Administration for Children and Families

Submission for OMB Review; Comment Request

Title: Implementation of the Head Start National Reporting System on Child Outcomes.

OMB No.: 0970-0249.

Description: The Administration on Children, Youth and Families (ACYF),

Administration for Children and Families (ACF) of the Department of Health and Human Services (HHS) is requesting comments on plans to implement the Head Start National Reporting System on Child Outcomes. This information will be used to enhance Head Start program quality and accountability.

The Head Start National Reporting System (HSNRS) has three major goals. First, the HSNRS will provide teachers and local programs with additional information regarding children's progress by reporting on how children are doing at the beginning and end of the program year in a limited number of areas. Second, the HSNRS will create a new national system of data on child outcomes from every local Head Start agency for use in planning targeted training and technical assistance services to strengthen program effectiveness. Third, the HSNRS will be used by ACF to help in the monitoring

of local Head Start agencies in order to strengthen program accountability and improve program quality.

This effort will ensure that every Head Start program will assess in a consistent fashion the progress made by children in acquiring a limited set of early literacy, language, and numeracy skills. All Head Start children who are four years old or older will be administered a direct child assessment twice a year, the data analyzed, and the finding reported to the Head Start Bureau, ACF Regional Offices and local Head Start agencies. The HSNRS assessment is designed to create aggregate data on the progress or groups of children at the center and program levels. It is not designed to report on the school readiness of individual Head Start children.

Respondents: Head Start children and Head Start staff.
