DEPARTMENT OF ENERGY

Record of Decision: Environmental Impact Statement for the Continued Operation of the Pantex Plant and Associated Storage of Nuclear Weapon Components

AGENCY: Department of Energy. **ACTION:** Record of decision.

SUMMARY: The Department of Energy is issuing this Record of Decision for the continued operation of the Pantex Plant and associated storage of nuclear weapon components. This Record of Decision is based on the information, analysis, and public comment contained in the Final Environmental Impact Statement for the Continued Operation of the Pantex Plant and Associated Storage of Nuclear Weapon Components (Pantex Plant EIS) (DOE/EIS-0225, November 1996). The Department has decided to implement the preferred alternative by: (1) Continuing nuclear weapon operations involving assembly and disassembly of nuclear weapons at the Pantex Plant; (2) implementing facility projects, including upgrades and construction consistent with conducting these operations; and (3) continuing to provide interim pit storage at the Pantex Plant and increasing the storage level from 12,000 to 20,000 pits.

FOR FURTHER INFORMATION CONTACT: For further information on or copies of the Pantex Plant EIS or other information related to this Record of Decision, please call 505–845-4351 or write to: Ms. Nanette D. Founds, Pantex Plant EIS Project Manager, EIS Project Office, U.S. Department of Energy, Albuquerque Operations Office, P.O. Box 5400, Albuquerque, New Mexico 87175–5400.

This Record of Decision is based on the Final Environmental Impact Statement for the Continued Operation of the Pantex Plant and Associated Storage of Nuclear Weapon Components (DOE/EIS-0225, November 1996), hereafter referred to as the Pantex Plant EIS, and other factors.

Background

Until 1989, Pantex Plant activities were closely coupled with operations at the Rocky Flats Plant, now the Rocky Flats Environmental Technology Site, near Denver, Colorado. Two of the Rocky Flats Plant's primary missions were: (1) The manufacture of plutonium components (pits) which were eventually transported to the Pantex Plant for final assembly into nuclear weapons, and (2) receipt of pits from the Pantex Plant from disassembled weapons for recovery, reprocessing, and fabrication of the special nuclear material into new pits. In December 1989, plutonium processing and pit fabrication operations at the Rocky Flats Plant were curtailed by the Department of Energy pending resolution of safety and environmental issues. The Pantex Plant continued to disassemble weapons, but shipments of pits from dismantled weapons between Pantex and Rocky Flats were suspended. The pits from those weapons were staged in Zone 4 at the Pantex Plant for later shipment to Rocky Flats. The Department had anticipated that shipments of pits to the Rocky Flats Plant would be reinitiated when processing activities in support of new weapons programs were resumed. Efforts to restart plutonium processing operations continued until January 1992, when they were terminated by the Department because of reduced requirements for nuclear weapons production in support of the national defense.

Because pit transfers were suspended, the Department prepared the Environmental Assessment for Interim Storage of Plutonium Components at
