

**Federal PKI Steering Committee Meeting
April 30, 2002**

Pilot with NIST/FPKISC using SingleSignOn.Net digital certificates:

The FPKISC has entered into a pilot with NIST to give FPKISC members SingleSignOn.Net digital certificates to use and access secure web pages on the FPKISC web site. This pilot should last approximately 6 months to a year.

A representative from Digital Signature Trust Co and a representative from SingleSignOn.Net briefed us on their appliance and how we can access our digital certificates.

Open Source Software for e-Government:

The Cyberspace Policy Institute of The George Washington University will have demonstrations of mature Open Source programs every month in conjunction with the General Services Administration at NSF facilities. A Q&A session will follow the presentations. This month (May 14th 2pm to 4pm) - Overview of Open Source Research at DARPA: Open Source PKI and Automated Assessment of Security Vulnerabilities in Software Code. Located at the NSF, Stafford II Building (4121 Wilson Blvd.) in Room 555.

Certificate Policy Working Group (CPWG) Status:

The CPWG is going to meet on May 9th to discuss DoD's action items from the previous CP/CPS meeting and on May 10th to discuss NASA's CP/CPS in relation to the FBCA CP.

We have received a copy of the Department of Treasury's application for cross certification with the FBCA, however, it is missing the compliance audit report. For the CPWG to review an agencies application for cross certification with the FBCA, the agency must include their CP, CPS, and compliance audit report.

Business Working Group (BWG) Status:

Barry West, chair of the BWG, has accepted the position of CIO for the National Weather Service. If you or someone you know would like to chair the BWG, please contact Judy Spencer. A date has not yet been identified for the next BWG meeting.

Technical Working Group (TWG) Status:

The next TWG meeting is scheduled for May 2nd at 9am. Located at the NIST North Building in Room 152.

The following presentations will be made at this meeting: Scalable Certificate Validation and Simplified PKI Management (Novomodo, Inc), Protection Profile for PK-Enabled applications (USMC/Cygnacom), Bridge CA Interoperability Pilot Update (NIH), Updated Federal PKI Certificate and CRL Profile (NIST) and Proposed Federal PKI Directory Profile Version 2.0 (Booz-Allen & Hamilton).

Health Care Working Group (HCWG) Status:

The next HCWG meeting is scheduled for June 25th at 10am. Located at the Hubert H. Humphrey Building in Room 305A.

Legal and Policy Working Group (LPWG) Status:

At the April 22nd meeting we discussed the following: adopting new language to the FBCA CP since the FBCA is going to interoperate with non-federal agencies and the capability of filtering IP addresses that try to access the FBCA directory.

The next LPWG meeting is scheduled for May 20th at 1pm. Located at the GSA/NCR Building in Room 5700.

Next FPKISC Meeting:

The next FPKISC meeting is scheduled for May 29th at 9:30am. Located at the GSA/Central Office in Room 5141B.

Federal agencies are welcome to send a representative to participate in these meetings. However, government contractors are not permitted to attend these meetings.
