requirements.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5
