

Nissan also provided a chart showing production "start" and "end" dates for the R32, the R33, and the R34 models. The R32 models were manufactured from May 1989 through November 1994; the R33 models were manufactured from August 1993 through June 1998; and the R34 models were manufactured from November 1997 through August 2002. Included in the chart is information identifying the production "start" dates when air bags were offered as an option and as standard equipment at both the driver and the front passenger's seating positions on the R32, the R33, and the R34 model vehicles.

The agency did not have this information from Nissan at the time of its original decision to grant import eligibility to 1990–1999 Nissan GTS and GTR passenger cars. Instead, the agency heavily relied on the results of static and dynamic tests on two modified 1996 R33 model vehicles, which, in its overall context, the original petition suggested were representative. As indicated in the original petition, the petitioner had made structural modifications to these two vehicles and replaced the air bags at the driver's and the front passenger's seating positions with components manufactured to its own specifications. The petitioner did not demonstrate full compliance with the performance requirements of FMVSS 208 and other crashworthiness standards (e.g., FMVSS Nos. 210 *Seat Belt Assembly Anchorages*, 212 *Windshield Mounting* and 301 *Fuel System Integrity*) for R32 and R34 models because no test data was provided to the agency.

The agency's decision to grant import eligibility to 1990–1999 Nissan GTS and GTR passenger cars also relied on the petitioner's assertion that the original equipment driver's air bag on 1990–1993 models, and the driver and passenger's air bags on 1994–1999 models would be replaced with components manufactured to the petitioner's specifications.

However, the air bag production chart provided by Nissan shows that no driver's air bags were available in the R32 GTS model until August 1991. For the R32 GTR model, no driver's air bag was offered until February 1994, and it was then offered only as optional equipment. Nissan did not offer passenger's air bags in the R32 model. Nissan began production of the R33 model in August 1993, offering both driver and passenger's air bags as optional equipment on the GTS model. It was not until January 1995 that a driver's air bag was offered on the GTR model. As of January 1995, the driver's

air bag became standard on both GTS and GTR models. One year later, in January 1996, the passenger's air bag became standard on both GTS and GTR models.

Nissan has informed the agency that it does not possess records that would allow it to determine whether any individual vehicle had the air bags installed when those air bags were offered as optional equipment. The agency can only be assured that R33 vehicles, produced by Nissan beginning in January 1996, will have both driver and passenger's air bags installed as original equipment.

On the basis of the foregoing, NHTSA has tentatively concluded that the original grant of eligibility to the 1990–1999 Nissan GTS and GTR passenger cars, comprising R32, R33, and R34 model vehicles, was overly broad. As a consequence, the agency has tentatively decided to rescind that decision in part. If it makes this rescission, only Nissan R33 model GTS and GTR passenger cars manufactured between January 1996 and June 1998 will be eligible for importation in the future.

#### Vehicle Eligibility Number

The importer of a vehicle admissible under any import eligibility decision must enter on the HS-7 Declaration form covering the entry the appropriate vehicle eligibility number indicating that the vehicle is eligible for importation. Vehicle eligibility number VCP-17 is currently assigned to 1990–1999 Nissan GTS and GTR passenger cars. If this tentative decision is made final, NHTSA will rescind that eligibility number and assign a new eligibility number to Nissan GTS and GTR passenger cars manufactured between January 1996 and June 1998 that are to remain eligible for importation.

Interested persons are invited to submit comments on the tentative decision described above. Comments should refer to the docket number and be submitted to: Docket Management, Room PL-401, 400 Seventh St., SW., Washington, DC 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action will be published in the **Federal Register** pursuant to the authority indicated below.

In a proposed rulemaking being published separately in the **Federal Register**, the Department is proposing to amend its regulations at 31 CFR 1.36. The amendment will change the basis of the exemption claimed for this system of records from that which is provided under 5 U.S.C. 552a(j)(2), to that which is provided under 5 U.S.C. 552a(k)(5).

The report of an altered system of records, as required by 5 U.S.C. 552a(r) of the Privacy Act, has been submitted to the Committee on Government Reform of the House of Representatives, the Committee on Homeland Security

and Governmental Affairs of the Senate, and the Office of Management and Budget, pursuant to Appendix I to OMB Circular A-130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated November 30, 2000.
