

addition to collecting client feedback through Quality Assurance Surveys, the U.S. Commercial Service would like to institutionalize client focus groups as another mechanism to obtain further client feedback and substantiate customer service trends we are seeing in the surveys. Client focus groups will enrich the quantitative data of surveys by providing a qualitative context for the trends that emerge. The purpose of the attached client focus group questioning routes is to collect feedback from U.S. businesses that receive export assistance services from the U.S. Commercial Service. In providing these services, the U.S. Commercial Service promotes the goods and services of small and medium-sized U.S. businesses in foreign markets.

II. Method of Collection

Recruit firms over phone using Commercial Service domestic offices (USEACs). Data collection will be conducted during face-to-face interview forums (6–8 participants per focus group) by a client focus group moderator who will transcribe via computer. All comments from participants will be anonymous

SUPPLEMENTARY INFORMATION:

I. Abstract

In accordance with Executive Order 12862, the National Institute of Standards and Technology (NIST), a non-regulatory agency of the Department of Commerce, proposes to conduct a number of surveys, both quantitative and qualitative.

The surveys will be designed to determine the type and quality of the products, services, and information our key customers want and expect, as well as their satisfaction with and awareness of existing products, services, and information. In addition, NIST proposes other customer service satisfaction data collections that include, but may not be limited to focus groups, reply cards that accompany product distributions, and web-based surveys and dialog boxes that offer customers the opportunity to express their level of satisfaction with NIST products, services, and information and for ongoing dialogue with NIST. NIST will limit its inquiries to data collections that solicit strictly voluntary options and will not collect information that is required or regulated. No assurances of confidentiality will be given. However, it will be completely optional for survey participants to provide their name or affiliation information if they wish to provide comments for which they elect to receive a response. In addition, NIST will not have electronic tracking and will not set cookies for web-based customer responses.

II. Method of Collection

NIST will collect this information by electronic means, as well as by mail, fax, telephone, and person-to-person interaction.

III. Data

OMB Number: 0693–0031.
