

Performance Measures for Ten-Site Anti-Gang Initiative

The purpose of this program is to **reduce gang crime and violence** through the implementation of three strategies:

1. Prosecution/enforcement strategies with the goal to reduce the occurrence of violent gang-related* incidents through both reactive and proactive efforts supported by enforcement planning coordinated with federal, state, and local law enforcement and informed by data and real-time intelligence.
2. Prevention and intervention strategies directed at America's youth with the goal to reduce the occurrence of youth gang-related incidents and increase positive outcome for youth at high risk for gang involvement through targeted, evidenced based gang prevention.
3. Prisoner reentry strategies with the goal to increase public safety by reducing recidivism rates for high-impact gang involved offenders returning to the community through the use of vouchers, mentors, and community organizations (including faith-based) for the delivery of services and treatment.

***Note:** the Performance Measures shown in the table below and presented in **Bold** font are used to gauge overall program effectiveness using results reported by all grantees. The data elements presented in **Bold** font in the "Data to be Provided by Grantees" column are mandatory data elements that must be reported by all grantees using funds for initiatives supported by that data elements corresponding Program Goal. Standard font data elements need only be reported if applicable to the focus of local-site planning initiatives.*
