Title: NPDES and Sewage Sludge Monitoring Reports (Renewal).

Abstract: This ICR estimates the current monitoring, recordkeeping and costs associated with submitting and reviewing Discharge Monitoring Reports (DMRs), sewage sludge monitoring reports, and other monitoring reports under the Environmental Protection Agency's (EPA) NPDES program. The NPDES program regulations, codified at 40 CFR parts 122 through 125, require permitted municipal and non-municipal point source dischargers to collect, analyze, and submit data on their wastewater discharges. Under these regulations, the permittee is required to collect and analyze wastewater samples and perform other types of discharge monitoring and report the results to the permitting authority (EPA or an authorized NPDES State). Sample monitoring, analysis, and reporting frequencies vary by permit, but for the most part, must be performed at least annually for all permitted discharges. Upon renewal of this ICR, the permitting authority will continue to require NPDES and sewage sludge facilities to report pollutant discharge monitoring data. The permitting authority will use the data from these forms to assess permittee compliance, modify/add new permit requirements, and revise effluent guidelines. The monitoring data required of NPDES and sewage sludge facilities represents the minimum information necessary to achieve the Agency's goal and satisfy regulatory standards.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are

identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 24 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Permitted municipal and non-municipal point source dischargers and sewage sludge facilities, and States and Territories authorized to administer and implement the NPDES permit program.

Estimated Number of Respondents: 81,988.

Frequency of Response: annually and other.

Estimated Total Annual Hour Burden: 14,164,582.

Estimated Total Annual Cost: \$5,131,000 includes \$0 annualized capital or O&M costs.

Changes in the Estimates: There is a decrease of 57,375 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to adjustments to the estimates.

Dated: May 17, 2005.
