

U.S. E-Authentication Identity Federation Approved Product List (APL)

The technology products listed herein have demonstrated basic interoperability in the E-Authentication Interoperability Lab using the E-Authentication Security Assertion Markup Language (SAML) 1.0 and 2.0 Interface Specification in a federated environment. These products are therefore approved by the U.S. E-Authentication Identity Federation for use by Federal agencies in implementing E-Authentication.

This list is subject to revision by the E-Authentication Solution at any time based on E-Authentication Solution approved interoperability testing results.

Products currently demonstrating interoperability using the E-Authentication Security Assertion Markup Language (SAML) 1.0 and 2.0 Interface Specification in a federated environment:

SAML 1.0	SAML 2.0
<i>Company/Product/Contact</i>	<i>Company/Product/Contact</i>
